Abbreviations: A. B. — Additions and Betterments; Reorg. — Reorganization.

(1) Applied for prior to July 1, 1923.

PERCENTAGES.

Of the securities applied for, 48.44 per cent represented stock, 48.25 per cent bonds, 1.72 per cent notes and 1.59 per cent certificates of indebtedness.

Of the securities authorized, 46.62 per cent represented stock, 50.28 per cent bonds, 1.50 per cent notes, and 1.60 per cent certificates of indebtedness.

Of the securities dismissed, 77.03 per cent represented stock, 9.73 per cent bonds, and 13.24 per cent notes.

Of the securities pending on June 30, 1924, 95.72 per cent represented stock, .47 per cent bonds, 3.09 per cent notes, and .72 per cent certificates of indebtedness.

ADDITIONS AND BETTERMENTS.

During the year ending June 30, 1924, extensive construction programs were being carried into execution by public utility companies in California, \$192,920,725.41 of securities being authorized for this purpose, as compared with \$88,677,609 for the preceding twelve months period. These amounts are segregated to various classes of utilities as follows:

Class	Year ending June 30, 1923	Year ending June 30, 1924
Steam railroads-----	\$13,860,000 00	\$5,450,800 00
Electric railways-----	375,000 00	16,282,000 00
Gas and electric companies-----	64,292,731 00	103,744,650 00
Water companies-----	826,600 00	8,546,582 41
Telephone and telegraph companies-----	859,295 00	55,938,550 00
Warehousemen-----	5,535,350 00	279,000 00
Carriers by water-----	969,000 00	1,950,900 00
Automotive companies-----	1,959,633 00	728,243 00
Totals-----	\$88,677,609 00	\$192,920,725 41

The year witnessed two new railroad developments in California. Los Angeles Junction Railway was organized by a group of men who are engaged in developing near Los Angeles (Vernon) a central manufacturing district similar to the central manufacturing district of Chicago. To serve the industries that will be located within this district, this company, it is planned, will acquire and construct a standard gauge railroad, having its main switching yard located within the district and having spur tracks radiating and extending to all parts of the property comprising the district and territory adjacent thereto. The railroad, which will operate primarily as a terminal switching carrier, will connect with the Southern Pacific, Union Pacific and Santa Fe and Pacific Electric tracks. Los Angeles Junction Railway was authorized to issue \$1,000,000 of stock, which amount was subsequently reduced to \$500,000.

The other new railroad development is that of the Santa Fe and Los Angeles Harbor Railway Company, a subsidiary of The Atchison, Topeka and Santa Fe Railway Company. The new company was organized to connect with the tracks of the latter company near El Segundo and to extend a distance of about twelve miles in a general southeasterly direction to Torrance and Wilmington; Santa Fe and Los Angeles Harbor Railway Company was authorized to issue \$50,000 of stock. Funds to construct the line of railway are being advanced by The Atchison, Topeka and Santa Fe Railway Company.

Reporting the necessity of acquiring additional equipment, The Western Pacific Railroad Company applied for and received permis-

sion to issue \$3,105,000 of 5½ per cent serial equipment trust certificates. The equipment to be purchased was reported to consist of five heavy Mikado locomotives, five Mallet locomotives, 775 steel refrigerator cars, 100 logging cars, 200 automobile cars and one spreader.

Electric railway financing is accounted for almost entirely by bonds and certificate issues of Key System Transit Company, Market Street Railway Company and San Diego Electric Railway Company.

Coming now to the gas and electric companies, it appears that during the year ending June 30, 1923, the Commission authorized this class of utility to issue for additions and betterments \$64,292,731 of securities and during the year ending June 30, 1924, \$103,744,650, an increase during the latter year of \$39,451,919. The construction of gas and electric generating plants and the extension and improvement of facilities and services called for expenditures by every gas and electric company within the state.

Copies of the 1924 budgets were filed with the Commission by most of the larger gas and electric utilities in formal proceedings, which budgets set forth estimated construction expenditures during 1924 as follows:

The California-Oregon Power Company-----	\$5,334,500 00
Great Western Power Company of California-----	2,652,134 67
Los Angeles Gas and Electric Corporation-----	13,189,110 00
Pacific Gas and Electric Company-----	30,592,469 42
San Diego Consolidated Gas and Electric Company-----	2,615,600 00
Southern California Edison Company-----	26,288,000 00
Southern California Gas Company-----	3,200,000 00
Western States Gas and Electric Company-----	1,317,272 00

The California-Oregon Power Company during the year brought toward completion the construction of an additional unit in its Copco hydro-electric plant, and the Link River dam in Oregon and the transmission line from Prospect, Oregon, to Eugene, Oregon, connecting with the Mountain States Power Company. The company is now proceeding with the building of a new hydro-electric generating plant to be known as Copco No. 2 and to have an installed capacity of 30,000 kilovolt amperes; and of a 110,000-volt transmission line from Delta to Castella, a distance of 82 miles. The company has been authorized to enter into a contract with the Pacific Gas and Electric Company, by the terms of which, power generated at the new plant will be taken by the latter company.

On the Great Western Power Company of California system, there is nearing completion the construction of the new Golden Gate substation at El Cerrito, the double circuit steel power transmission line from Valona to the Golden Gate station, and the rebuilding of the Sacramento Station to take care of the growth of the company's load in Sacramento. The new Golden Gate substation was built to handle the rapidly growing demand for power on Great Western Power Company's system in San Francisco and the bay regions.

Among the expenditures of Los Angeles Gas and Electric Corporation appears the sum of \$1,607,100 for gas works, including one 7,000,000 cubic foot generator, and one 1,000,000 cubic foot per hour, and two 500,000 cubic foot per hour, compressors, one 10,000,000 cubic foot holder and property and installation of foundation for another 10,000,000 cubic foot holder, together with auxiliary equipment and

building. Its other expenditures include \$3,985,615 for its gas distributing system and \$2,312,050 for its electric distributing system.

The Pacific Gas and Electric Company and its subsidiary, Mount Shasta Power Corporation, during the year, went forward with construction work on the Pit River Power House No. 3, which, when completed, will have an installed capacity of more than 100,000 horsepower. The estimated construction expenditures of this company included expenditures on the Sierra and San Francisco Power Company's properties which are operated under lease by the Pacific Gas and Electric Company, and on the California Telephone and Light Company, which is controlled by Pacific Gas and Electric Company through stock ownership.

The expenditures of Western States Gas and Electric Company, and El Dorado Power Company, a subsidiary company, included amounts used for the construction of the hydro-electric plant on the American River, known as the El Dorado Development, which, when ultimately completed, will have a capacity of 100,000 horsepower.

During the latter part of 1923, Southern California Edison Company placed into operation its Big Creek Power House No. 3, which also has a generating capacity of 100,000 horsepower. The company is going ahead with its Big Creek development, it being estimated that during 1924 the total net construction expenditures on this account will amount to \$9,738,000, the other expenditures including transmission line and miscellaneous service extensions and betterments, bringing this company's total for the year up to \$26,288,000, as set forth in the foregoing tabulation.

The amount of securities which the Commission authorized gas and electric companies to issue for additions and betterments is set forth fully in Table No. 5 preceding.

Of the \$8,546,582.41 of securities authorized to be issued by water companies for additions and betterments, \$6,913,582.41 was applied for and granted to East Bay Water Company. This company is going forward with the development of its Upper San Leandro project which will complete the development of the San Leandro drainage basin. The yield from the San Leandro Creek when fully developed is estimated at 15.9 million gallons daily.

The securities authorized to be issued by telephone companies for additions and betterments amounting to \$55,938,550 is made up almost entirely of amounts of stock issued by Southern California Telephone Company and The Pacific Telephone and Telegraph Company. These two companies during the year were authorized to issue in the aggregate \$55,000,000 of stock to refund indebtedness which in turn had been used to pay for additional properties. As indicative of the growth of the two companies attention is called to the increase in the number of subscribers. The Pacific Telephone and Telegraph Company reported during the year 1923 that its subscribers increased 60,612 over 1922 and the Southern California Telephone Company reported an increase during the same period of 29,428.

Securities authorized to be issued by carriers by water amounted to \$1,950,900 and include \$1,332,500 of stock which the Wilmington Transportation Company applied for because of the reported necessity of increased facilities for carrying passengers between Wilmington and

Avalon. Richmond and San Francisco Transportation Company was authorized to issue \$425,000 of stock to pay in part the cost of an automobile ferry to operate over proposed route between the two cities.

While the amount of securities authorized to be issued by automotive companies for additions and betterments aggregated only \$728,243 it is of interest to note that some of the companies have adopted a form of financing similar to that often used by the railroad companies, namely, the execution of equipment trust and lease agreements and the issue of equipment trust certificates. During the year the Commission authorized the issue of \$100,000 of equipment trust certificates by automotive companies and there was pending at the close of the year an application to issue an additional amount of certificates of like amount. All of the equipment trust agreements entered into by automotive companies and approved by the Commission during the year have provided for the repayment of the certificates serially on or before five years after date and have provided for the issue of 7 per cent certificates.

It is hoped that in the future such form of security can be issued at a lower rate of interest.

REFUNDING.

The amount of securities authorized to be issued during the year ending June 30, 1924, for refunding purposes amounted to only \$9,050,528 as compared with \$39,796,618 for the preceding twelve months period.

The \$39,796,618 authorized during the latter period included the \$22,000,000 of bonds which the Spring Valley Water Company was authorized to issue to refund other bonds maturing and the \$9,500,000 of 7 per cent cumulative nonparticipating preferred stock which Southern California Edison Company was authorized to issue to take the place of the \$12,059,000 of second preferred stock then outstanding.

The \$9,050,528 authorized during the twelve months ending June 30, 1924, is made up in large part by the \$6,500,000 of Series "A" 7 per cent preferred stock which San Joaquin Light and Power Corporation was authorized to issue in exchange for a like amount of Series "B" 6 per cent preferred stock. This company had outstanding \$6,500,000 of preferred stock on which there were accumulated, but unpaid, dividends amounting to \$17.50 per share. The company reclassified its stock and created a new issue of 7 per cent preferred stock. It offered to pay in cash a dividend of \$4.50 on the 6 per cent preferred stock and to give the holders of such preferred stock an option to exchange their stock for the new 7 per cent preferred stock, the accumulated but unpaid dividends to be waived in consideration for the increased dividend rate.

There was one other large amount of securities authorized to be issued for refunding purposes, namely, the \$2,000,000 of common stock of The California-Oregon Power Company. This stock may be delivered by the company in exchange for \$1,500,000 of debentures issued to finance construction work.

COLLATERAL.

During the twelve months period under consideration there was but one application filed asking permission to issue and pledge securities as collateral, and that was the application of Pacific Gas and Electric

Company to issue and pledge \$11,559,000 of its general and refunding mortgage bonds. During 1921 this company executed its first and refunding mortgage, by the terms of which it agrees, among other things, that it will not issue and sell any additional general and refunding mortgage bonds, but that such bonds, after certification, will be deposited with the trustee under the first and refunding mortgage or exchanged for underlying bonds pursuant to the terms of the general and refunding mortgage. Bonds thus pledged with the trustee under the first and refunding mortgage will be held by such trustee until such time as the general and refunding mortgage is discharged of record, at which time they will be canceled. The Commission has heretofore authorized Pacific Gas and Electric Company to issue and pledge \$45,199,000 of its general and refunding mortgage bonds.

REORGANIZATION.

Under the head of reorganization there are included the securities which the Commission has authorized to be issued for the consolidation of public utility companies or for reorganization or readjustment of a company's financial structure.

Foremost among the applications involving the issue of securities for this purpose that were passed upon during the year was that involving the refinancing of the properties formerly owned by the San Francisco-Oakland Terminal Railways. To effect this refinancing the Commission authorized the issue of \$25,777,092.88 of stock and bonds by Key System Transit Company, Oakland and Haywards Railway and East Oakland Railway. The reduction in capitalization of these properties, as a result of the reorganization, amounted to \$22,300,000. In this connection attention is called to the amounts by which the capitalization of certain properties have been reduced through reorganizations approved by the Commission.

Name of company or properties	Reduction in capitalization
The Western Pacific Railway-----	\$98,400,000 00
United Railroads of San Francisco-----	34,674,000 00
San Francisco-Oakland Terminal Railways-----	22,300,000 00
Northern Electric Railway-----	18,956,329 00
Peoples Water Company-----	17,942,327 00
Pacific Light and Power Company and Southern California Edison Company-----	14,273,526 00
Oro Electric and Pacific Gas and Electric Company-----	10,173,000 00
Oakland Antioch and Eastern Railroad-----	8,495,300 00
California Oregon Power Company-----	7,475,252 97
Northern California Power and Pacific Gas and Electric Company---	5,750,000 00
Union Water Company and East Bay Water Company-----	4,750,000 00

The reorganizations mentioned in the tabulation have taken place since the effective date of the Public Utilities Act on March 23, 1912.

During the last year the Commission received or passed upon fourteen applications filed by automotive companies involving the issue of securities for reorganization and consolidation purposes. Chief among these applications were those of Auto Transit Company, Peerless Stages, Inc., and West Coast Transit Company, which involved the consolidation under one ownership and management of several operative rights and properties.

Auto Transit Company, which is engaged in transporting passengers between San Francisco and Santa Cruz, applied for permission to issue stock to acquire the properties of Coast Transit Company, which is operating between Santa Cruz and Salinas, and J. S. Nichols, who is

operating between Watsonville and Hollister. Peerless Stages, Inc., was authorized to issue \$140,000 of stock and \$14,000 of notes for the purpose of acquiring the properties of six operators who were carrying passengers generally between San Francisco and San Jose. West Coast Transit Company received permission to issue \$481,700 of stock to consolidate the operative rights and properties of eleven individual operators. The decision of the Commission now permits of the ownership and operation by one corporation, instead of eleven individuals, of the right to transport passengers by auto stages between Healdsburg and Crescent City and between Eureka and Red Bluff.

The other applications filed by automotive companies to issue securities for reorganization and consolidation purposes were made in cases where it was decided to incorporate a business which, up to that time, had been carried on by an individual or by a copartnership. The rapid development of the auto stage business is responsible for the large number of applications filed by automotive companies for permission to issue securities for reorganization purposes. The individual operator, in many cases, found that his business could be conducted better as a corporation, better service could be given, the business developed better and their interests accordingly benefited and protected.

COMMISSION'S DECISIONS.

The Commission's decisions authorizing the issue of stock, bonds, notes and other evidences of indebtedness are published in pamphlet form and also in volumes entitled "Opinions and Orders of the Railroad Commission." Attention is called to a few of these decisions.

CAPITALIZATION OF POTENTIAL VALUES.

During the year Los Angeles Junction Railway Company applied for permission to issue \$1,000,000 of common stock for the purpose, among others, of purchasing land in the central manufacturing district near Los Angeles at a cost of \$20,000 an acre. An examination of the land was made by a member of the Commission's engineering department who came to the conclusion that if the central manufacturing district continued the development it had started, the \$20,000 an acre was reasonable, but if support was withdrawn and the development stopped, then \$7,500 would be a high value. In its decision the Commission in part said:

It appears to us that the Commission is asked to permit the capitalization of a potential value. We are in effect asked to consider the value of the land as it would be with the district developed, the railroad constituting part of the improvements in the district. We can not in this proceeding consider the increase in land values because certain buildings may be constructed and certain industries may locate in the district. We think such a procedure would result in the same form of over capitalization as though stock were sold at exorbitant discounts or given away as a bonus. For the purpose of this proceeding we will assume the land which applicant asks permission to buy to have a value of \$7,500 per acre. This will be the maximum we will allow applicant to pay for the land through the issue of stock or evidence of indebtedness.

TRANSFER OF ABANDONED PROPERTY.

In Application No. 9528 the Redondo Water Company asked the Commission for permission to transfer its properties to Hermosa-Redondo Water Company. In its decision the Commission held that

the Hermosa-Redondo Water Company should not capitalize property abandoned by Redondo Water Company. Quoting from the decision:

The estimated original cost of the properties submitted in evidence includes two wells which have been abandoned. It was urged that such cost should be included, for the reason that it represents a part of the cost of obtaining a water supply. If such is the case, the cost was incurred by the Redondo Water Company and its stockholders and that company will bear the loss. There is no reason for transferring such loss to the Hermosa-Redondo Water Company.

CAPITALIZATION OF INCREASED VALUES OF ASSETS.

In making a request to issue stock Coastside Transportation Company included among its properties an item of \$25,500, representing increased value of assets. The Commission, however, refused to recognize this amount as a basis upon which it could predicate an order authorizing the issue of the stock. In this connection the decision reads in part as follows:

The uniform classification of accounts for Class A automotive transportation companies effective January 1, 1922, requires that the various plant and equipment accounts should show the cost of the property acquired or constructed. In our opinion, adjustment of asset accounts to reflect an estimated appreciation in the value of assets is contrary to the Commission's system of accounting referred to and which applies to applicant.

The uniform system of accounts does not authorize the creation of a surplus through a revaluation of assets. We think the surplus of \$25,500 reported by applicant should be eliminated from applicant's records and its books adjusted accordingly.

ISSUE OF STOCK TO ACQUIRE SOURCE OF POWER.

In Application No. 9493 Truckee Electric Light and Power Company asked permission to issue such an amount of stock as the Commission might find reasonable to acquire a power plant, which at that time it was operating under lease. The Commission, after hearing, held this request in abeyance, for the reason stated in the opinion written by Commissioner Whittlesey, which was as follows:

Truckee Electric Light and Power Company has been giving twelve-hour service only and on a flat rate basis. In Application No. 9499, which was heard at the same time as this proceeding, the company asked permission to establish metered rates for twenty-four-hour service. Testimony was introduced showing that there exists an optional source of power to Truckee Electric Light and Power Company, namely, the high voltage line of Truckee River Power Company which passes near Truckee. The advisability of utilizing such additional source of power and the resultant effect upon the value of the properties to be acquired will depend upon whether the present power plant can supply the demands placed upon it when continuous service under metered rates is undertaken. Under these conditions I believe that the request of Paul M. Doyle to sell and transfer his power plant and of Truckee Electric Light and Power Company to issue stock in payment therefor, should be temporarily held in abeyance until the Commission has had time to observe the results of applicant's operations under continuous service conditions and it will therefore be unnecessary to make a finding of value of the power plant at this time.

ISSUE OF STOCK AS STOCK DIVIDEND.

Frequently during the past year the Commission has been called upon to authorize the issue of stock for the purpose of paying a stock dividend. At all times the Commission has held that it can not authorize the issue of stock directly for the purpose of paying a stock dividend. Section fifty-two of the Public Utilities Act enumerates specifically the purposes for which the Commission may make an order authorizing the issue of securities. Upon proper showing, the Commission has authorized companies to issue stock for the purpose of reimbursing their treasury because of surplus earnings invested in

properties, a purpose which is permitted by the act. After reimbursement the Commission has taken the position that such stock may, at the option of the company, be distributed as a dividend.

In the Truckee Electric Light and Power application referred to above a request was also made to issue stock as a stock dividend. Commenting on this the decision on the application reads in part as follows:

The Commission can not of course authorize the issue of stock directly for the purpose of paying a dividend, but it can authorize the issue of stock for the purpose of enabling a utility to reimburse its treasury as provided in section 52 of the Public Utilities Act. After reimbursement, such stock may be distributed to the stockholders. An order authorizing a company to issue stock to reimburse its treasury requires a determination of the sources from which a company has obtained the money expended. As of December 31, 1922, the company reported corporate surplus unappropriated of \$14,760.56 which, according to the testimony of the company's president, represents net surplus earnings which have been used to pay for properties. An analysis of the company's books of account indicates that while the figure representing corporate surplus unappropriated is substantially correct, it was built up in part because the company has never made any allowance in its operating expenses for depreciation. In my opinion, the sum of \$3,000 should appear as a credit balance in a reserve for accrued depreciation account as of December 31, 1923. I therefore believe that this amount should be transferred from the corporate surplus account and set up as a reserve for accrued depreciation account, thus reducing the surplus available for distribution to \$11,760.56, an amount which, however, is in excess of the amount of stock proposed to be issued against such surplus.

SELLING PRICE OF SECURITIES.

In making an order authorizing the issue and sale of securities the Commission is called upon to pass upon the reasonableness of the price at which the utility plans to dispose of its securities.

On several occasions during the year Southern Sierras Power Company applied for permission to sell its first and refunding mortgage 6 per cent bonds due in 1965 at 85 per cent face value. The Commission, however, after giving consideration to the company's financial statements, permitted the sale of such bonds at 88, an increase of three points over the price proposed by the company.

In Application No. 9726 Market Street Railway Company applied for permission to issue and sell \$15,000,000 of first mortgage 7 per cent bonds due 1940 at 93 per cent of face value. The decision in this matter, written by President Seavey, comments on the price of the bonds as follows:

The company has sold the bonds at 93 per cent of their face value and accrued interest. Assuming all bonds were to remain outstanding until maturity, the effective interest rate, considering only discount, is about 7.75 per cent. The redemption of bonds prior to maturity through sinking fund payments will increase the effective interest rate to more than 8 per cent. Chas. N. Black, applicant's president and general manager, testified that negotiations were had with several parties for the sale of the bonds and that he regarded the offer of 93 and accrued interest of Dillon, Read and Company and associates as the most satisfactory. Were it not for the fact that some of applicant's important franchises expire on or before January 31, 1933, existing municipal competition and the uncertainty of what the attitude of the city will be at the time the franchises terminate, the Commission would not authorize the sale of the bonds at 93 and accrued interest.

During the year Motor Transit Company, a corporation engaged in transporting passengers by auto stage, applied for permission to issue and sell its common stock at 80 per cent of par value. The Commission, however, in making its decision in this matter, stated that after considering the evidence, it believed that it was unjustified in making

an order authorizing the sale of stock at this price and accordingly permitted the sale of the stock at not less than 90 per cent to the company.

ISSUE OF SECURITIES WITHOUT ORDER.

Frequently the Commission is requested to make an order ratifying the issue of securities previously issued without an order from the Commission. The Commission holds that securities issued without an order from the Commission are null and void under the Public Utilities Act and that the Commission can not ratify a void act. Upon the submission of satisfactory evidence the Commission has authorized the issue of new securities in lieu of those which the companies attempted to issue without an order.

As an example, attention is directed to Decision No. 13732 of the Commission. The Olive Investment Company had applied for an order ratifying certain transactions. This company without an order from the Railroad Commission had purchased the water utility properties of Olive Milling Company and had issued stock in payment. When it was called to the attention of the officers of the company that permission should have been obtained from the Commission, an application was filed for the purpose of validating such transaction. The Commission commented on the request in this decision as follows:

The Commission can not ratify transactions which it believes are void under the terms of the Public Utilities Act. It will be necessary for applicant to execute a new instrument of conveyance and issue new stock certificates, the certificates now outstanding to be canceled.

REIMBURSEMENT OF TREASURY.

It is the practice of many utilities after having expended sums for the construction of additions and betterments to file applications with the Commission requesting the issue of securities to reimburse the treasury, as provided in the Public Utilities Act. In this connection the Commission has taken the position that reimbursement of treasury applies only when the company has invested surplus earnings or other moneys not obtained from the issue of stock, bonds or other evidences of indebtedness. To illustrate, reference is made to Decision No. 13722 given on an application filed by California Telephone and Light Company. This company during the year requested permission to issue \$200,000 of bonds and to use the proceeds to reimburse its treasury on account of the expenditure of \$264,361.50 for capital purposes. The evidence submitted showed that \$209,974.13 of the \$264,361.50 represented moneys borrowed from Pacific Gas and Electric Company. In its decision, the Commission held that the proceeds obtained from the sale of the bonds should be used to pay indebtedness and not to reimburse the company's treasury.

ISSUE OF STOCK TO ACQUIRE OPERATIVE RIGHT.

It frequently happens that in filing applications with the Commission to issue securities, a request is made by stage and truck companies to issue stock to purchase operative rights. During the year Coast-side Transportation Company in making an application to issue stock, reported that the value of the franchise and good will to be acquired was \$26,940.51, and urged the Commission to make an order authoriz-

ing the issue of stock against this value. On this point the Commission in its decision says:

Section 52 of the Public Utilities Act provides, among other things, that the Commission shall have no power to authorize the capitalization of any franchise or permit in excess of the amount (exclusive of any tax or annual charge) actually paid to the state or a political subdivision thereof as the consideration for the granting of such franchise, permit or right.

Applicants made no showing as to the amount paid to the state or a political subdivision thereof, for the right to operate auto stages and trucks. No such showing having been made, we will not authorize the issuance of any stock to capitalize the amount paid to the Red Star Stage Line or any one else for operative rights.

APPROPRIATION OF SURPLUS CONDITION PRECEDENT.

During the year San Joaquin Light and Power Corporation applied for permission to reclassify its authorized capital stock and to issue its Series A 7 per cent preferred stock in exchange for a like amount of Series B 6 per cent preferred stock. The company's outstanding 6 per cent stock had accumulated but unpaid dividends amounting to $17\frac{1}{2}$ per cent of par value. To eliminate these unpaid dividends the company proposed to pay \$4.50 per share in cash and to permit the holders of the stock to exchange their 6 per cent stock for 7 per cent stock upon the cancellation of the remaining \$13 of dividends due them. The Commission granted the request of the company upon the condition that the company file with the Commission a resolution passed by its board of directors to the effect that it would not pay any dividends on its common stock unless and until the surplus reported on November 30, 1923, at \$3,107,203.14 had been increased to an amount not less than \$4,000,000, and to the further effect that it would not pay any dividends on such common stock in an amount which would hereafter reduce such surplus to a sum less than \$4,000,000. The resolution was filed.

RESPONSIBILITY OF MANAGEMENT.

In an application filed by East Bay Water Company a request was made to issue not exceeding \$2,250,000 of bonds and not exceeding \$1,162,500 of preferred stock, or in lieu of such bonds and stock, not exceeding \$3,158,000 of notes for the purpose of acquiring properties and constructing what is referred to as the Upper San Leandro Project. It appeared in the application and at the hearing held thereon that additional water should at once be made available to the East Bay Communities. There was, however, disagreement whether the construction of the Upper San Leandro Project would make any additional water available and whether in view of this contingency the construction should be undertaken. Representatives of the East Bay Municipal Utilities District, though urging that the construction of the Upper San Leandro Project should be undertaken, insisted that a representative of the district should be permitted to act in an advisory capacity and that the district be kept informed as to the cost of the project. The company objected to this proposal. Quoting from the Commission's decision:

We do not think that the Commission should, by a condition in its order, require the company to submit to a supervision by the East Bay Municipal District. We believe that the responsibility for an additional water supply for the East Bay section rests with the East Bay Water Company. The Commission expects utilities without formal order to extend their facilities and to place themselves in a position where they can give proper and adequate service. East Bay Water Company seems

to realize this and has taken the initiative in preparing cost estimates and in submitting evidence which it thinks justifies the construction of the Upper San Leandro Reservoir and appurtenances. The Commission will authorize the issue of bonds and stock or notes for the purpose of acquiring the necessary properties and constructing the Upper San Leandro Project, but any investment made in such project will not, so far as this Commission is concerned, rest on any different footing than investments heretofore made by East Bay Water Company or similar investments by other utilities.

VALIDITY OF TRANSFER OF PROPERTY.

During the year the Commission passed upon an application involving the refinancing of the properties of the San Francisco-Oakland Terminal Railways. The granting of this application was protested by Louis H. Bien, trustee in bankruptcy for United Properties Company, a bankrupt. The question was raised at the hearing whether the transfer of these properties to trustees under the decree of foreclosure was invalid because not first approved by the Railroad Commission; and second, whether the transfer which was sought in the application would in fact constitute an actual sale. The Commission held as follows:

We are of the opinion that the validity of the transfer to the trustees under the decree of foreclosure can not here be questioned. The foreclosure sale was made pursuant to the terms of certain mortgages executed prior to the enactment of the Public Utilities Act and that provision in the act requiring the consent of the Railroad Commission prior to any sale, would therefore not be applicable.

We are further of the opinion that the transfer of the properties by the trustees for which authorization is herein sought will constitute an actual sale of public utility property under the provisions of section 51 of the Public Utilities Act. It is true that the foreclosure sale and the sale which this Commission is here asked to authorize, are means to carry into effect a reorganization plan. Notwithstanding this fact, there will not only be a change in ownership of the title to the properties, but in their management as well. We believe that this proceeding involves an actual sale of the properties, both in form and in substance.

VALUE OF PROPERTIES IN REORGANIZATION PROCEEDING.

During the hearing in the reorganization proceeding of the San Francisco-Oakland Terminal Railways, counsel for the railway company maintained that the value of the properties was not particularly material in such proceeding, for the reason that the securities which were to be refunded were all outstanding, and that the Commission was asked to authorize the issue of a lesser amount of securities. Commenting on this, the Commission said:

The Commission is not inclined to agree with the views of counsel in this regard. We think the value of the properties in this as in any other reorganization proceeding, is material. We realize that this is neither a valuation nor a rate proceeding, but when this Commission is asked to authorize the issue of securities, to acquire public utility properties, or to refinance such public utility properties, the Commission should have before it evidence of the actual or estimated cost of the properties.

CAPITALIZATION OF REORGANIZATION EXPENSES.

The Commission in its decision relating to the refinancing of the properties of San Francisco-Oakland Terminal Railways, held that reorganization expenses should not be capitalized. The Commission says:

We do not believe that the reorganization expenses should in any manner be a charge against the public or be paid at the expense of proper service to the public. The public was not at fault and can not be held responsible for the financial difficulties of the company. The reorganization became necessary because of the acts of the owners of the property and such owners should bear the expense of reorganization. Whatever moneys have been, or will be expended, for payment of reorganization expenses should be returned through appropriation of moneys available for interest and dividends. The order will require this to be done.

CHAPTER V.

FINANCIAL CONDITION OF UTILITIES.

During the year ending December 31, 1923, the operating revenues of steam railroads, electric railways, gas, electric light and power, water, telephone, telegraph companies, carriers by water, wharfingers, warehousemen and auto stages filing annual reports with the Commission total \$890,351,740.52 as compared with \$818,244,553.28 for the year ending December 31, 1922; the increase amounting to \$72,107,187.24. During the same period operating expenses increased \$35,472,430.12, being \$638,448,890.42 in 1923 and \$602,976,460.30 in 1922. The net operating revenues, as such term is used in the annual report forms for the several classes of utilities, increased \$36,634,757.12, the total figure for 1923 being \$251,902,850.10. In 1922 the net operating revenues were reported at \$215,268,092.98; in 1921 at \$192,176,416.16; in 1920 at \$136,033,206.65.

Steam railroads for the calendar year 1923 report operating revenues of \$475,790,421.52 and operating expenses of \$336,590,769.31 leaving net operating revenues of \$139,199,652.21 as compared with net operating revenues of \$118,743,543.39 for 1922 and \$115,496,439.67 for 1921. These figures, however, include the total earnings of The Atchison, Topeka and Santa Fe Railroad Company, Los Angeles and Salt Lake Railway Company, Southern Pacific Company (Pacific System), the Western Pacific Railroad Company, Nevada-California-Oregon Railway Company, Tonopah-Tidewater Railroad Company, all of which companies are engaged in interstate as well as intrastate business. The railroad companies operating within the State of California show gross revenues from business within California at \$188,650,210.26, expenses at \$135,595,090.37 and net operating revenues at \$54,056,119.80 as compared with net revenues of \$46,722,508.57 for 1922, \$42,199,000 for 1921 and \$29,945,000 for 1920. Under the classification of accounts prescribed for steam railroads, taxes are not included in operating expenses but are a charge against the net operating revenue.

Electric railway companies report operating revenues of \$60,676,463.46, operating expenses of \$45,148,087.68 and net operating revenues of \$15,528,375.78. Income from auxiliary and nonoperating sources is reported at \$1,166,742.28. After paying taxes and interest accrued and after making other deductions from gross income, the companies report \$3,483,684.21 available for dividends and surplus as compared with \$2,343,666.38 for 1922.

Water companies for 1923 report operating revenues of \$15,930,949.74 as compared with \$14,867,147.17 for 1922. The net operating revenues of such companies for 1923 are reported at \$6,262,990.56 as compared with \$5,662,781.14 for 1922. In case of water companies, taxes are included in operating expenses.

Electric light and power companies for 1923 report operating revenues of \$75,541,683.49, operating expenses of \$35,946,413.34 and

net operating revenues of \$39,595,270.15 as compared with \$69,322,-631.48, \$40,048,764.25 and \$29,273,867.23, respectively, for 1922.

Gas companies for 1923 report operating revenues of \$42,957,212.22, operating expenses at \$32,348,369.85 and net operating revenues of \$10,608,842.37. For 1922 this class of utility reported operating revenues of \$39,963,480.27, operating expenses of \$30,761,909.54 and net operating revenues of \$9,201,570.73.

The operating revenues of telephone and telegraph companies filing annual reports with the Commission were reported at \$168,507,819.75 as compared with \$156,196,338.64 for 1922, the increase amounting to \$12,311,481.11. The operating expenses are reported at \$133,103,043.77 for 1923 and at \$121,905,916.72 for 1922, the increase being \$11,197,-127.05. Net operating revenues were reported by this class of utility at \$35,404,775.98 for 1923 and at \$34,290,421.92 for 1922. The figures include the total revenues of The Pacific Telephone and Telegraph Company and the Western Union Telegraph Company, both companies doing business outside of the state as well as within the state. The report of the Western Union Telegraph Company shows a total revenue of \$111,733,560.28 of which \$7,438,912 is by the company allocated to the State of California. The report of The Pacific Telephone and Telegraph Company shows total operating revenues at \$40,072,225.97 of which \$26,347,815.39 is by the company allocated to the State of California. Neither company in reports filed has allocated operating expenses.

Carriers by water, wharfingers and warehousemen in their reports filed with the Commission show gross revenues of \$33,392,209.48 as compared with \$30,583,530.25 for 1922 and net revenues of \$3,985,-122.80 as compared with \$2,668,654.67 for 1922.

Auto stage and truck companies for 1923 report operating revenues of \$17,554,980.86 as compared with \$15,549,349.94 for 1922. Operating expenses of such operators for 1923 are reported at \$16,237,160.61 and for 1922 at \$14,322,725.34. The net operating revenues of auto stage and auto truck operators for 1923 are reported at \$1,317,820.25, for 1922 at \$1,226,624.60.

Attention is called to the fact that in the case of water, electric, gas, warehousemen, wharfingers, carriers by water, auto stages and auto trucks, taxes are included in operating expenses. In the case of steam and electric railroads, telephone and telegraph companies, operating expenses do not include any allowance for taxes. The amount of taxes which each class of utility has charged against its gross operating revenues or its operating income is shown in tables published elsewhere in this report.

TABLE NO. 12.

Summary of Operating Revenues and Expenses and Net Operating Revenues of Public Utilities
Reporting to the Railroad Commission 1922-1923.

	1922	1923
<i>Water companies—</i>		
Operating revenues.....	\$14,867,147 17	\$15,930,949 74
Operating expenses.....	9,204,366 03	9,667,959 18
Net operating revenue.....	\$5,662,781 14	\$6,262,990 56
<i>Electric companies—</i>		
Operating revenues.....	69,322,631 48	75,541,683 49
Operating expenses.....	40,048,764 25	35,916,413 34
Net operating revenue.....	\$29,273,867 23	\$39,595,270 15
<i>Gas companies—</i>		
Operating revenues.....	39,963,480 27	42,957,212 22
Operating expenses.....	30,761,909 54	32,348,369 85
Net operating revenue.....	\$9,201,570 73	\$10,608,842 37
<i>Telephone and telegraph companies—</i>		
Operating revenues.....	156,196,338 64	168,507,819 75
Operating expenses.....	121,905,916 72	133,103,043 77
Net operating revenue.....	\$34,290,421 92	\$35,404,775 98
<i>Steam railroads—</i>		
Operating revenues.....	436,523,892 96	475,790,421 52
Operating expenses.....	317,780,349 57	336,590,769 31
Net operating revenue.....	\$118,743,543 39	\$139,199,652 21
<i>Electric railways—</i>		
Operating revenues.....	55,238,182 57	60,676,463 46
Operating expenses.....	41,037,553 27	45,148,087 68
Net operating revenue.....	\$14,200,629 30	\$15,528,375 78
<i>Warehouses and wharfingers—</i>		
Operating revenues.....	30,583,530 25	31,243,389 12
Operating expenses.....	27,914,875 58	9,929,726 48
Net operating revenue.....	\$2,668,654 67	\$1,313,662 64
<i>Carriers by water—</i>		
Operating revenues.....		22,148,820 36
Operating expenses.....		19,477,360 20
Net operating revenue.....		\$2,671,460 16
<i>Auto stages and auto trucks—</i>		
Operating revenues.....	15,549,349 94	17,554,980 86
Operating expenses.....	14,322,725 34	16,237,160 61
Net operating revenue.....	\$1,226,624 60	\$1,317,820 25
<i>Totals—</i>		
Operating revenues.....	818,244,553 28	890,351,740 52
Operating expenses.....	602,976,460 30	638,448,890 42
Total net operating revenue.....	\$215,268,092 98	\$251,902,850 10

NOTE.—Taxes not included in operating expenses of steam railroads, electric railways, telephone and telegraph companies in 1922 and 1923 and large electric companies in 1923.

¹Included in warehouse and wharfinger operations.

²Does not include carriers by water.

TABLE NO. 13.

Net Operating Revenues of Public Utilities Operating in California 1922-1923.

	1922	1923
Water companies-----	\$5,662,781 14	\$6,262,990 56
Electric companies-----	29,273,867 23	39,595,270 15
Gas companies-----	9,201,570 73	10,608,842 37
Telephone and telegraph companies-----	34,290,421 92	35,404,775 98
Steam railroads-----	118,743,543 39	139,199,652 21
Electric railways*-----	14,200,629 30	15,528,375 78
Warehouses and wharfingers-----	2,668,654 67	1,313,662 64
Carriers by water-----		2,671,460 16
Auto stages and auto trucks-----	1,226,624 60	1,317,820 25
Totals-----	\$215,268,092 98	\$251,902,850 10

*Includes interstate business of companies operating in more than one state.

¹Included in warehouses and wharfingers.

TABLE NO. 14.

Fixed Capital Installed by Certain California Public Utilities as Shown in Annual Reports Filed with the Railroad Commission, 1913 to 1923, Inclusive.

	1913 to 1922, inclusive	1923	Total
Steam railroads-----	\$299,491,409 23	\$95,794,327 98	\$395,285,737 21
Electric railways-----	37,711,009 43	5,323,803 23	43,034,812 66
Electric companies-----	333,918,719 59	65,568,014 54	399,486,734 13
Gas companies-----	71,686,163 19	28,942,283 73	100,628,446 92

CHAPTER VI.

SERVICE DEPARTMENT—RAILROAD, STAGE
AND AUTO TRUCK OPERATION—SAFETY.

The Railroad Commission maintains a service department whose duty it is, among other things, to investigate and report upon the safety of railroad operation and the accidents arising from such operation, and to report and make recommendations for the betterment of all other conditions which it finds to be unsafe or deficient. Since the acquisition of jurisdiction by the Railroad Commission over automobile stage and freight truck transportation, field inspection of the condition of automobile stages and trucks and compliance with the safety rules and operating regulations prescribed by the Commission, are cared for by the inspectors of the service department and during the year 574 automobile inspections were made by such department and violations of the general orders of the Commission, when found, were required to be immediately corrected.

Among the more important duties undertaken by the service department may be mentioned the inspection of dispatching methods, establishment of standard and uniform rules of operation and the requiring of carriers to properly examine the qualifications and physical fitness of employees in train and engine service.

UNSAFE PRACTICES CORRECTED.

As a result of inspections, which have continued over a period of many years, many unsafe practices have been corrected and standard and uniform methods of operation have been prescribed for the smaller roads, resulting in the placing of their general operation on a parity with the larger standard roads and in accordance with the standard rules and methods which have been found to be safe by their use with the larger carriers. It may be stated that the dispatching methods and operating practices of the smaller railroad carriers in the State of California are now on a satisfactory basis. The work of the department also includes such inspection as is required by the statutes and rules of the Railroad Commission as to compliance by carriers with such laws and regulations.

IMPAIRED CLEARANCES IMPROVED.

The matter of impaired clearances continues to receive attention and inspection and each succeeding year results in an added number of impaired clearances being brought to the standard as required by the Commission under the provisions of its General Order No. 26; new construction is required to be accomplished in accordance with the standards prescribed and as repair and renewal of old structures are undertaken, any inadequate clearances are adjusted to standard, resulting in the elimination of hazard of accident to trainmen and others.

ACCIDENT INVESTIGATION.

Every train accident resulting in the loss of life or serious injury to passengers or employees is investigated by the Railroad Commis-

sion. When a fatal accident occurs, the company's investigation, and in some instances coroner's inquest, are attended together with an independent investigation by the Commission's inspectors at the scene of the accident that all possible information may be available regarding the accident. Upon the receipt of the inspector's report such orders or recommendations are issued by the Commission as appear to be necessary in the specific case. Inspectors cover not only accidents arising from conditions which may indicate unsafe operation, but also, as far as possible, grade crossing accidents. As a result of these latter investigations, railroads have been required to afford additional protection at grade crossings where conditions have been found to be unsafe or where it is evident that additional protection should be afforded.

INSPECTION OF SERVICE.

The Commission is constantly engaged in the inspection of the service as rendered to the public by common carriers. These inspections cover such matters as:

- (1) Sufficiency of railroad equipment, number of trains, number of cars and adequate seating facilities in cars.
- (2) Sufficiency and adequacy of depot facilities.
- (3) Location of new or abandonment of existing stations and requests for stopping trains.
- (4) Adequate number of trains or schedules on steam, electric interurban and street car lines.

Inspection is also made by the Railroad Commission as to compliance by carriers with the provisions of the "Full Crew Law," the "Head-light Law," the "Train Dispatching Law" and other safety regulations as imposed by statute or by the Railroad Commission general orders.

Deficiencies or irregularities in railroad service are brought to the attention of the Railroad Commission either by its own inspectors or by informal complaints received from the public. After investigation, the Railroad Commission directs such improvements, changes or extensions of service as to it seem proper. Much is constantly being done in this way to maintain adequate service by common carriers.

TIME TABLES MUST BE FILED.

Under General Order No. 31 of the Railroad Commission, all changes in steam and electric interurban railroad time-tables are required to be filed with the Railroad Commission and to be posted for the information of the public five days in advance of the effective date of the proposed changes. A supplement to this general order requires that in all instances where a reduction in passenger service is contemplated, or where the abandonment of any stop is desired by the railroad, an outline of the proposed time table must be submitted to the Railroad Commission thirty days prior to the proposed effective date of the change and that the permission of the Railroad Commission must be obtained prior to making any reduction in service or abandoning any stop. Similar requirements are imposed upon automobile stage and truck lines operating under the jurisdiction of the Railroad Commission.

CURTAILMENT OF SERVICE.

All requests for the reduction of passenger service or the abandonment of stops are carefully investigated by the Railroad Commission. In many instances, due to an increase in train schedules during certain seasons to care for tourist or vacation travel, it is customary to reduce the passenger train service when the particular travel for which the service was inaugurated no longer exists. In other cases, however, permission to withdraw passenger trains from service has been denied carriers if the Railroad Commission's investigation has shown that the public convenience required the retention of the service. In still other instances a rearrangement of schedules has been made, thereby satisfactorily adjusting the extra service from which a carrier desired relief and at the same time meeting the public demand for service. Practically all these matters are handled informally by correspondence, it seldom being necessary for formal proceedings to be instituted and followed by a public hearing and the subsequent order of the Railroad Commission.

ELIMINATION OF PASSENGER TRAINS.

Reduction in passenger train schedules are usually requested because of the claim that the expense of operating local trains sometimes greatly exceeds the revenue earned, and in the case of a showing satisfactory to the Railroad Commission that the trains were not earning a revenue at least equal to the direct operating costs, informal permission has been given for the discontinuance of apparently unnecessary and unpatronized passenger train service. The inroads made upon the passenger traffic formerly enjoyed by the steam and electric interurban railroads by the advent of privately owned automobiles has been in a large measure responsible for the discontinuance of local passenger service in many localities, supplemented also in some degree, by business which has been diverted to automobile stage lines which have, in many cases, operated service of greater frequency than that offered by the steam or electric interurban lines and which service has therefore attached and retained the patronage of the traveling public. The Railroad Commission, in every instance, requires a full and satisfactory showing before consenting to the elimination of passenger train service when such curtailment or diminution of service has been requested by the carriers.

ABANDONMENT OF STATIONS, TRACKS AND FACILITIES.

Under General Order No. 36 of the Railroad Commission, no station, sidetrack, spur, stop, facility for handling freight, platform or other like facilities of common carriers can be abandoned or their use discontinued without the consent of the Railroad Commission. The several applications of the carriers for such abandonments or discontinuances are carefully investigated before permission to discontinue the use of any facility is granted. In many instances such investigation shows that the retention and continued maintenance of facilities is desirable and necessary to properly accommodate the needs of shippers and receivers of freight, and in such instances the applications are denied.

The Commission is also frequently called upon to pass upon applications for change in the status of agency stations as well as the entire abandonment of stations heretofore existing and other matters wherein

authority has been requested by the carriers in an endeavor to curtail alleged unnecessary operating expense when, in the opinion of the carriers, traffic conditions did not appear to justify the continuance of agencies and other station facilities. A complete analysis of existing conditions is always required by the Railroad Commission to support the request of the carriers for the authorization of any change which will result in a discontinuance of any facility heretofore accorded the traveling or shipping public by a carrier, and the Railroad Commission has not authorized any reduction in such facilities until it has fully satisfied itself that the conditions presented by the applicant carriers were fully justified and that the patronage necessary to continue the facilities was not present.

The following are the changes in stations, agencies, facilities, etc., authorized during the year covered by this report:

<i>Date</i>	<i>Operating Company</i>	<i>Station</i>	<i>Authorized</i>
July 28, 1923—	American Railway Express Co.;	Richfield;	Agency closed
Aug. 20, 1923—	American Railway Express Co.;	Lavie;	Agency closed
Sept. 5, 1923—	American Railway Express Co.;	Tudor;	Agency closed

Jan. 26, 1924—	Southern Pacific Company;	Ord;	Station abandoned
Jan. 26, 1924—	Southern Pacific Company;	Sard;	Station abandoned
Feb. 14, 1924—	Southern Pacific Company;	Jester;	Station abandoned
Feb. 14, 1924—	Southern Pacific Company;	Ocean View;	Agency discontinued
Mar. 5, 1924—	Southern Pacific Company;	Montpellier;	Agency discontinued
Mar. 17, 1924—	Southern Pacific Company;	El Dorado;	Agency discontinued
Mar. 21, 1924—	Southern Pacific Company;	Pitt;	Agency discontinued
Mar. 7, 1924—	Southern Pacific Company;	Wardlaw;	Station abandoned
June 5, 1924—	Southern Pacific Company;	River Station, Los Angeles;	Station abandoned
June 10, 1924—	Pacific Electric Railway Co.;	Freight Station, North Glendale;	Station abandoned

LIST OF ACCIDENTS.

The following is a partial list of the accidents investigated by the Railroad Commission's inspectors during the year ending June 30, 1924:

1. July 1, 1923. *Los Angeles and Salt Lake Railroad Company*—Grade crossing accident at Hadley street, Whittier. Four occupants of automobile killed.
2. July 2, 1923. *Southern Pacific Company*, Los Angeles Division—Grade crossing accident at Park avenue, Glendale. One person killed, one injured.
3. July, 1923. *Pacific Electric Railway Company*, Western Division—Crossing accident at Wilshire boulevard, Sawtelle line. One occupant of automobile killed.
4. July 14, 1923. *Pacific Electric Railway Company*, Northern Division—Collision between motorcycle and car at intersection of Avenue 50 and Pasadena avenue, Los Angeles. One killed, one injured.
5. July 15, 1923. *Los Angeles and Salt Lake Railroad Company*, Los Angeles Division—Runaway and derailment near Cajon Station on track used jointly with Atchison, Topeka and Santa Fe Railway. Two members of train crew killed, twenty-six cars and contents destroyed.
6. July 15, 1923. *Pacific Electric Railway Company*, Western Division—Grade crossing accident at Arlington and Sixteenth streets, Los Angeles. Four persons killed, one injured.
7. July, 1923. *Pacific Electric Railway Company*, Western Division—Collision between freight and passenger train at Torrance. Damage to equipment, no personal injury.
8. August 4, 1923. *Pacific Electric Railway Company*, Northern Division—Grade crossing accident at Avenue 43 and Pasadena avenue, Los Angeles. Two persons killed.
9. August 7, 1923. *Pacific Electric Railway Company*, Southern Division—Grade crossing accident at Florence avenue, Los Angeles. One person killed.
10. August 18, 1923. *Pacific Electric Railway Company*, Southern Division—Grade crossing accident at Florence avenue, Los Angeles. Four occupants of automobile killed.
11. August 22, 1923. *Pacific Electric Railway Company*, Southern Division—Grade crossing accident at Cherry street, Long Beach.
12. August 23, 1923. *Pacific Electric Railway Company*, Eastern Division—Brakeman injured by reason of inadequate clearance at Antil Station, Highlands Line.
13. September 27, 1923. *Pacific Electric Railway Company*, Northern Division—Grade crossing accident at Hatteras street, Van Nuys. Two occupants of automobile killed.
14. September 28, 1923. *Pacific Electric Railway Company*, Southern Division—Grade crossing accident at Anaheim Road, Long Beach. Two occupants of automobile killed.
15. October 12, 1923. *Pacific Electric Railway Company*, Western Division—Collision of passenger car with freight cars at Eleventh avenue, Los Angeles on Santa Monica air line. Fourteen passengers and two employees injured.
16. November 3, 1923. *Glendale and Montrose Railway—Los Angeles and Salt Lake Railroad Company*—Collision between line car and locomotive at Glendale. One employee killed. Equipment damage, \$2,900.
17. November 21, 1923. *Southern Pacific Company*, Los Angeles Division—Grade crossing accident at Lankershim boulevard, one mile west of Burbank. Truck driver killed.
18. November 27, 1923. *Southern Pacific Company*, Los Angeles Division—Grade crossing accident at Tejunga. One occupant of automobile killed and one injured.
19. November, 1923. *Southern Pacific Company*, Los Angeles Division—Grade crossing accident two miles west of Burbank. Truck driver killed.
20. December 2, 1923. *Pacific Electric Railway Company*, Northern Division—Collision between passenger car and string of freight cars at Echandia Junction. Five passengers slightly and four employees seriously injured. Equipment damage, \$746.
21. December 8, 1923. *Southern Pacific Company*, Los Angeles Division—Grade crossing accident at Taylor street, Los Angeles. Two occupants of automobile killed.
22. December 12, 1923. *Pacific Electric Railway Company*, Southern Division—Collision between passenger train and line car. No personal injuries, but equipment damage of \$913.

23. December 16, 1923. *Pacific Electric Railway Company*, Southern Division—Grade crossing accident at South Park Gardens. One occupant of automobile killed.
24. December 16, 1923. *Pacific Electric Railway Company*, Southern Division—Crossing accident at Sixth and San Pedro streets, Los Angeles. Motorcycle traffic officer killed.
25. December 18, 1923. *Pacific Electric Railway Company*, Southern Division—Side-swipe collision in Eighth-street yards, Los Angeles. No personal injury but \$1,382 equipment damage.
26. December 31, 1923. *Southern Pacific Company*, Los Angeles Division—Grade crossing accident at Montecito. Two occupants of automobile killed.
27. January 1, 1924. *Pacific Electric Railway Company*, Eastern Division—Derailment of passenger train at La Verne caused by train striking horse staked out for grazing on right of way. No personal injuries, but \$1,028 equipment damage.
28. January 10, 1924. *Pacific Electric Railway Company*, Western Division—Collision between passenger and freight train at Torrance. Seventeen passengers slightly injured and equipment damage of \$693.
29. January 16, 1924. *Pacific Electric Railway Company*, Southern Division—Grade crossing accident at Nadeau. Two occupants of automobile killed.
30. January 18, 1924. *Pacific Electric Railway Company*, Eastern Division—Grade crossing accident at Pomona. One occupant of automobile killed and three injured.
31. January 27, 1924. *Southern Pacific Company*, Los Angeles Division—Grade crossing accident at Montecito street, Santa Barbara. One occupant of automobile killed and three others injured.
32. January 27, 1924. *Southern Pacific Company*, Los Angeles Division—Grade crossing accident at Seventh and Alameda streets, Los Angeles. One occupant of automobile killed and three others seriously injured.
33. February 3, 1924. *Pacific Electric Railway Company*, Southern Division—Collision between passenger and freight train on Whittier line. Two passengers slightly injured and equipment damage amounting to \$1,108.
34. February 4, 1924. *Pacific Electric Railway Company*, Northern Division—Grade crossing accident at Rose avenue, Glendora. Driver of automobile killed.
35. February 15, 1924. *Pacific Electric Railway Company*, Southern Division—Grade crossing accident at Celia Station. One occupant of automobile killed and two others seriously injured.
36. March 3, 1924. *Southern Pacific Company*, Los Angeles Division—Grade crossing accident at Puente. Two occupants of automobile killed and one other seriously injured.
37. March 12, 1924. *Pacific Electric Railway Company*, Eastern Division—Side-swipe collision of two freight trains at Bowden, San Bernardino line. No personal injuries, but equipment damage of \$1,377.
38. March 18, 1924. *Atchison, Topeka and Santa Fe Railway Company*, Los Angeles Division—Side-swipe collision between passenger train and locomotive belonging to contractor's outfit engaged in work on double tracking near Summit Station. One employee killed, and equipment damage of \$500.
39. March 31, 1924. *Pacific Electric Railway Company*, Western Division—Grade crossing accident near Palms on Venice Short Line. Two occupants of automobile killed.
40. April 6, 1924. *Southern Pacific Company*, Los Angeles Division—Side-swipe collision between passenger train and freight train in Class "B" yards, Los Angeles. Seven passengers and one employee slightly injured. Equipment damage, \$11,130.
41. April 7, 1924. *Pacific Electric Railway Company*, Southern Division—Grade crossing accident at Twentieth street and American avenue, Long Beach. Driver of automobile killed.
42. April 9, 1924. *Pacific Electric Railway Company*, Southern Division—Grade crossing accident at Eighth and Alameda streets, Los Angeles. Employee of Pacific Electric killed.
43. April 11, 1924. *Pacific Electric Railway Company*, Western Division—Grade crossing accident at Glenmary street, Los Angeles. Driver of automobile killed.

44. April 12, 1924. *Pacific Electric Railway Company*, Western Division—Derailment of passenger train at Glendale Tower. No personal injuries and slight damage to equipment.
45. April 28, 1924. *Southern Pacific Company*, Los Angeles Division—Grade crossing accident at Placentia boulevard, El Modena branch line. Serious injury to one, and slight injury to two other occupants of automobile.
46. April 30, 1924. *Key System Transit Company*—*Southern Pacific Company* (Oakland, Alameda, Berkeley Electric Interurban Lines)—Collision between one-man street car and electric interurban train at Ashby avenue and Adeline streets, Berkeley.
47. May 7, 1924. *Southern Pacific Company*, Los Angeles Division—*Santa Barbara and Suburban Railway Company*—Collision between one-man street car and freight train at State street crossing, Santa Barbara. Motorman of street car slightly injured.
48. May 8, 1924. *Pacific Electric Railway Company*, Southern Division—Grade crossing accident at Harperville, Santa Ana line. Driver of automobile killed.
49. May 18, 1924. *Pacific Electric Railway Company*, Southern Division—Grade crossing accident at Fullerton road, La Habra line. Two occupants of automobile killed.
50. May 28, 1924. *Southern Pacific Company*, Los Angeles Division—Derailment of freight train at Calipatria on Holtville branch. Fireman killed, equipment damage \$750.
51. June 1, 1924. *Pacific Electric Railway Company*, Western Division—Grade crossing accident at East road, near Torrance. Three occupants of automobile killed.
52. June 7, 1924. *Southern Pacific Company*, Los Angeles Division—Grade crossing accident at private road crossing near Glendale. Two occupants of automobile seriously injured.
53. June 8, 1924. *Southern Pacific Company*, Los Angeles Division—Grade crossing accident at Narod. One occupant of automobile killed, five others seriously injured.
54. June 13, 1924. *Southern Pacific Company*, Los Angeles Division, *Los Angeles Railway Corporation*—Collision between switching locomotive and street car at Mateo and Violet streets, Los Angeles. Slight damage to equipment.
55. June 29, 1924. *Pacific Electric Railway Company*, Southern Division—Derailment of freight train on La Habra line. No personal injuries, damage to equipment and overhead line construction \$1,445.
56. June 29, 1924. *Southern Pacific Company*, Los Angeles Division.—Grade crossing accident at Oxnard. One occupant of automobile killed and one injured.

FORMAL PROCEEDINGS.

The following formal proceedings affecting the matter of service were decided by the Railroad Commission during the period covered by this report:

The California, Arizona and Santa Fe Railway Company and *The Atchison, Topeka and Santa Fe Railway Company* for authority to abandon that portion of the line of railroad owned by the former and operated by the latter, extending from Goffs, California, to the California-Nevada boundary line, and being a portion of the Barnwell branch. (Decision No. 12359 on Application No. 8305, decided July 17, 1923.) Application granted.

Southern Pacific Company for authority to discontinue and abandon its passenger service between Los Angeles and Anaheim. (Decision No. 12434 on Application No. 6880, decided August 2, 1923.) On a showing that the revenue derived from passenger train operation is less than one-third the bare operating cost, and in which cost no items are included except wages of train crews, train supplies and expenses, and the further showing that other service is available for patrons heretofore using the service, application granted and discontinuance of service allowed.

Pacific Electric Railway Company for authority to abandon Wharf No. 3 at Redondo Beach. (Decision No. 12463 on Application No. 9188, decided August 7, 1923.) The term for which the wharf franchise had been granted being about to expire and applicant having been unsuccessful in its efforts to secure a new franchise or a renewal of the existing franchise, application was made for authority to abandon that the wharf might be dismantled and the material salvaged prior to the date of the expiration of the franchise. Application granted without prejudice to the filing of a supplemental application if any extension in the time of franchise should be secured from the granting authority.

San Diego Electric Railway Company for authority to discontinue service and suspend operation and take up tracks on part of its system. (Decision No. 12529 on Application No. 5009—third supplemental—decided August 23, 1923.) Applicant authorized to suspend service and abandon trackage on K street from the intersection of Sixteenth and K streets to the intersection of Twenty-fifth and K streets, all in the city of San Diego, contingent upon an extension of its Market street line being constructed and placed in operation.

San Diego Electric Railway Company for permission to abandon service over and to take up its tracks from its Imperial avenue street railway line, from Thirty-fourth street and Imperial avenue to Fortieth street and Imperial avenue in the city of San Diego. (Decision No. 12556 on Application No. 9094, decided August 29, 1923.) Applicant authorized to abandon service and to remove its tracks, poles and wires contingent upon the establishment of a motor coach service over the same route as heretofore served by street cars.

Nevada County Traction Company to abandon service and remove tracks and appurtenances on Main and Mill streets, Grass Valley. (Decision No. 12793 on Application No. 9492, decided November 5, 1923.) Application granted.

Pacific Electric Railway Company to abandon and remove station platforms and facilities on its Santa Ana line. (Decision No. 12859 on Application No. 9849, decided November 26, 1923.) Application granted.

Pacific Electric Railway Company to remove and abandon waiting station at Ocean Park, between Surf and Hill streets. (Decision No. 12986 on Application No. 9543, decided January 3, 1924.) Application granted.

Pacific Electric Railway Company to abandon and remove passenger shelter station at Bolsa Chica on its Newport line. (Decision No. 12993 on Application No. 9617, decided January 4, 1924.) Application granted.

Pacific Electric Railway Company to abandon and remove spur track in vicinity of Twentieth street and Long Beach avenue, Long Beach. (Decision No. 13045 on Application No. 9682, decided January 15, 1924.) Application granted.

Sacramento Valley and Eastern Railway Company to suspend service over its entire line from Pitt to Bully Hill. (Decision No. 13066 on Application No. 9369, decided January 21, 1924.) Application granted.

Los Angeles and Salt Lake Railroad Company to discontinue operation of mixed trains Nos. 41 and 42 upon its Glendale Branch. (Deci-

sion No. 10379 on Application No. 9699, decided January 24, 1924.) Application granted.

San Diego Electric Railway Company to discontinue and abandon certain of its street railway lines in the city of San Diego. (Decision No. 14014 on Application No. 9095, decided February 4, 1924.) Application granted.

Pacific Electric Railway Company to construct, alter and change grade of its track in the city of Newport Beach between Twenty-seventh street and a point easterly of Nineteenth street, and to abandon and remove its present main track between said points and to relocate the same. (Decision No. 13124 on Application No. 9728, decided February 8, 1924.) Application granted.

Pacific Electric Railway Company for authority to discontinue service and cancel fares on its Laurel Canyon line on Sunset boulevard from Gardner Junction to the end of the line. (Decision No. 13235 on Application No. 9357, decided March 4, 1924.) Application granted.

Pacific Electric Railway Company for authority to abandon and remove shelter station at Twenty-second street, Newport Beach. (Decision No. 13398 on Application No. 9761, decided April 11, 1924.) Application granted.

Pacific Electric Railway Company for authority to abandon and remove freight platform at Wilmington Road on its Wilmington-San Pedro line. (Decision No. 13399 on Application No. 9815, decided April 11, 1924.) Application granted.

Pacific Electric Railway Company, Southern Pacific Company and Southern Pacific Railroad Company for authority to abandon and remove spur track at intersection of Exposition boulevard and Thirty-seventh place in the city of Los Angeles. (Decision No. 13400 on Application No. 9841, decided April 11, 1924.) Application granted.

Pacific Electric Railway Company for authority to abandon and remove Naples Spur. (Decision No. 13401 on Application No. 9862, decided April 11, 1924.) Application granted.

Pacific Electric Railway Company for authority to abandon and remove tracks on East Washington street, partly within and partly without the city of Pasadena, and known as the East Washington street line. (Decision No. 13442 on Application No. 9633, decided April 21, 1924.) Application granted.

Pacific Electric Railway Company to abandon and remove spur track at intersection of Vinedo avenue and applicant's Sierra Madre line, in Los Angeles County. (Decision No. 13474 on Application No. 9880, decided April 24, 1924.) Application granted.

Southern Pacific Company for authority to abandon side track at Wintersburg, Orange County. (Decision No. 13551 on Application No. 10027, decided May 16, 1924.) Application granted.

Key System Transit Company to abandon and remove trackage in Alameda County, known as the Stauffer Chemical Company Spur. (Decision No. 13553 on Application No. 10039, decided May 16, 1924.) Application granted.

Pacific Electric Railway Company for authority to abandon and remove freight loading platform at Mountain street, Glendale, on its Glendale line. (Decision No. 13615 on Application No. 10084, decided May 28, 1924.) Application granted.

Southern Pacific Company for authority to abandon and remove its old passenger station building known as Center Street Station, San Pedro (Los Angeles City-Harbor District.) (Decision No. 13726 on Application No. 10090, decided June 20, 1924.) Application granted.

Pacific Electric Railway Company for authority to reduce its train service in order to reduce electric power consumption. (Decision No. 13747 on Application No. 10221, decided June 28, 1924.) Application granted.

Los Angeles Railway Corporation for authority to adjust its street railway service on account of power shortage. (Decision No. 13748 on Application No. 10223, decided June 28, 1924.) Application granted.

CHAPTER VII.

RATE DEPARTMENT—TRANSPORTATION,
STORAGE AND WHARFAGE.

Activities of the Rate Department during the fiscal year ending June 30, 1924, have been along the same general lines as the preceding year, but greatly increased in volume by reason of the changed commercial condition, making necessary many rate adjustments. These rate changes in many instances were not opposed by carriers, and therefore, the Commission was in a position to authorize adjustments without being required to hold prolonged, formal hearings.

The department has charge of all matters pertaining to the rates, rules and regulations of transportation carriers, which include steam railroads, electric interurban lines, street car lines, express companies and carriers by water. The department also handles all matters pertaining to wharves and to warehouses, including cold storage. The work is under the direct supervision of a rate expert, who is also a presiding examiner, assisted by four rate men and two stenographers. The number of employees in this department of the Commission has been reduced materially during the last few years. During the war, when the larger transportation companies were under jurisdiction of the federal authorities, a number of employees left the service, and, because of the reduction of the 1923-24 budget of the Commission, further reductions were necessary in the working force. As a result, at the present time the department is short-handed, and is obliged to curtail some of its former activities.

TARIFFS.

The files of the department today contain copies of every tariff and supplement thereto received since the Statute of 1909 first required utilities to publish tariffs, and to file them with the Commission. The receipt and proper indexing of these documents entails a great amount of detailed work. Each tariff must be thoroughly checked to ascertain that the provisions of the Public Utilities Act, and the Commission's regulations, have been adhered to, and every application to increase rates, or to establish rates on less than statutory notice, must be examined to determine its merits, before the rates are either authorized or rejected.

RATE CHANGES.

The Constitution of the State of California provides that no railroad or other transportation company shall raise any rate or charge for the transportation of freight or passengers, or any charge connected therewith, except upon a showing before the Railroad Commission, and authority from the Commission to publish the increased rates. Because of this provision of the state constitution, which is also written into section 63 of the Public Utilities Act, careful supervision is necessary in order that increased rates shall not be published in violation of the law. The Commission, on its informal docket, disposes of great numbers of these adjustments in situations involving typographical or clerical errors, and where it is apparent that the readjustment of

rates is necessary to put the rates on a proper basis. Were it not possible for the Commission to dispose of many of these applications informally, it would be physically impossible at formal hearings to render a full compliance with the law. As illustrative of this situation, there were issued informally during the twelve months of the last fiscal year by the Rate Department alone fifteen hundred and sixty three (1563) authorizations, divided as follows:

To publish rates on less than statutory notice of thirty days, 665.

To readjust rates bringing about increases, 552.

Establishing rates violating the long and short haul provision of the state constitution, 206.

Adjusting rates of automobile transportation companies, 140.

Since the Commission began active work in January, 1911, seventeen thousand six hundred and sixty-five (17,665) informal authorizations have been issued. A total of 1284 public utilities file their tariffs with this department as follows:

Steam railroad -----	67
Electric railways, including street railroads -----	31
Carriers by water -----	111
Express companies -----	11
Aeroplane companies -----	1
Food warehouses -----	41
Warehouses, miscellaneous -----	319
Wharves -----	33
Automotive carriers -----	670
Total -----	1284

The Commission now has in its files approximately one hundred and fifty thousand (150,000) freight and passenger tariffs of the utilities enumerated above. These files are as complete a historical record of the California rates as it was possible to obtain at the time the statute was first enacted in the year 1909, and the record since then is complete.

CARRIERS ON INLAND WATERS.

The legislature of 1923, by enactment of chapter 387, which became effective August 17, 1923, added a new section to the Public Utilities Act requiring owners of vessels desiring to operate exclusively between points on the inland waters of this state to procure a certificate of public convenience and necessity from the Railroad Commission before beginning operation. This certificate is not required of carriers who were operating vessels in good faith, and had tariffs on file with the Commission, on August 17, 1923. The enactment of this statute places additional responsibilities upon the Rate Department, and increases its duties materially for, under the Public Utilities Act, as originally constructed, certificates were not required, and any vessel desiring to perform service as a common carrier could do so by simply filing proper tariffs in conformity with the rules and regulations of the Commission.

CARRIERS OF FARM PRODUCTS.

The legislature, by the enactment of chapter 310, commonly known as the Crittenden bill, also effective August 17, 1923, exempted from regulation, and therefore took from the jurisdiction of the Commission control over the operations and charges assessed by auto trucks engaged in the movement of products or implements of husbandry and

other farm necessities from farm to farm, or between farm and loading or unloading point.

This changed the status of auto freight operations in many sections of the state materially and resulted in a tremendous amount of additional work in investigating and endeavoring to hold such farm truck operators to a strict compliance with the law; in other words, to see that they do not carry commodities other than those specified in the act, and thereby take the business at rates different from those published by regularly certified carriers, who have filed tariffs with the Commission and who, by law, are compelled to apply strictly the rates as published.

FEDERAL GUARANTY PERIOD.

It might be well here to call attention to the fact that the principal railroads in the United States passed under federal control in December, 1917, and were returned to their owners on March 1, 1920, but from March 1, 1920, until September 1, 1920, the federal government granted to the railroads a fixed rate of return. However, during the period, March 1, 1920, until September 1, 1920, no rates could be reduced without the authority of the Interstate Commerce Commission. During this federal guaranty period the Interstate Commerce Commission conducted investigations, and, in order to comply with the provisions of the Transportation Act of 1920 issued, in 1920, an order increasing all freight rates 25 per cent, and all passenger fares 20 per cent. These increases went into effect August 26, 1920.

RATE REDUCTIONS.

Because of the prosperity due to war conditions still existing at that time, the increases were not felt severely by the shipping and traveling public, but as the inflation due to war conditions began to relax it became apparent that readjustment would have to be made in transportation rates. The first decrease of importance was brought about through formal hearings in August, 1921, and resulted in substantial reductions of all live stock rates. These reductions were followed by somewhat similar reductions in January, 1922, applying to rates on grain, hay and feed. On July 1, 1922, all freight rates, which had not been reduced 10 per cent or more since the 25 per cent increase of August 26, 1920, were reduced 10 per cent. In other words, this reduction, which applied to both interstate and intrastate rates, took from the carriers one-half of the increased freight revenue authorized in August, 1920. Since this general reduction there have been further changes in rates brought about by both formal and informal proceedings, until at this time it may be safely estimated that the reductions in the gross revenue of all California carriers in the years 1923-24 will amount to from \$15,000,000 to \$20,000,000 per annum less than the gross revenue received at the peak of activities under the higher schedules of rates.

COOPERATION.

The movement to bring about cooperation in the regulation of railroads by the Interstate Commerce Commission and state railroad commissions has been discussed for a number of years, but resulted in no definite action until the year 1919, when Director General Hines issued General Order No. 58 urging upon the federal and state

commissions to cooperate upon all matters concerning rates, rules and regulations, service, distribution of equipment and investigation of accidents.

The Transportation Act of 1920 amended section 13 of the Interstate Act providing in substance that there should be joint hearings and conferences between the Interstate Commerce Commission and the state regulatory bodies with respect to rates, especially where competition existed; also that, wherever practical, joint hearings should be conducted. Following this suggestion of the law, the Commission participated in a joint hearing with the Interstate Commerce Commission in cases involving the rates on lumber between points within the State of California and in connection with the movement from points outside of California for consumption within the state. The Interstate Commerce Commission was represented by Commissioner B. H. Meyer and Examiner Joseph F. Eshelman, while President Clyde L. Seavey and Examiner W. P. Geary acted for the California Commission. This joint hearing was the first one conducted within the State of California with the Federal Commission, although representatives of the California Commission have appeared in a number of interstate cases. The instant proceeding is one of vast importance to the lumber producer and consumer within the State of California because of the many diversified situations brought about by the location of forests accessible to water transportation in competition with forests at interior points, both serving common consuming markets. More than a week's time was devoted to the taking of testimony, a large number of exhibits were filed, and the proceeding is now being briefed.

Other important proceedings where action was taken before the Interstate Commerce Commission were those involving the Pullman sleeping car surcharge, the express rates, grain and grain products rates, the Western Coal Rate Case, and the proceeding involving the interstate rates on fresh deciduous fruits forwarded in refrigerator cars from points within the State of California to destinations throughout the United States. The California Commission took an active part in all of these proceedings. In the surcharge case an order was issued eliminating the increased rate, but upon application from the interested carriers the case has been reopened for further consideration.

EXPRESS RATES.

In connection with the Express Rates Case, the California Commission actively assisted in placing all of the facts before the Interstate Commerce Commission. Assistant Rate Expert J. C. Harraman and Attorney Hugh Gordon devoted a great amount of time to the proceeding; Mr. Harraman, acting for the state commissions, was one of the presiding examiners at hearings held at all important points in the United States. Attorney Gordon made three trips to Washington, D. C., in connection with the proceedings, and, although the California Commission devoted a great deal of time, and was put to considerable expense, we feel that the results obtained entirely justified the efforts. The first decision was rendered November 10, 1923, and ordered restored on or before October 12, 1924, the commodity rates for the transportation of articles of food, which were in effect prior to October 12, 1920. This meant the elimination of the 13½ per cent increase which went

into effect on that date. The order also provided for a reduction in merchandise rates and required the express company to show cause on or before March 1, 1924, why the suggested merchandise rates should not be made effective. Supplemental orders were issued postponing the effective dates, but, finally, under date May 17, 1924, the Interstate Commerce Commission ordered that the commodity rates on foods should be made effective on June 21, 1924, and the rates became effective on that date. Another order of the same date ordered into effect a new class rate structure, to become effective January 1, 1925. These new class rates will bring about a reduction of approximately 10 per cent in the gross revenue of the express company.

It is estimated that California shippers and receivers of express matter have saved \$1,000,000 per year since 1920, when the California Commission declined to make effective on intrastate express shipments the last increase of 13½ per cent ordered into effect by the Interstate Commerce Commission.

The result of these favorable decisions will mean further substantial reductions in the charges assessed by the express company. It has been the consistent claim of the California Commission in connection with all express proceedings that the State of California is a profitable territory, and contributes a substantial return upon the property devoted to the service within the state; therefore, notwithstanding there may have been situations where the express company did not receive its full rate of return, such conditions did not justify the charging of unnecessarily high rates within the State of California to make up the deficit.

RATES ON DECIDUOUS FRUITS.

This Commission intervened, and took an active part in the action brought by the California Growers and Shippers Protective League involving the rates on deciduous fruits, in carloads, from California points to destinations throughout the United States. The proceeding was held in December, 1923, and now awaits a decision. Before the first war increases in rates the deciduous fruits had a blanket rate of \$1.15 per 100 pounds to practically all destinations outside of California. This rate was twice increased until it became \$1.92 on August 26, 1920. On January 1, 1922, it was reduced by 10 per cent, or to a rate of \$1.73. The instant proceeding is an effort to have the rate further reduced to \$1.44, or to the basis of the increase authorized by the Director-General of Railroads, effective June 25, 1918. The Interstate Commerce Commission has not yet rendered a decision, but should it reach the conclusion that \$1.44 per 100 pounds is a just and reasonable rate at the present time, the shippers of deciduous fruits in the State of California will save a total of \$5,000,000 per year.

This Commission lends itself to all interstate rate adjustments where it believes the rates are excessive and unreasonable and has been of material assistance in a number of cases. This division of its activities could be very largely increased were a greater number of men employed in the work.

CEMENT RATES.

A final settlement of the cement cases, involving the rates for transportation of cement from Davenport and San Juan to Sacramento Valley points, as compared with the rates in effect from other cement

producing mills in northern California, was reached in decision rendered in March, 1924. The Commission ordered into effect certain cement rates which reduced the differential existing between the competing mills, making the rates from Davenport and San Juan \$1.20 per ton higher than the rates from the mills located at Tolenas and Bay Point. The controversy between the four producing cement mills in northern California has been very active for a number of years and this decision of the Commission adjusts the matter, for the present at least.

LIVE STOCK RATES.

During the first six months of the year 1924, because of the unusual drought conditions, it became necessary to transfer herds of starving cattle to new feeding grounds throughout the state. To meet the situation this Commission authorized carriers to publish extremely low rates between many points, which rates will remain in effect until the emergency has passed. Also, in connection with the same situation, reduced rates were placed in effect for cattle and sheep moving unusually long distances for slaughter. These rates particularly applied to animals which heretofore under normal conditions moved alive direct to eastern markets.

OIL RATES.

During the last twelve months a number of proceedings were conducted involving the rates on fuel oil. The principal action involved oil rates from the producing points on the Sunset Railway to consuming points on the Southern Pacific and The Atchison, Topeka and Santa Fe Railway. The order made resulted in substantial reductions in the rates from these producing fields where, the testimony showed clearly, the carriers had declined to publish rates reasonable and nondiscriminatory.

SURFACE PIPE RATES.

The Madewell Manufacturing Company and Western Pipe and Steel Company brought an action against practically all railroads in the State of California, alleging that the classification and the rates assessed for the movement of iron and steel surface pipe were excessive and unreasonable, also discriminatory. The Commission, by its decision, ordered the carriers to restore the rates in effect prior to the classification changes made during the war period.

RICE RATES.

In a supplemental order issued August 7, 1923, carriers were required to pay reparation against the charges collected for the transportation of paddy rice during the period January 7, 1922, and July 1, 1922, inasmuch as they exceeded 125 per cent of the grain rates. The complainants found to be entitled to reparation were Rosenberg Bros. & Co., Growers Rice and Milling Company, C. E. Grosjean Rice Milling Company, Sacramento Valley Rice Milling Company, National Rice Mills and the California State Rice Milling Company.

JOINT ROCK MOVEMENT RATES.

Carriers were authorized, effective September 1, 1923, to publish a miscellaneous scale of rates to apply for the joint movement of crushed rock, sand and gravel between points on The Atchison, Topeka and Santa Fe, Southern Pacific, and Western Pacific lines in the territory north of Bakersfield and Santa Barbara. The rates authorized in

substance made a charge of 10 cents per ton higher than the movement for equivalent mileage in connection with a one-line haul. Prior to this order of the Commission the rates were made up of an additional charge of 20 cents per ton instead of 10 cents, or where no through commodity rates were in effect, the charge was a full combination of the local rates, which practice was very unsatisfactory and, in many situations, entirely prevented the joint movement of this commodity. In order to assist construction work being done by the Merced Irrigation District, the Commission, on October 16, 1923, authorized a reduction of 30 cents per ton in the rates on crushed rock to Exchequer, a point located on the Yosemite Valley Railroad. This rate was also permitted to go into effect on less than the usual thirty days' statutory notice in order to permit the irrigation work to continue.

SALT RATES REDUCED.

The rate on crude salt in carload lots from Trona to Bakersfield was ordered reduced from 25 to 20 cents per 100 pounds. Upon investigation it was found that the published rates in effect were excessive and discriminatory as compared with rates on the same commodity moving equal distances from other points.

SUGAR BEET RATES EXCESSIVE.

An action was brought by the Anaheim Sugar Company against The Atchison, Topeka and Santa Fe Railway and San Diego and Arizona Railway Company alleging that the rates on sugar beets, in carloads, from southern California points to complainant's factory in Anaheim were excessive and unreasonable. Reparation was sought. In this instance the carriers admitted that the tariff rates were excessive and the proceeding was adjusted without the necessity of a formal hearing.

REPARATIONS ON RETURNED CONTAINERS.

The California Packing Corporation and all of the other principal canning companies in northern California filed a proceeding against the Southern Pacific, Atchison, Topeka and Santa Fe, Northwestern Pacific, and Western Pacific alleging that the charges collected for the transportation of returned empty fruit and vegetable containers during the federal guaranty period, March 1 to August 31, 1920, were excessive and unreasonable. The proceedings were argued before the Commission *en banc*, the carriers taking the position that the California Commission had no jurisdiction to award reparation during the federal guaranty period. By its decision following this oral argument the Commission took the position that it had complete jurisdiction over the rates and charges during those six months, March 1 to August 31, 1920, and ordered that the case be continued for testimony as to the reasonableness of the rates charged. When the cases were finally heard the carriers presented no testimony, admitted that the rates charged and the amounts collected were excessive and unreasonable, but at the same time contended they could not pay reparation upon the order of the State Commission. The final order was to the effect that carriers should refund excessive charges in the sum of approximately \$30,000. The order has not been complied with, pending action in the proper civil courts.

ABSORPTION OF UNLOADING CHARGES.

The Oakland Chamber of Commerce filed a complaint against the Southern Pacific and Western Pacific alleging that the city of Oakland was discriminated against by different carriers in the matter of absorption of unloading charges on carload shipments originating in the Sacramento Valley for delivery to off-shore vessels. The complaint was based upon the fact that this unloading charge is absorbed when the transfer is made at the docks in San Francisco. After negotiations, informally, the discrimination was removed by the carriers publishing voluntarily the same absorption arrangement at Oakland as existed in San Francisco.

PASSENGER RATES.

In September, 1923, the California Supreme Court upheld the action of the Railroad Commission in fixing interurban railway fares upon a different basis from local passenger fares for street car service. This decision was in connection with litigation involving Pacific Electric Railway Company fares between Los Angeles and Pasadena, South Pasadena, Alhambra and Glendale. The decision is one of state-wide importance, as it clearly establishes for the first time the correctness of the theory used by the Railroad Commission in fixing interurban fares on a mileage basis as distinguished from local street car fares, which are fixed on the basis of the ride per passenger without regard to the distance traveled by the individual passenger within the local fare zone. The Supreme Court holds, in its decision rendered by the court *en banc*, that neither the order of the Railroad Commission nor the tariff schedule filed pursuant to the provision thereof violated the provisions of section 21, article XII of the constitution of the State of California. As pointed out by the court, in its decision, the Commission established local passenger fares, dividing Los Angeles proper into two zones and fixing a fare of 6 cents for the inner zone and 6 cents for the outer zone, with a through fare between the two zones of 10 cents. The reasonableness of these zone fares was not questioned, the court pointed out, they being fixed on the basis of the actual distance all the passengers rode, the individual passenger paying the prescribed fare regardless of the distance traveled.

The one-way fares on the interurban service were fixed upon a mileage basis to and from Los Angeles, being calculated from the Los Angeles terminal station of the company upon 2.75 cents per mile. The Supreme Court pointed out that there was a distinction between the interurban service and the local service, the interurban trains being operated on separate tracks from the local service and the interurban service being, by means of larger and heavier cars, operated at high speed with a greater number of (and more comfortable) seats than the local service provided. "It is manifest," the court observed, "that an interurban passenger who pays a fare depending upon the exact distance he rides is not in the same class of passengers as the local passenger who may ride one block or five miles for the same fare."

The case of the Railroad Commission was presented to the Supreme Court by Mr. Hugh Gordon, chief Counsel of the Commission, assisted by Mr. Carl I. Wheat.

WEEKLY PASS SYSTEM.

What is termed the weekly pass method of transportation was first put into effect in California between certain points on the Pacific Electric in August, 1922. This weekly ticket is sold at a flat rate and entitles the holder to an unlimited number of rides during the seven days' period for which it is issued. In a recent proceeding the Commission authorized the San Diego Electric Railway Company and the San Diego and Coronado Ferry Company to discontinue the sale of monthly commutation tickets between San Diego and Coronado, Ocean Beach, National City, Potash and Chula Vista. This was done upon the showing made that the weekly pass system inaugurated at San Diego January 1, 1923, had proved entirely satisfactory and had met with popular favor among car riders in that city. The testimony showed that during the year 1923, 321,547 passes were sold, bringing a total revenue of \$330,610.15. Upon these passes the purchasers made 6,697,245 trips, which represented 30.92 per cent of all passengers carried. The average revenue secured by the company from the passengers using the pass was 3.8 cents per trip. During the first three months of 1924 the weekly pass riders' trips totaled 2,557,191 as compared with 1,948,043 for the same months of the year 1923.

An advantage attaching to the use of the weekly pass is that no transfers are issued or are necessary to pass holders, eliminating the large item of expense for printing and counting, and also is responsible for a marked saving in time at transfer points. In this connection it might be stated that the Commission also authorized the San Diego lines to put into effect a similar pass at the rate of \$1 per month for the use of school children. The managers of the San Diego street car properties believe that this school children's ticket, with an unlimited number of rides during school hours will prove beneficial both to the transportation companies and the school children. It will have the advantage of not requiring transfers and thus eliminate danger and save time at transfer points.

ROUND TRIP WEEK END FARES.

During the last twelve months carriers have been authorized to publish many round trip week end passenger fares. Where these reduced round trip fares are in effect they are generally four in number, tickets sold on Friday good for return the following Tuesday, round trip rate $1\frac{1}{2}$ the one-way fare; Saturday to Monday $1\frac{1}{3}$ the one-way fare; Sunday only $1\frac{1}{10}$ the one-way fare, and the round trip with 30-day limit 90 per cent of double the one-way fare. These round trip excursion tickets are popular with the traveling public.

SCHOOL CHILDREN'S TICKETS.

Proceedings were commenced by the cities of Oakland, Berkeley and Piedmont against the Key System Transit Company alleging discrimination in the matter of school children's fares in favor of Alameda and Richmond and against the complainants. A number of formal hearings were conducted and testimony and exhibits received, but before the proceeding was finally closed and ready for decision and order the Key System Transit Company voluntarily agreed to publish school children's fares, good between all points on its lines, for school children, thus removing the existing discrimination.

PIEDMONT FARES.

The city of Piedmont and the Piedmont Civic Association filed an action against the San Francisco-Oakland Terminal Railways alleging that the one-way and commutation fares between San Francisco and the city of Piedmont, higher than the charges for like service between San Francisco and Berkeley, Oakland and other Alameda County points, were unjust and discriminatory.

After a number of hearings and the filing of many exhibits the Commission rendered its opinion declaring there was unlawful discrimination, and ordered the defendants to submit tariffs of fares, within twenty days from the date of the order, removing the discrimination found to exist. Before this order became effective the parties concerned entered into certain conferences, and stipulations were made to the effect that the proceeding would be withdrawn if the Key System constructed certain additional lines in the city of Piedmont. This construction work is now proceeding and definite action has been postponed.

IDORA PARK FARES.

Because of complaints filed, the Commission rejected certain tariffs issued by the Key System to become effective April 30, publishing a round trip fare of 36 cents from San Francisco to Oakland, including admission to Idora Park. The tariffs were rejected upon the grounds that they created discrimination as between passengers and between localities and, therefore, were in violation of the state constitution and the Public Utilities Act. The transportation company, following rejection of the tariffs, commenced a formal proceeding urging that the Commission erred in rejecting the tariffs and that the fare proposed, including free admission to Idora Park, was not in violation of the law. This proceeding is still undecided.

CHAPTER VIII.

ENGINEERING DEPARTMENT.

The extent of work handled by the Engineering Department during the last fiscal year, in so far as it has dealt with the normal regulation of utilities, has been considerably less than during the preceding year owing, primarily, to the material curtailment in the engineering staff effective at the beginning of the fiscal year. This curtailment was due to a reduction in the funds available, which caused a reduction in the staff of approximately 40 per cent. The number of proceedings handled has, however, been as great as formerly. There has been a considerable amount of work carried on under the direction of the Engineering Department in addition to the normal regulatory work, which has been paid for by parties interested. Electric line inspection, in connection with the state law requirements, has been paid for directly by the utilities and municipalities inspected. A valuation of the railway properties of the Los Angeles Railway Corporation and the Pacific Electric Railway Company within Los Angeles, which has been largely completed during the year, was carried on jointly with the companies and the city of Los Angeles. This work has been paid for by the railway companies. In addition, certain valuation work called for by formal applications of the city of Los Angeles and the city of San Francisco, in connection with condemnation proceedings before this Commission, has been charged directly, in accordance with the Public Utilities Act, to the cities making the applications.

No general changes have occurred in the methods applied to the work of the department in making valuations and service investigations, the determination of rates, or in the handling of informal complaints. It has been necessary, however, to reduce the extent of the work which would normally be carried on and certain short cuts in the determination of matters before the Commission have had to be applied in order to carry the work on with the reduced force without too great delay. Even with all changes possible being made, delays in completing work on proceedings have occurred which have been relatively expensive to the public, as reductions in rates could not be made effective as rapidly as would otherwise have been made.

In addition to the effect of the reduction in the total number of employees in the engineering staff from 71 in January, 1923, to 44 in January, 1924, a reduction of 38 per cent, the work of the department has been further affected during the fiscal year by the resignation, since January 1, 1923, of several heads of divisions and older and more experienced employees.

The form of organization, including the four divisions and general staff, reported in the previous annual report, has been continued; this organization has worked out very satisfactorily under the conditions of limited staff and has helped to offset the serious curtailment in force which has been made effective.

OUTSTANDING ACTIVITIES.

The work of the department divides itself logically into four main subdivisions handled by the four divisions of the Engineering Department. The work of the department is hereafter discussed in greater detail under the various divisions, but it appears advisable to draw attention here to the more important matters in which the department has been actively engaged.

GAS AND ELECTRIC RATES AND SERVICE.

The more important electric rate proceedings decided during the year involved the rates of the Southern California Edison Company, wherein a reduction of approximately 10 per cent was made effective in November, 1923, the rates of the Coast Valleys Gas and Electric Company, Coast Counties Gas and Electric Company, Midland Counties Public Service Corporation, and the Western States Gas and Electric Company. In all of the above proceedings, which involved the final determination of rates following the reduction of operating expenses since the period of high prices, reductions in rates and revision of schedules were made.

Reductions in steam heat rates were made during the year on the systems of the Pacific Gas and Electric Company and the Great Western Power Company and automatic rates to vary with the price of oil were put into effect. Certain reductions in gas rates were made effective on the Southern California Gas System in Redlands and San Bernardino and on the Southern Counties Gas System in Santa Monica, Venice and Long Beach. During the year certain gas rates were automatically increased as the result of an increase in the price of oil of 40 cents per barrel. This change in rates was made effective in accordance with the previous findings of the Commission as to the variation in the price of gas due to the change in the price of oil.

At the close of the year there were pending for consideration before the Commission applications for increases in rates on three of the electric companies' systems: Southern California Edison Company, Southern Sierras Power Company and Ontario Power Company. The increase in the cost of operations, which resulted in the filing of these applications, was due, primarily, to the abnormally low precipitation of the winter of 1923-1924, with the resultant reduced output of hydroelectric power and material increase in the cost from generation of power by steam plants.

WATER RATES AND SERVICE.

Work in connection with water utilities has increased over the previous year owing, in part, to the serious drought occurring and also to the activities of developments, especially in the southern part of the state. The most important rate proceeding handled involved the determination of rates of the East Bay Water Company, on complaint of the city of Berkeley. Additional work has been done in connection with the inspection of dams constructed by public utilities. Twenty-eight appraisals were made involving water companies, totaling in excess of \$24,000,000. Towards the close of the year special assignment of engineers was made in connection with the handling of the water shortage situation, which was becoming acute. Special inspections and surveys were made of water service in connection with the Berkeley fire.

TELEPHONE RATES AND SERVICE.

Special effort has been exerted in connection with the handling of telephone service matters, as has been referred to in the previous report, and, in addition, the department has been engaged in the preparation of evidence in connection with the telephone rate proceeding now before the Commission involving the telephone rates in Los Angeles and vicinity.

It is especially gratifying to note the material improvement in telephone service throughout the state during the fiscal year. In Los Angeles and vicinity, especially, an unsatisfactory service condition existed at the beginning of the year. The department, through the Telephone Division, has taken steps to require improvement of this service, which have resulted very beneficially to the public. The number of complaints received by the Commission has been reduced as a result and an analysis of the company's operating reports shows that a phenomenal improvement in service has occurred. Special attention has also been given to the matter of telephone service throughout the state and standard filings of rates have been required and rules and regulations for the various utilities have been promulgated as steps in the standardization of service. At the close of the year the department is just completing studies into the valuation of the Southern California Telephone Company, involving a property of \$50,000,000 or more, and special study of depreciation and investigations into operating expenses and rates. This proceeding is the first large telephone rate proceeding handled since the war period and involves all of the fundamental principles of telephone rate making.

GRADE CROSSING ELIMINATION.

The work of the Transportation Division in connection with grade crossing matters has increased over the preceding year. The total number of proceedings filed or reopened during the year increased from 280 for the year ending June 30, 1923, to 329 for the year ending June 30, 1924. The number pending at the end of the year has been decreased. In addition to the handling of the various grade crossing proceedings, special work has been carried on in connection with a voluntary Grade Crossing Committee organized in Los Angeles County for the consideration of grade crossing elimination. Active cooperation of this committee has been had with a view to assisting in an improvement of the serious conditions now existing in Los Angeles County. Twelve (12) grade crossing separations were ordered during the year and steps are being taken toward a greater increase in the grade separations during the coming year. A joint investigation was completed during the year by the department, in conjunction with the Board of Public Utilities and the Harbor Commission of the city of Los Angeles, with a view to the ultimate improvement of the grade crossing situation between Los Angeles and the Los Angeles harbor, and there is pending at this time a joint investigation of the traffic situation in Berkeley with a view to improving the traffic situation there. Grade crossing elimination proceedings are also pending involving the general situation in Stockton and in certain other cities. A committee somewhat similar to the Los Angeles Grade Crossing Committee has been organized in northern California and it is expected that considerable work will be

carried on during the coming year toward an improvement of the grade crossing situation in this district.

RAILROAD TERMINALS.

There has been before the department for consideration, in connection with Commission proceedings, the matter of terminal facilities of the Southern Pacific Company at Sacramento and the matter of a union terminal for the interurban lines in that city. Rearrangement of the interurban transportation arteries in Los Angeles were the subject of consideration in connection with the application for approval of a proposed tunnel from the Hill street station of the Pacific Electric Company to Glendale boulevard. An important part of the work in connection with transportation utilities has been the preparation of evidence in connection with the Los Angeles terminal and grade crossing proceeding, which was the subject of a hearing before the Interstate Commerce Commission in Los Angeles on June 19, 1924. Previous investigations were brought up to date and additional evidence prepared on this important matter.

LOS ANGELES-PACIFIC ELECTRIC RAILWAY VALUATION AND SURVEY.

A very extensive part of the work in the supervision of transportation utilities carried on under the supervision of the Engineering Department was the railroad valuation and survey of the city lines and systems of the Pacific Electric and Los Angeles Railway Companies. This investigation, which has been carried on jointly by the city, the railway companies and the Commission, has required an extensive staff of engineers and a considerable part of the time of the chief engineer, valuation engineer and transportation engineer of the Commission.

COOPERATION WITH INTERSTATE COMMERCE COMMISSION ON RAILROAD VALUATIONS.

As noted in previous reports, the Commission has assisted, in so far as possible, the Interstate Commerce Commission in connection with the valuation of the various steam roads, as provided for under the Valuation Act. Special reports have been submitted to the Interstate Commerce Commission in the form of analyses of the tentative valuations prepared by the Bureau of Valuation of that Commission and, as the result of these reports, a number of changes have been made in the valuations made by the Bureau of Valuation of the Interstate Commerce Commission, resulting in reductions of the former valuations.

VALUATION WORK.

In addition to the valuations carried on in connection with the regulatory work of the Commission, a limited amount of work has been done on the valuation of the Los Angeles Gas and Electric Corporation's electric properties involved in the condemnation proceedings filed by the city of Los Angeles. Owing to various causes, no large staff has been employed and it is possible that this work will not become active until some time in the future.

A relatively large staff of engineers has been employed during the entire year in connection with the determination of the value of the city properties of the Los Angeles Railway Corporation and the Pacific Electric Railway Company, previously referred to in connection with

the street railway survey. This involves property exceeding \$50,000,000 as a total.

Toward the close of the fiscal year work was commenced in connection with the valuation of all the electric properties of the Pacific Gas and Electric Company and Great Western Power Company in the city of San Francisco. This work is being done as a result of the application of the city and county of San Francisco for the determination of the just compensation to be paid for these properties for condemnation purposes. This work is the commencement of the largest condemnation proceeding ever held before this Commission and it is expected that the work will have to continue throughout the coming fiscal year.

A very important part of the valuation work carried on during the year has been the appraisal of lands which has involved the determination of the value of lands of upwards of \$20,000,000 in connection with the various proceedings. A special study was made of land values in the railway surveys and the union terminal proceeding before the Interstate Commerce Commission.

INFORMAL PROCEEDINGS.

Much work of employees is done in connection with matters not involving formal proceedings.

INFORMAL COMPLAINTS.

A considerable part of the work of the Engineering Department is that which is rendered directly by personal aid to the consumers of the utilities in the handling of informal complaints. Special men are assigned to this work and every assistance possible given for the ready and complete handling of the various complaints and requests for information filed by the public. This work has been of special assistance in the regulation of the utilities and the improvement of public relations between the utilities and their consumers. The utilities department of the Farm Bureau Federation has been of much assistance in the handling of complaints of agricultural consumers. It is to be said that a better spirit of cooperation is being shown by the utilities in handling these matters than ever before.

NEVADA IRRIGATION DISTRICT.

The department has been of special assistance to the Nevada Irrigation District during the year in negotiations between that district and the Pacific Gas and Electric Company for the sale for power purposes of the use of waters which the district contemplates developing in connection with its irrigation project. The contract between the parties, which was finally signed just before the close of the fiscal year, provides for the utilization of some 100,000 acre-feet of water through the power plants of the Pacific Gas and Electric Company, to be developed by the district, and the return of the water for irrigation purposes to the district at the head works of its irrigation canals.

SURVEY OF BUREAU OF POWER AND LIGHT OF THE CITY OF LOS ANGELES.

At the request of the Bureau of Power and Light and certain civic bodies of the city of Los Angeles, the Engineering Department made a special investigation into the operations of the Bureau of Power and Light in connection with the determination of the bond requirements of

that bureau for the coming three years' period. Although the Commission did not have jurisdiction over the bureau, this work was done on the informal request of the city, with a view to assisting in the solving of a very difficult and complicated problem which the bureau faced in connection with the obtaining of the necessary funds.

FEDERAL POWER COMMISSION.

Cooperation with the Federal Power Commission, in connection with the supervision of electric utilities by that Commission in California, has been continued and assistance rendered to the Power Commission in connection with the valuation of licensed properties in this state. This work is proving of benefit in the coordination of regulation by both commissions.

POWER SUPERVISION.

It has again been necessary for the Commission to appoint a power supervisor to take charge of the power situation in the state owing to the unprecedented shortage of precipitation with the resulting shortage of supply of hydro-electric power. At the close of 1920, during which year a power curtailment had been required, it appeared that, with the large developments being carried on by the electric utilities, a possible shortage in the future could hardly be expected. During the subsequent period the utilities carried on very extensive programs. The almost unprecedented shortage of precipitation during the winter of 1923-1924, however, together with the rapid growth of the southern part of the state, combined to create a condition which has resulted in a shortage of power supply for that territory. With a view to protecting the interests of various consumers, especially on the system of the Southern California Edison Company, several informal conferences were held with the utilities with a view to relieving the situation, and just before the close of the fiscal year Mr. H. G. Butlér, former power administrator for the Commission, was appointed power supervisor to take charge of the distribution of power on the systems serving southern California. Every effort is being made to reduce the necessary curtailment and it is to be said that a very acceptable spirit of cooperation is shown both by the utilities and the public during this emergency. The utilities department of the Farm Bureau Federation has rendered an invaluable service in the handling of this difficult problem. Conditions are such that, with the large additional steam capacity coming in during the latter part of 1924, this shortage should be only of temporary duration.

DEPRECIATION.

The general staff of the Engineering Department has been making special studies in connection with the question of depreciation of the various utilities. Reports have been submitted to the Interstate Commerce Commission jointly by this department and the Department of Finance and Accounts in connection with the question of depreciation of telephone and transportation utilities and, in addition, estimates of depreciation for the various utilities under the jurisdiction of this Commission have been made in connection with the numerous rate proceedings. Standardization for the handling of depreciation is being worked out along constructive lines.

In the following four chapters is set forth more in detail the activities of the Engineering Department.

CHAPTER IX.

GAS AND ELECTRIC DIVISION.

The work of the gas and electric division of the Engineering Department has not been as extensive during the fiscal year just closed as during previous years. This result follows the general curtailment in force, the stabilization of operating costs and conditions and the previous promulgation of decisions involving the rates of several of the larger utilities.

In connection with the handling of formal cases involving rates and service, no effort has been spared to ascertain all facts pertinent to the issues involved and to give appropriate consideration thereto. The routine work of the division, involving the settlement of informal complaints, the inspection of overhead electric lines and the inspection of gas service, has been carried on in the usual way.

FORMAL PROCEEDINGS.

The following tabulation enumerates, in two groups, for electric utilities and for gas, steam and oil utilities respectively, the formal decisions involving this division which have been issued during the year just passed.

FORMAL PROCEEDINGS DECIDED DURING THE FISCAL YEAR ENDING JUNE 30, 1924.

(Exclusive of proceedings which centered around the issuance of securities.)

Decision number	Proceeding number	Parties to proceeding	Date decided	Remarks
A.—ELECTRIC PROCEEDINGS.				
12482	A-4718	City of Mountain View.....	8/14/23	Value of P. G. and E. properties

13650	A-10132	Southern Counties Gas Company.....	6/ 4/24	Transfer of property

RATES.

While none of the foregoing decisions have embodied any important changes in policy, a number of them indicate definite steps in the progress of rate regulation. One of the most important of these decisions was that involving the electric rates of the Southern California Edison Company, which serves a large territory in the southern San Joaquin Valley and in southern California. This decision not only brought about a reduction in the rates charged to consumers of 10 per cent, resulting in a saving of almost \$2,000,000 per year to the consumers affected, but it allowed a slightly lower rate of return upon capital invested than has heretofore been considered reasonable. At the close of the fiscal year there is pending before the Commission an application of this company for a temporary increase in rates to offset the increased operating expenses resulting from the lowest supply of water power on record and the consequent use of unusual amounts of fuel. There is, however, no indication that, as far as the permanent basis of rates is concerned, the return allowed this company will not be sufficient to enable it to secure the funds necessary to carry on the large amount of construction called for by the rapidly increasing demands of the territory served. The fact that this company, operating in one of the most rapidly growing sections of the state, will be able to do this while earning a somewhat lower return upon its investment than has been considered possible in the past is most significant. A policy which results in a lower cost of money to the utilities must ultimately result in cheaper service to the consumers and, step by step, is proving itself to be in the interest of the general public.

During the last year decisions fixing rates to be charged for steam heating service in San Francisco have embodied the principle of automatic recognition of the effect of fluctuations in the price of fuel

oil which has heretofore proved itself successful in connection with rates for artificial gas service. The price of fuel oil is, of course, an important element in the cost of production of artificial gas and of steam heat, and one whose effect may be easily calculated in advance. The provision of rates which automatically reflect changes in the price of this commodity is, therefore, entirely feasible. This not only allows the use of *ex parte* decisions, thus reducing the number of hearings to be held by the Commission, and consequently the expense of supervision of these rates by the state, but also insures more prompt action in protecting the consumer or the utility, as the case may be, against price changes.

Practically all utilities supplying artificial or mixed gas are operating under specially designed rate structures imposed by this Commission whereby the price of gas is automatically modified by each change in the cost of fuel oil used in its manufacture. During the past fiscal year the price paid for oil by gas companies has increased a total of 40 cents per barrel. This has resulted in corresponding increases in the gas rates. Communities supplied with natural gas, as is general in the southern part of the state, have of course not been so affected.

The greatest increase thus caused amounted to 12 cents per thousand cubic feet while the average for the state was approximately 9 cents.

Inasmuch as the operation of these automatic rates has heretofore effected an average decrease of 20 cents per thousand, the present rates are still far below the peak conditions of 1921 and it is interesting to note that the increases made this year have not invoked a single protest from the public.

It is not only interesting but also gratifying to observe that the average price paid for gas in California is well below that paid in other parts of the country, the domestic rate in most communities being on an average only 25 per cent above prewar prices and that the average rate paid for all gas consumed in the state during the calendar year 1923 was only 53 cents per thousand as compared with 66 cents per thousand in 1916. It is very probable that, in spite of the early increases in manufactured gas this year, this average figure for the state will show a further decrease on account of the rapidly increasing sales of natural gas for industrial purposes at very low rates.

VALUATIONS.

The Commission has from time to time enriched its files with detail inventories, based on field count and priced out, item by item, of most of the electric utilities and many of the gas utilities operating in this state. Future rate proceedings will require the determination of new rate bases, making use of these priced inventories and a correct statement of net additions to operative fixed capital.

During the year just passed, two more important gas and electric utilities were added to the list. Complete priced inventories of operative property, both gas and electric, for the Stockton Division of Western States Gas and Electric Company were introduced in evidence by both utility and Commission. Similar exhibits were introduced for the electric properties of Midland Counties Public Service

Corporation. The following rate bases were found by the Commission on the basis of facts revealed in these exhibits.

	Utility	Rate base amount
Western States Gas and Electric Company, Stockton Division—		
Electric, 1923-----		\$6,245,345 00
Gas, 1923-----		2,331,510 00
Midland Counties Public Service Corporation—		
Electric, 1923-----		2,351,489 00

A few additional priced inventories were prepared and introduced and used in formal decisions. They were Ojai Power Company, Paul M. Doyle and Truckee Electric Light and Power Company.

The Commission's requirements at the present time do not include any priced inventories of gas or electric properties. Two valuations are under way to meet the requirements for negotiation or condemnation of the city and county of San Francisco. The properties involved are situated generally within the incorporated limits and include electrical properties only of Pacific Gas and Electric Company and Great Western Power Company. The Commission already has complete, system wide, priced inventories of both properties and used them in the important rate decisions of January, 1923. In these present proceedings the Commission is working through its general staff and has assigned a valuation engineer to cooperate with engineers of the city and of the utilities.

CURRENT WORK.

This division has recently been engaged in work on the formal proceedings of the following table. (Special problems will be discussed in another portion of this report.)

ELECTRIC AND GAS PROCEEDINGS PENDING JUNE 30, 1924.

Proceeding number	Date filed	Parties to proceeding	Remarks
A-4719	7/ 3/19	Pacific Gas and Electric Company—Town of Sunnyvale—Valuation	Dropped from calendar
A-7750	4/14/22	W. H. Samson-----	Certificate
A-8009	7/ 1/22	Pacific Gas and Electric Company—San Francisco-Oakland Terminal Railways-----	Agreement
A-8196	8/23/22	Pacific Gas and Electric Company—Turlock Irrigation District-----	Valuation
A-8464	12/ 4/22	Los Angeles Gas and Electric Corporation—City of Los Angeles-----	Valuation
A-9611	12/15/23	Coast Valleys Gas and Electric Company-----	Certificate
A-9612	12/15/23	Coast Valleys Gas and Electric Company-----	Certificate
A-9767	2/11/24	Great Western Power Company—City of San Francisco-----	Valuation
A-9768	2/11/24	Pacific Gas and Electric Company—City of San Francisco-----	Valuation
A-9882	3/14/24	San Joaquin Light and Power Corporation—Turlock Irrigation District-----	Approval of agreement
A-9926	3/27/24	Alturas Electric Power Company-----	To fix rates
A-5567	3/31/24	Pacific Gas and Electric Company—Market Street Railways-----	Supplemental application —rates
A-9995	4/19/24	Elsinore Gas Works-----	Certificate
A-9822	5/26/24	Truckee River Power Company-----	Supplemental application —rates
A-10143	6/ 4/24	Southern California Edison Company-----	To fix rates
A-10166	6/10/24	Ontario Power Company-----	To fix rates
A-10171	6/12/24	Mt. Shasta Power Corporation-----	To fix rates
A-10187	6/16/24	Southern Sierras Power Company-----	To fix rates
A-10213	6/24/24	Pacific Gas and Electric Company-----	Certificate
A-10214	6/24/24	Pacific Gas and Electric Company-----	Certificate
C-1647	8/13/21	Commission vs. Napa Valley Electric Company-----	Rates and service
C-1889	3/17/23	Modoc Development Board vs. Alturas Electric Power Company-----	Rates and service
C-1903	4/11/23	Napa County Farm Bureau vs. Napa Valley Electric Company-----	Rates and service
C-1981	2/27/24	Universal (Electric) and Gas Company vs. Pacific Gas and Electric Company-----	Billing
C-1984	3/12/24	Universal (Electric) and Gas Company vs. Great Western Power Company-----	Billing
C-1988	3/22/24	Commission vs. All Utilities-----	Power shortage
C-2013	6/ 6/24	Commission vs. Certain Utilities-----	Power shortage

The above table has been subdivided by applications and by cases, and within these two subdivisions has been arranged chronologically according to the date filed. This table furnishes a representative illustration of the manner in which the Commission's Engineering Department, as organized at present, is able to handle promptly such proceedings as are in need of immediate action. More than half of the proceedings shown have been filed no earlier than the spring and summer of this year. It may fairly be said of the first five applications that applicant is not pressing the matter. For instance, the valuation of the Pacific Gas and Electric property in the town of Sunnyvale has been dropped from the calendar. The application of W. H. Samson is being held up until applicant completes his presentation. The valuation of Los Angeles Gas and Electric Corporation for condemnation purposes by the city of Los Angeles moves at a rate determined by the city of Los Angeles. Outside of these five applications there remain but two which were filed previous to the present calendar year.

Of the cases, the decisions in connection with Napa Valley Electric Company are in process of preparation and have been delayed deliberately while matters of service received the attention of the Commission and while the utility was from time to time meeting the issues presented in the complaints. The situation has become sufficiently stabilized by this time that the decision is now in process of preparation. It is true that the emergency created by the power shortage, resulting in those preliminary studies which led up to the appointment of a power supervisor and resulting in applications for emergency increases of rates on the systems of the Southern California Edison Company and Southern Sierras Power Company, temporarily crowded from the table work on decisions in connection with Applications Nos. 9611 and 9612, and Cases Nos. 1647, 1903 and 1889.

INFORMAL COMPLAINTS.

During the year just ended this division received 1399 informal complaints and disposed of 1642, leaving 123 still pending. These do not include something over 800 protests which were given case or application numbers, miscellaneous or general order numbers, nor do they include several hundred protests, received by personal call of the complainant to the Commission, or by telephone communication from the complainant where the matter could be easily disposed of and where, in such cases, it was not made a matter of record.

This record compares with 1378 received and 1012 closed during the preceding year.

Several formal decisions now pending will automatically result in closing a large part of the gap of 123 which still exists between those received and those disposed of. Other groups have been consolidated and are being held pending the initiation of formal proceedings. Many of them are in connection with the situation in San Francisco following from the demise of Universal Gas and Electric Company. Others are in the territory of Napa Valley Electric Company, and others result from a radical standardization of agricultural schedules in the territory of the Western States Gas and Electric Company. It is reasonable to suppose that after the power administrator shoulders the work brought on by the drought and the emergency rates of

several southern electric utilities are determined and several other pending formal decisions are out, the division will be able to make the necessary studies and dispose in large groups of many complaints which are at present calling for general studies.

There follows a classification by subject matter and utilities of the informal complaints received during this fiscal year:

Subject	Utility			Total
	Gas	Electric	Steam	
Service conditions.....	192	215	3	410
Rates.....	29	64	1	94
Extensions.....	248	301	1	550
Excessive bills.....	166	177	2	345
Totals.....	635	757	7	1,399

It is to be noted that in this year, as well as in other fiscal years, complaints regarding gas and electric extensions predominate, with service condition complaints running second, excessive bill protests third, and complaints against the rates of public utilities fourth. Service condition complaints may be described as protests against any class of service rendered, while complaints against rates are usually protests against the reasonableness of the schedules which are in effect. Complaints relative to rates and service naturally inject themselves into all formal rate proceedings and have, in more than one instance, given rise to formal proceedings or to re-consideration of existing rates. Extension complaints generally result from the refusal or negligence of a utility to extend its facilities. Excessive bill complaints represent protests against the charges of a utility or the application of its rate schedules.

The following table shows the number of complaints filed during the year against each of the major gas and electric utilities under the jurisdiction of the Commission, and indicates the number of complaints each per thousand consumers:

Name of company	Number of complaints received	Number of consumers	Complaints per thousand consumers
Pacific Gas and Electric Company.....	447	685,140	.65
Los Angeles Gas and Electric Corporation.....	132	358,274	.37
Southern California Edison Company.....	127	239,878	.53
Southern Counties Gas Company.....	66	124,283	.53
Southern California Gas Company.....	52	112,495	.46
San Joaquin Light and Power Corporation.....	78	65,360	1.07
San Diego Consolidated Gas and Electric Company.....	45	76,546	.59
Western States Gas and Electric Company.....	39	47,520	.82
Great Western Power Company.....	47	46,724	1.01
Coast Counties Gas and Electric Company.....	32	20,817	1.54
Southern Sierras Power Company.....	14	10,300	1.36
Coast Valleys Gas and Electric Company.....	24	10,216	2.35
California Telephone and Light Company.....	20	6,506	3.07
Vallejo Electric Light and Power Company.....	8	4,935	1.60
California-Oregon Power Company.....	3	3,334	.90
Contra Costa Gas Company.....	10	2,806	3.60
Modesto Gas Company.....	6	2,749	2.20
All other companies.....	249		
Total.....	1,399		

For the sake of comparison these figures are again segregated between electric and gas companies.

Name of utility	Number of complaints received	Number of consumers	Complaints per thousand consumers
I.—ELECTRIC.			
Pacific Gas and Electric Company.....	243	341,450	.71
Southern California Edison Company.....	127	239,878	.53
Los Angeles Gas and Electric Corporation.....	31	89,643	.34
San Joaquin Light and Power Corporation.....	70	56,658	1.24
San Diego Consolidated Gas and Electric Company.....	33	40,717	.81
Great Western Power Company.....	47	46,724	1.01
California Telephone and Light Company.....	20	6,506	3.08
Western States Gas and Electric Company.....	25	34,206	.73
California-Oregon Power Company.....	3	3,334	.90
Coast Counties Gas and Electric Company.....	23	12,334	1.87
Coast Valleys Gas and Electric Company.....	21	6,834	3.07

It is interesting to note that of the 1642 complaints disposed of during the year, approximately 72 per cent were settled in favor of the consumers, the others being either settled in favor of the companies or subsequently withdrawn by the complainants. It is also worth while to note that during the year such matters have been handled with greater dispatch than heretofore, the average complaint being disposed of in eight or nine days' time. Of course there were numerous cases requiring personal investigation and prolonged correspondence before a settlement could be reached. A few of these complaints finally became formal matters. On the other hand, numerous others were disposed of and closed the day they were received.

In the handling of complaints arising from protested bills, \$4,928.97 was deposited by consumers and disposed of in accordance with the Commission's findings.

In addition to the complaints above tabulated, 3248 requests for information in connection with informal complaints, rate cases, general orders, applications, bond issues, etc. were received during the year; and 5694 persons called at the office of the gas and electric division for information pertaining to the same subjects. The correspondence of this division relative to formal and informal matters necessitated the writing of over 6000 letters.

It has been most gratifying to note the cooperation of the various utilities with the Commission in the handling of informal complaints, which not only results in desirable customer relations but also is very helpful to the Commission.

In a number of special instances, as well as in the customary routine, the technical staff of the Commission has proved itself of value to the consumers of the smaller utilities in the assistance that has been

given the management of these utilities in meeting the problems of operation which they are financially unable to be equipped to meet for themselves. This consulting feature of the work of the Commission's Engineering Department is one that consumes a considerable portion of the time of its men in work which, at times, is difficult to trace directly but which, on the whole, is proving of great benefit to the utility consumers of the state. Scarcely a day goes by without having either some operator of a small company or some consumer of a large or small utility call at the Commission's offices for advice and assistance in matters relating to utility operation.

SPECIAL PROBLEMS.

Overhead line inspection.

The inspection of overhead electric facilities as to compliance with chapter 499, Statutes of 1911, as amended by chapter 600, Statutes of 1915, has now been prosecuted on a large scale for a period of over two years. The first inspection of the properties of power and light utilities was completed (with the exception of two minor companies in isolated territories which, for reasons of economy, were held up awaiting a more favorable time for reaching them) about the first of 1924. This work necessitated the services of three men in the field who not only made the inspection but also undertook to educate the industry in the application of the Commission's General Order No. 64. Over a period of one and one-half years a total of 401,450 infractions of the statutes were recorded, distributed as follows:

Individuals -----	36,116
Cities -----	41,540
Utilities -----	323,794

As each property was inspected, an estimate of the time necessary to make the needed changes in construction was made and, with this estimate as a basis for its action, the Commission issued a supplemental order extending time in which the property might be brought into compliance with the statutes. It was in order then that a final inspection be made of the properties whose time extension had expired and two of the field engineers were assigned to this reinspection work. Their reports disclose the fact that a far better understanding of the statutes and Commission orders is now had by the industry in general. In the 25,551 miles covered to date by these two engineers in reinspection a total of 11,358 infractions have been recorded, the major portion of which are violations of the Commission's General Order No. 64 rather than of the statutes. This amounts to .46 infractions per mile of line inspected, as opposed to 4.82 infractions per mile of the original inspection. This figure is particularly significant when it is remembered that General Order No. 64 has been in effect but two years and that it was impossible to reach a uniform interpretation of its provisions during that short time, and that in the original inspections infractions were in some instances recorded only in one or two districts of a major utility, and the order extending time over the entire system based on this partial inspection, making it necessary for the utility itself to apply the interpretations of the Commission over the remainder of the system.

Beginning in January, 1924, a third field engineer attacked the problem of the facilities of the signal utilities, and in a total traveled

mileage of 9530 miles has recorded a total of 5877 infractions. The low average number of infractions per mile is attributable to the fact that, because of the lesser hazards found in signal work, the restrictions of the governing rules are less severe, and to the further fact that the facilities so far inspected are the property of one large utility whose construction methods are highly standardized.

It is estimated that one year will be required in which to complete the inspection of all facilities involved, but it is anticipated that the force may be curtailed to some extent before the date of completion.

The total cost of the work to date has been \$42,645, which amount has been collected from the owners of the properties inspected, in conformity with the feeling expressed by the representatives of some 400 owners of such properties who were requested to be present at the meeting. This low cost of less than \$0.43 per mile justifies the Commission's procedure in making its inspection of the facilities in a systematic, detailed manner so arranged in the order of sequence as to eliminate all needless moves from place to place.

During the course of the inspection, it has developed that the Commission's General Order No. 64 does not in certain details meet all the conditions for which it was designed. It is felt that, with the experience gained since the appearance of the order in the field, its revision may be undertaken, and it is anticipated that a committee may be called together late in 1924 for this purpose.

Production of artificial gas.

Hand in hand with the inspection of overhead line facilities, the Commission's gas engineers have carried on a systematic supervision of the production and distribution of artificial gas. This has involved frequent inspections, constant contact with the production processes and in the case of smaller and more isolated companies a virtual school of instruction in order that maximum results with corresponding minimum costs might be obtained. Very gratifying results have been thus obtained and the report of its engineers indicate that the service now being rendered to gas consumers is of a very high character.

Many refinements in apparatus and in records for the determination of service conditions are being utilized in the larger communities, at the suggestion of the Commission's staff, and the information derived therefrom is invaluable both to the Commission and to utilities maintaining them as a means of demonstrating and proving ways and means for the betterment of service. Progress in the future will consist largely of refinements and it is felt that the pioneer work in this direction has already been completed.

The tendency toward a centralization of gas manufacturing facilities, mentioned in our last annual report, is continuing. Another large gas plant has been abandoned during the year, the service which it furnished being now supplied from a larger and more efficient one and there are indications that two more plants will be abandoned during the coming year for the same reason. This tendency, when fully developed, will have a marked effect upon the rates at which artificial gas can be sold and upon the quality of service it will be possible to render. An added advantage lies in the fact that the network of transmission

mains thus brought into existence will make it possible for large numbers of persons living in rural districts to obtain the benefits of gas service.

During the year it was found necessary to reprint the Commission's Gas Service Bulletin and the opportunity was taken to incorporate into it a considerable number of revisions and additions. A considerable number of these booklets are now being used as textbooks throughout California as well as in other parts of the United States.

The Commission still maintains an active interest in the technical problems of the gas industry which are brought directly home to it through its gas engineer who is acting as chairman of the California Gas Research Council. This body is engaged in the study of the major problems confronting the California gas industry.

Power shortage.

Just as this fiscal year draws to a close the state finds itself confronted with an economic condition of a character and magnitude hitherto unsurpassed for seriousness. Throughout its entire extent, and particularly in the southern San Joaquin Valley and the adjacent mountain ranges, the precipitation and the stream flow during the winter of 1923-24 have been below any previous record. The consequent shortage of water power has brought about very serious problems for the hydro-electric utilities and their consumers, with which the Commission has naturally become greatly concerned. As the month of January and the early days of February passed with practically no rainfall, it became apparent that a serious shortage in stream flow was imminent, and that the supplies of stored water might be exhausted before relief came in the shape of winter rains and snows. Although steam plants were operated to full capacity, the level of the reservoirs continued to fall, and rains falling during March averted a disastrous situation by a matter of days. Such rain and snow as fell at this time relieved the immediate situation, but provided no storage of water in either artificial or underground reservoirs for summer and fall. As the fiscal year closes, the territory in the southern San Joaquin Valley and southern California, served by the Southern California Edison Company, is approximately 20 per cent short of its required supply of electrical energy for the remainder of the calendar year of 1924. This condition is brought about by a combination of three circumstances, outlined below, in the absence of any one of which but little difficulty would have been experienced:

In the first place the rate of growth in the demand for electricity in this territory has far exceeded any past record, the actual sales of the Edison Company in 1923 being more than 30 per cent in excess of those for 1922, and the demand of 1924 being in the neighborhood of 25 per cent in excess of that for 1923. In 1923 this company placed in operation a 100,000-horsepower hydro-electric plant and in the spring of 1925 it will have added a steam plant of similar size. Under present circumstances the last date is just one year too late. On top of these two conditions has come a year of water supply far below any previous record. In spite of the fact that every available steam plant, whether owned by the company or by private parties, has been started up and all available surplus power in other parts of the state is being trans-

mitted into this territory, the shortage will probably continue until it is relieved by heavy fall rains or by the completion of a large new steam plant about the first of the year 1925.

The situation in the northern part of the state, while serious, is not so severe. The supply of water power is exceedingly short, but it has been possible to offset this shortage by the operation of steam plants. While there has been no surplus power available for transmission to the southern part of the state, at the time of the preparation of this report there has been no necessity for curtailing the use of power by consumers in this section.

In order, however, that the situation might be met and properly cared for, especially the acute conditions manifest in the southern part of the state, the Commission found it necessary to appoint a special engineer with the title of power supervisor, whose entire time will be devoted to the allotment of the available power supply and the supervision of its distribution. It was fortunate in this regard in being able to secure the services of Mr. H. G. Butler, former power administrator for the Commission during the power shortage period of the world war and the shortage in the northern part of the state in 1920.

In the southern part of the state agricultural interests have been seriously affected by the deficiency in the supply of electric power which has been required to offset for the farmer the lack of rainfall and soil moisture. A report on this situation would not be complete without reference to the exceedingly efficient work carried on by the California Farm Bureau Federation. The existing organization of the federation lent itself admirably to the work of disseminating among the farmers knowledge of the reasons for and the extent of the restrictions in the use of power required of them, and the knowledge which its local committees possessed of the problems and requirements of the farming industry was of inestimable value in distributing the shortage with as little harmful effect as possible and in enforcing the necessary restrictions.

Mention should also be made of the splendid spirit of cooperation and community interest exhibited by many of the large industrial and commercial users of electricity, some of whom made large financial sacrifices for the benefit of less fortunate neighbors.

CHAPTER X.

HYDRAULIC DIVISION.

During the year ending June 30, 1924, the hydraulic division of the Engineering Department of the Commission has been engaged in activities similar in a general way to those of other years. These activities have consisted of technical investigations in connection with formal and informal proceedings involving rates, valuations, service matters and general regulation of water utilities, and such special problems as the investigation and inspection of plans, sites and construction work relating to dams that have been proposed or are under construction by the various utilities in the state. The shortage of last season's rainfall has caused an acute water shortage throughout the state, which has now reached serious proportions, and has resulted in many water utilities being unable to furnish adequate service to consumers. In many cases this resulted in large additions to fixed capital invested and made it impossible for the utility to continue operations under existing rate schedules. In other cases a solution was found in the consolidated operations of several utilities. A natural result was a large number of informal complaints from consumers and a large number of applications for increases in rates from the utilities. Many of the latter had to be granted. Economic conditions had already forced a number of rate increases in previous years on many of the smaller local utilities. The situation this year was so much worse that actual abandonment of service threatened in many cases and frequently consumers joined with the utilities in representing to the Commission that rate increases would prove the lesser of the two evils. Constant care was exercised to the end that no excessive increases might be granted. An unusually large proportion of the informal complaints required field studies as contrasted with office analysis.

There are in excess of 450 public utility water systems in the state which have filed their rates, rules and regulations with the Commission. These utilities range in size from those supplying a few persons to those which serve approximately 100,000 consumers, and the investment in these systems varies from a few thousand to in excess of forty million dollars.

Many of the systems which in former years reported to the Commission have either been acquired by municipalities or have been absorbed by other utilities. The number of consumers served by public utility water systems has not, however, decreased but is now larger than ever before owing to the rapid growth of the state.

During the twelve months' period decisions involving water utilities were rendered in 209 formal proceedings, and 204 formal matters were filed with the Commission. The work of the division also included the consideration and investigation of 540 informal complaints.

FORMAL PROCEEDINGS.

There follows a summary classification, by subject matter, of the formal proceedings involving water utilities which were decided during the year:

Subject	Formal applications	Formal cases	Total
Rates -----	32	4	36
Service -----	18	14	32
Service areas -----	1	3	4
Transfers of property -----	46	--	46
Certificates of public convenience -----	20	--	20
Just compensation -----	2	--	2
Easements, leases, contracts -----	5	--	5
Investigations on Commission's motion -----	--	5	5
Subtotal -----	124	26	150
Securities -----	59	--	59
Total -----	183	26	209

There follows a detailed classification of 150 formal proceedings, being those of the above table exclusive of such as centered around the issuance of securities.

FORMAL PROCEEDINGS DECIDED DURING THE FISCAL YEAR ENDING JUNE 30, 1924.

RATES.

Of the water utility rate decisions rendered during the year, the most important was the one which involved the East Bay Water Company. This proceeding was instituted by the city of Berkeley, which sought a reduction in rates. The investigation of the utility's affairs required a detailed analysis of revenues and operating expenses and the determination of a rate base which in this case exceeded \$20,000,000. The Commission's decision in this proceeding confirmed the rates in effect, which had been established in a previous decision.

Another important proceeding, which involved irrigation rates and practices, was the application of the Sutter-Butte Canal Company for an increase in rates. This proceeding was an exceedingly complicated one in that in addition to requiring a complete investigation of results of operation, it involved a consideration of various contracts for the sale of water entered into by the company with many of its consumers and land owners. The matter was further complicated by a decrease in rice acreage, and the possibilities of a water shortage during the summer, due to the deficient rainfall of the winter season. The Commission's decision denied an increase in rates, and was followed by an

application for rehearing and later by a supplemental petition by the company for an emergency rate to cover the cost of pumping and other expenses caused by a water shortage. Due to the drought condition existing over the state, the company's gravity supply was seriously depleted, making it necessary to discontinue service to some 4000 acres of rice lands and to install pumping plants to supplement its river water supply. The cost of pumping so increased the costs of operation as to impel the utility to ask for an emergency rate to cover these unforeseen and extraordinary expenditures. Hearings and decisions in the matters are still pending and further investigation by engineers of this division will be required.

VALUATIONS.

The most important appraisals and rate base determination which were made during the last year were those involving East Bay Water Company and Sutter-Butte Canal Company, mentioned above; the Beverly Hills Utilities Company, in a condemnation proceeding brought by the city of Beverly Hills, which sought to acquire the system; Hermosa-Redondo Water Company and Venice Consumers Water Company, in connection with the issuance of securities. The total of all appraisals and rate base determinations was \$24,775,351. By far the greatest part of this money is in connection with the rate case which the city of Berkeley instituted against the East Bay Water Company.

The following table indicates the classes of proceedings in connection with which valuation work had to be done:

	Class of proceeding	Amount
Rates	-----	\$23,223,775 00
Securities	-----	1,261,299 00
Fixing just compensation	-----	284,165 00
Discontinuance	-----	6,112 00
Total	-----	\$24,775,351 00

There follows a detailed table showing by individual proceedings the utilities and the amounts which were involved:

Proceeding number	Utility	Amount
Appl. 9108	The Cove Water Company-----	\$5,561 00
Appl. 9256	Navato Utilities Company-----	16,928 00
Appl. 9249	John Scarborough-----	4,886 00
Case 1894	City of Berkeley vs. East Bay Water Company-----	20,208,330 00
Appl. 9238	Southgate Gardens Water Company-----	182,029 00
Appl. 9284	R. A. Baker-----	7,045 00
Appl. 9305	J. D. Millar Realty Co. and W. T. Estep-----	10,233 00
Appl. 9066	Piru Water Company et al.-----	25,006 00
Appl. 9293	Santa Paula Water Works-----	155,311 00
Appl. 9308	Frank P. Cady and Rilla E. Cady-----	98,236 00
Appl. 9528	Hermosa-Redondo Water Company et al.-----	641,906 00
Appl. 9416	Mattie Evans Alderman-----	4,286 00
Appl. 9141	City of Beverly Hills and Beverly Hills Utilities Co.---	284,165 00
Appl. 9476	Ojai Power Company-----	27,060 00
Appl. 9507	A. Ferguson-----	3,793 00
Appl. 9478	Sutter-Butte Canal Company-----	2,067,415 00
Appl. 9551	Midland Counties Public Service Corporation-----	31,665 00
Appl. 9686	Fontana Domestic Water Company-----	48,545 00
Appl. 9844	Venice Consumers Water Company-----	570,848 00
Appl. 9913	Frank E. Laumann-----	1,480 00
Appl. 9366	L. C. Hansen (Empire Water System)-----	2,319 00
Appl. 9814	El Dorado Water Corporation-----	281,741 00
Appl. 9716	S. E. Throwell-----	25,430 00
Appl. 10038	Mary E. Lacassie-----	6,296 00
Appl. 9970	Bond and Jones Water Company-----	17,769 00
Appl. 10004	Pinedale Water Company-----	12,986 00
Appl. 10075	James B. Burdell-----	13,624 00
Appl. 9986	Olive Investment Company-----	20,458 00
Total	-----	\$24,775,351 00

SERVICE MATTERS.

In connection with service matters this division has had more than the usual number of complaints, both formal and informal, requiring investigation, and brought about principally by the unprecedented drought which has existed during the past season throughout the state. This phase of the work will be further discussed under water shortage.

Investigations have also been made in connection with applications for discontinuance of service which have an important bearing on the communities affected. It has been the policy of the Commission to insist on a thorough investigation before authorizing a discontinuance of service, in order that the public may be fully protected and not be deprived of an adequate water supply. Applications for transfer of water systems are also very carefully investigated before authority is granted to transfer in order that the community affected will be benefited or at least not affected adversely by the change in ownership. During the year 18 decisions authorizing discontinuance of service and 46 decisions authorizing transfers of public utility water systems have been rendered by the Commission.

Among other service matters handled by this division was the testing of the measuring devices on the ditches of the Excelsior Water and Power Company, in cooperation with the California Farm Bureau Federation. This investigation was brought about on complaint of several consumers who questioned the quantities of water delivered and requested that the measuring boxes be tested. The tests were made in the field and occupied several days' time. The results showed that the consumers were receiving in practically all instances the quantities of water paid for, and that the measuring boxes were in general properly designed, constructed and installed.

Another service matter of considerable importance to certain consumers was the investigation into the practices of some utilities which were requiring consumers to pay the expense of changes in service pipes on their properties in instances where the utility had moved its mains from a location in the streets to a new location in alleys. The investigation resulted in the discontinuance of this practice by these utilities and will further result in many refunds to the consumers.

In addition to the matters decided by the Commission, this division has been engaged in the following important investigations in formal matters, the results of which have not yet reached the stage of submission and decision:

Rates of the San Jose Water Works, which have required a complete investigation of the company's physical properties and of the results of operation. An appraisal of these properties is being prepared, and final hearings are yet to be held in this proceeding;

Investigation by the Commission on its own motion of the rates and facilities of the East Bay Water Company, in connection with the water supply furnished to the east bay cities for municipal purposes. This proceeding was brought by the Commission to assist the east bay cities in obtaining large-sized mains for increased fire protection. The expenditure for the proposed installation amounts to about two million dollars. Final decision in this proceeding is pending.

INFORMAL COMPLAINTS.

There follows a summary classification, by subject matter, of the informal complaints involving water utilities which were handled by the Hydraulic Division during the year ending June 30, 1924:

Service	223
Installations, extensions and cancellations.....	102
Rates	53
Disputed bills.....	118
Refunds	12
Loss, damage and shortage.....	3
Deposits and deposit refunds.....	21
Rules, regulations.....	5
Competition	1
Violation of law.....	1
Right of way and franchises.....	1
Total.....	540

These informal complaints often required a field investigation by one of the division's engineers in order that the Commission might be informed of all the facts connected with the complaint. Very often such an investigation resulted in a solution of the problem, and prevented the filing of a formal complaint. The foregoing list well indicates the variety of matters which were informally considered and decided.

SPECIAL PROBLEMS.

Supervision of dam construction.

In accordance with the Commission's General Order No. 50, which provides for the approval of plans and specifications of all dams whose construction is contemplated by utilities of the state, the engineers of this division have checked the plans of many dams of various types and have made the necessary field inspection of the foundations and of the construction of the dams themselves.

The following table shows the type of dam proposed to be constructed, the utility planning to make the installation, and the work done by the engineers of this division in connection with the project:

<i>Type of Dam and Name of Utility.</i>	<i>Nature of Work Done.</i>
Hydraulic fill dam for Great Western Power Company at Butt Creek.	Checked plans, inspected foundations and also the completed dam.
Rock filled dam at Florence Lake for Southern California Edison Company.	Checked plans and inspected dam site.
Concrete multiple-arch dam at Florence Lake for Southern California Edison Company.	Checked plans and inspected dam site.
El Dorado Water Company's Weber Creek dam.	Inspected construction.
Central Mendocino Power Company's dam near Willits.	Checked plans and inspected dam site.
Raising Lake Hemet dam.	Checked plans, inspected the construction and completion of additions to dam.
Proposed earth-filled dam, Coronado Water Company.	Checked plans and inspected dam site.
Scott dam of Snow Mountain Water and Power Company.	Inspection of completion of addition to dam.
East Bay Water Company—proposed Upper San Leandro Reservoir.	Checked plans and inspected dam site.
Dam for Pit River No. 3 Development of Mount Shasta Power Corporation.	Checked plans and inspected site and foundations.

Water shortage.

Due to the unusual drought conditions which have existed generally throughout the state and which have caused a shortage of water for irrigation, domestic supply and power purposes, it was necessary for this division to make a study of the water supplies of those companies which are located in the areas most seriously affected. In certain southern counties the inadequate rainfall, combined with a shortage of power for pumping, has resulted in a temporary discontinuance of supply by some of the smaller companies, and a marked decrease in supply of others. This reduction in water production has made it necessary for the consumers to reduce consumption to a minimum and to impose certain restrictions on their use of water.

In order that uniform regulations might be followed in controlling the situation, the division prepared and submitted to the Commission a draft of a proposed general order which was directed to the companies operating in Los Angeles and Orange counties. This order requires the companies to conform to the rulings of the power supervisor as to power use, and also requires the companies to inform their consumers of the situation and to limit their water use in accordance with certain emergency rules. This order was approved by the Commission shortly after the close of the fiscal year.

Other special problems.

This division also made a report to the Commission on the disastrous conflagration which devastated a considerable portion of the city of Berkeley in September, 1923. This investigation covered an unusually comprehensive inspection of the area burned over, a study of the water facilities serving the district, and the general conditions as to water supply obtaining during and preceding the fire. The report also included certain conclusions as to ways and means of preventing a recurrence of the disaster.

CHAPTER XI.

TELEPHONE AND TELEGRAPH DIVISION.

The work of the Telephone and Telegraph Division for the year ending June 30, 1924, has included investigations in connection with formal proceedings, informal complaints and inductive interference. Studies have been made on the Commission's own initiative into the adequacy of service of the various utilities throughout the state. A great deal of time has been devoted to the study and investigation of telephone service in Los Angeles, Santa Monica, Long Beach, San Francisco and the east bay cities. In order that the Commission might be fully informed regarding the actual conditions which are experienced by the subscribers, and further, that the public might be advised of the work which the Commission has done in the past and is planning to do in the future, numerous public meetings and conferences have been held, at which members of the division have given talks and discussed telephone conditions and utility operation.

There are at present approximately two hundred telephone and telegraph utilities operating within California and under the jurisdiction of the Railroad Commission. Aside from a few large communication utilities which serve the more important cities of California, there are many small utilities which serve the towns and communities in outlying sparsely settled and scattered territories. On account of the conditions under which many of these small utilities are operating, the division has frequently been called upon by them and their subscribers to render advice and assistance.

In connection with the continual investigation by this department of the adequacy of the service rendered by the utilities throughout this state, a complete set of rules and regulations governing the operations of telephone utilities has been compiled, and the Commission has given directions to the various utilities that these rules and regulations be filed by them. The larger utilities, which serve the majority of the telephone subscribers within California, have already placed these rules and regulations in effect, and this has resulted in a marked improvement in the service of these utilities.

FORMAL PROCEEDINGS.

During the past year, various telephone and telegraph utilities throughout the state have filed applications with this Commission involving the sale and transfer of property, certificates of public convenience and necessity, increases in rates, and abandonment of service. Several formal complaints have also been filed against various telephone utilities relative to service matters and exchange boundaries, and the Commission has instituted several proceedings involving telephone and telegraph utilities. There were filed during the year a total of thirty-four formal proceedings and there were rendered fifty formal decisions involving telephone and telegraph matters, exclusive of those which centered around the issuance of securities.

There follows a summary classification, by subject matter, of 37 applications and 13 complaints which were disposed of by formal decision during the year:

Subject	Disposition			Total
	Granted	Denied	Dismissed	
<i>Applications--</i>				
Rate fixing-----	7	1	1	9
Sale of property-----	9	--	--	9
Establishing telephone service-----	7	--	--	7
Establishing telegraph service-----	--	2	1	3
Abandonment of telephone service-----	1	--	--	1
Filing rules and regulations-----	3	--	--	3
Certificate of public convenience and necessity-----	5	--	--	5
Total applications-----	32	3	2	37
<i>Cases--</i>				
Establishing service-----	1	2	3	6
Service complaints-----	--	--	2	2
Rates -----	1	--	4	5
Total cases-----	2	2	9	13
Total applications and cases-----	34	5	11	50

There follows a detailed classification of the fifty formal proceedings involving telephone and telegraph matters, exclusive of those which centered around the issuance of securities, which were decided during the year:

FORMAL PROCEEDINGS DECIDED DURING FISCAL YEAR ENDING JUNE 30, 1924.

(Exclusive of proceedings which centered around the issuance of securities.)

Decision number	Proceeding number	Parties to proceeding	Territory affected	Date decided	Remarks
12336	A-8825	Peirano and Stephens	Angels Camp	July 13, 1923	Transfer.

LEGEND:

- A=Application.

A=Application denied.

Abandonment=A abandonment of service.

Dismissed=Proceeding dismissed.

C=Case.

Filing=Authority to file rates, rules and regulations.

Certificate=Certificate of public convenience and necessity.

Increase=Increase in rates.

Decrease=Decrease in rates.

Transfe.=Transfer of property

Among these proceedings are a number involving fundamental principles and matters of considerable importance. A brief discussion of the more important of these follows:

1. Rates.

(a) *Western Union Telegraph Company.*

Application No. 7133; Decision No. 12876; November 28, 1923.

This is a proceeding in which the Western Union Telegraph Company requested this Commission to grant certain increase in its rates applicable to service furnished to newspapers. The grounds upon which this application was made were, in general, that certain other states had granted or authorized such increases; and also that its rates throughout the country might be uniform. The Commission, in its decision in this matter, found that the question of uniformity of rates alone was not sufficient reason for granting an increase, and that unless applicant could definitely show that its present rates were discriminatory or unreasonable, no increase would be granted.

(b) *Southern California Telephone Company.*

1. Application No. 8145; Decision No. 12733; October 22, 1923.

This is a proceeding filed by the city of Los Angeles, requesting this Commission to decrease the rates in Los Angeles on account of the service rendered by the company. The Commission, in its decision, stated that the rates now in effect were fixed to return to the Southern California Telephone Company a reasonable return, but that actual application of these rates has resulted in a return not in excess of two per cent.

The Commission also stated that it had found the service to be below normal and that under existing conditions, subscribers were given an inadequate service and the company was receiving an inadequate return. The decision further stated that the company was being penalized for the present inadequate service by rates which permitted it to earn a sum which is far below what is generally held to be a fair return, and in view of these facts, a reduction could not be justified either in law or in equity. In view of the service being rendered, the Commission felt that those subscribers who were not receiving reasonable or adequate service should be given an allowance for the service which they did not receive. Accordingly, a rule covering credit allowance was established, granting to the subscribers an allowance of twenty per cent of the monthly bill for each day of out-of-service.

The decision also stated that until the company was in a position to render a normally efficient service it should not expect to receive a full or even an approximately adequate return.

2. Application No. 8145; Decision No. 13478; April 24, 1924.

Following the issuance of Decision No. 12733, the Commission continued the investigation of service conditions in Los Angeles, and on April 24, 1924, issued a supplemental order in Application No. 8145, requiring Southern California Telephone Company to place in effect rules and regulations governing its practices and operations. These rules also covered matters not heretofore included in rules and regulations, such as line extensions, responsibility of subscriber for service over his telephone, credit allowance, priority of service applications,

and directory listings. These rules and regulations are more fully discussed under "Rules and Regulations."

2. Valuations.

A number of proceedings decided during the past fiscal year have necessitated the valuation of various utilities' properties. Valuations have been made in connection with the properties of the following utilities:

(a) *Huntington Beach Telephone Company.*

Application No. 8761; Decision No. 12382; July 21, 1923.

In connection with its Application No. 8761, for an increase in rates, Huntington Beach Telephone Company submitted to the Commission an appraisal of its properties as of September 30, 1922. This valuation, including intangible capital, amounted to \$59,629. A check of the company's properties was made as of the same date by the Telephone Division and showed \$56,339, less intangible capital. This valuation was brought up to date and as of June 30, 1923, amounted to \$73,508.

(b) *Red Hill Telephone Company.*

Application No. 9459; Decision No. 12946; December 21, 1923.

A valuation of the properties of the Red Hill Telephone Company was made by this division in connection with the company's Application No. 9459, for an increase in rates. A valuation of the company's properties as of November 30, 1923, amounted to \$1,335.

(c) *Laguna Beach Telephone Company.*

Application No. 9264; Decision No. 13123; February 8, 1924.

In connection with the application of the Laguna Beach Telephone Company for the purchase of the telephone properties of The Yoch Company, this division made a valuation as of January 1, 1924, which amounted to \$13,231.

(d) *Associated Telephone Company.*

Application No. 9823; Decision No. 13385; April 7, 1924.

In its Application No. 9823, Associated Telephone Company requested authority for the sale of certain real property in the city of San Bernardino. A land appraisal made by and reported on under general staff valued the land in question at \$125,000.

(e) *Southern California Telephone Company.*

Application No. 9648 (Still Pending).

In connection with the application of the Southern California Telephone Company for the establishment of measured service and exchange areas, this Commission is making a check of the valuation of the telephone properties of the Southern California Telephone Company.

The actual performance appraisal, submitted by the Southern California Telephone Company, of its properties, as of June 30, 1923, amounted to \$47,306,485. This figure is, at the present time, being checked by the general staff and will be brought up to date as of June 30, 1924.

3. Service.

The more important proceedings which were decided during the past year and which involved the matter of service, are as follows:

(a) *Honey Lake Valley Mutual Telephone Company.*

Application No. 9379; Decision No. 12997; January 9, 1924.

This is a proceeding of particular interest, as it shows the demand and need for telephone service. In September, 1923, the Honey Lake Valley Mutual Telephone Company applied to this Commission for authority to abandon utility service. In the hearing in this matter, it developed that the subscribers were unwilling to pay any increase in rates and that they would rather see telephone service ordered out than pay an increase. For these reasons, and also due to the fact that the company could not make operating expenses under existing rates, this company was allowed to discontinue operations as a public utility, on and after March 1, 1924.

In May, 1924, about three months after this company had discontinued service, the same utility applied to this Commission for authority to again start utility operations. Its application was based upon the request of practically all of its former subscribers, who now voluntarily appeared before this Commission, stating that they would pay such rates as would be necessary to give the applicant cost of operation and a reasonable return, provided, that applicant would render telephone service; and further, that telephone service was a necessity and that they were inconvenienced by the lack of this service.

(b) *Laguna Beach Telephone Company.*

Application No. 9264; Decision No. 13123; February 8, 1924.

This is a proceeding in which the Laguna Beach Telephone Company applied to this Commission for a certificate of public convenience and necessity, to commence operation as a utility in Laguna Beach. From an investigation of this matter, it was found that Laguna Beach Telephone Company had actually started operating prior to its application to the Commission and that it was rendering telephone service and charging rates for the same without authority. This Commission, in its decision, stated that authority to commence operation as a utility would be granted upon the condition that all moneys theretofore collected would be returned to those who made such payments. Such payments were returned by the company and it was then allowed to commence operations as a utility.

4. Formal Proceedings Pending.

At the end of the fiscal year ending June 30, 1924, there were pending before this Commission, fifteen proceedings involving telephone and telegraph matters, exclusive of stock and bond proceedings. Among the more important of these proceedings are the following:

(a) *Case No. 1354—Commission vs. The Pacific Telephone and Telegraph Company.*

This proceeding, which was instituted by the Commission on August 1, 1919, required that an investigation be made to determine the reasonableness of all rates, rules and regulations of The Pacific Telephone and Telegraph Company within the State of California. A preliminary hearing was held on August 15, 1919.

This matter is one which will involve the valuation of the entire properties of The Pacific Telephone and Telegraph Company throughout the State of California; and also, extensive investigations and studies of operating revenues and expenses of that company. This proceeding is being held up on account of the lack of engineers to carry on the vast amount of work necessary for such an investigation.

(b) *Case No. 1362—Postal Telegraph-Cable Company vs. Pacific Gas and Electric Company.*

This proceeding, in which the Postal Telegraph-Cable Company requests relief from interference due to the close proximity of the power lines of the Pacific Gas and Electric Company, has been set for further hearing.

(c) *Application No. 9648—Southern California Telephone Company.*

This is an application filed December 29, 1923, by the Southern California Telephone Company, in which request is made for the establishment of certain exchange areas and the establishment of measured rates for business and hotel service. A number of hearings have been held in this matter and a preliminary Decision No. 13624 was rendered May 28, 1924, authorizing the company to establish an exchange area at Montebello on or before August 1, 1924.

This proceeding has involved a great amount of work on the part of the Telephone Division and also of the general staff during the past six months on studies in connection with service conditions, operating revenues and expenses and fixed capital.

This proceeding has aroused a great deal of public sentiment, and many local clubs, organizations and associations, as well as outlying small towns and communities, are displaying considerable interest.

This proceeding is still pending, with other hearings to be held in the future, and will occupy a great deal of this division's time during the balance of this year.

INFORMAL COMPLAINTS.

During the early part of the past fiscal year, as in the whole of the preceding year, some of the telephone utilities of the state experienced considerable difficulty in supplying the demand for telephone service. This condition was the direct result of the rapid growth of population in this state, and especially in its southern part. This growth has been also reflected in a large number of informal complaints to this Commission.

During the fiscal year ending June 30, 1924, approximately 3800 informal complaints were received, of which 74.2 per cent originated in Los Angeles. As a result of the investigations made by this division, 3952 complaints were disposed of during the year. Of these approximately 96.6 per cent have been favorable to the complainant.

There follows a summary classification, by subject matter, of the informal complaints which were filed and those which were disposed of during the past year:

Subject	Number of complaints	
	Filed	Disposed of
Delayed installation-----	2,395	2,466
Service -----	1,146	1,128
Rates -----	48	39
Disputed accounts-----	192	192
Miscellaneous -----	37	127
Totals-----	3,818	3,952

As a result of the continued service investigations carried on in Los Angeles, conditions in that city have materially improved over those existing during the early part of the past fiscal year. This has had a decided effect upon the number of informal complaints to the Commission. It is interesting to note that the number of informal complaints received per month, relative to service in Los Angeles, has dropped from over 350 per month during October, 1923, to an average of 160 per month for the three months prior to July, 1924. Owing to service investigations carried on in the various parts of the state, the informal complaints received from the balance of the state, outside of Los Angeles, have likewise decreased. In October, 1923, these complaints totaled 120 and have dropped to an average of 60 per month for the last three months prior to July, 1924. These figures indicate, in general, the degree to which service has improved throughout the state.

These complaints have been largely in connection with delayed installations, service, and disputed accounts, together with others relative to changes in primary rate area and exchange area boundaries. The disposition of complaints of this nature involves investigation and study, and oftentimes necessitates investigations in the field. In almost every case of this kind, the division has been able to obtain a decision satisfactory to the complainant.

Due to the great amount of work to be taken care of, the division has had to depend upon informal complaints to keep it advised regarding general service conditions throughout the state. The work in connection with these informal complaints, together with the formal and other work of the division, during the past fiscal year, has necessitated the writing of 8350 letters and the compilation of some 275 memorandums and reports.

SPECIAL PROBLEMS.

1. Los Angeles situation.

The telephone situation in Los Angeles has, in the annual reports heretofore submitted, been the subject of considerable comment and discussion. Since the last report on this matter, important changes have taken place in Los Angeles, affecting the service furnished.

The duplication resulting from the consolidation of the former Pacific Telephone and Telegraph Company and the Home Telephone Company has been practically eliminated, and the last major construction program involving the rearrangement of existing plant, that of the installation of the call indicator system, has been completed.

During the war period, the company was unable to keep up with its construction program due to inability to obtain sufficient materials, and then following the war period, Los Angeles experienced a very rapid increase in population, with a corresponding accelerated building program; all of which resulted in an increased demand for telephone service. In addition to this, the company's construction program called for the abandonment of the former three-wire equipment, to be replaced by more up-to-date equipment; the changing of operating equipment from five-digit number to six-digit number; and the establishment of the call indicator system. With the call indicator equipment, it is possible for a subscriber with an automatic telephone to call directly, without the aid of any operator, subscribers of either automatic or manual instruments. The making of such changes had to be carried

on while the system was in operation, which further added to the difficulties. The program involving these changes has been completed and, as a result, service, particularly in the last six months, has very rapidly improved. The number of held orders has been reduced from approximately 24,000 to approximately 13,000, which includes 1000 orders on account of subscribers' buildings not being ready for telephone installations, and 5000 orders in process of installation. This results in a total of approximately 7000 orders held for other reasons.

The trouble experienced in connection with the operation of the plant has been reduced 88 per cent of that which existed during the latter part of 1923.

The company estimates that within the next five years it will add to its system 250,000 telephones in addition to those existing at the present time. This telephone development anticipates a population for Los Angeles of 1,700,000 for the year 1929. Expenditures made by the company during the past year for additional telephone plant, have amounted to approximately \$15,000,000. The company anticipates that similar expenditures for the year 1924 will amount to \$19,000,000.

2. Rules and regulations.

Following the order of the Commission requiring Southern California Telephone Company to file rules and regulations governing the furnishing and rendering of service, The Pacific Telephone and Telegraph Company, together with a number of other utilities, filed identical rules, except for such changes as were necessary on account of different operating conditions, governing their operations. These rules and regulations, designed by the Commission, set forth very definitely the practices which a utility shall follow in furnishing telephone service, together with the rights of the utility and subscriber in connection with telephone operation. The more important rules, particularly from the standpoint of the subscriber, are those involving line extension, credit allowances, subscriber's responsibility for the use of his telephone, and directory listings. A brief discussion of these more important rules and regulations follows:

a. *Line extension.*

Complaints are frequently received by this Commission involving the matter of line extensions. In the past, it has been necessary for this Commission to secure an estimate of the cost of labor and materials required to make the extension, and then to determine the portion of this cost to be advanced by the applicant. This practice, however, did not prove to be the most satisfactory, and in promulgating this set of rules and regulations, a rule has been included to cover this condition. There is now established a uniform practice to be followed in connection with line extensions.

This rule and regulation provides that all line extensions necessary to render telephone service within the primary rate area will be made by the company without cost to the subscriber and that outside the primary rate area, the company will make extensions to existing plant for a distance of 750 feet for each subscriber to be served by that extension. For extensions in excess of 750 feet per subscriber, the applicant will advance to the company an amount at the rate of \$1 for each 100 feet of such excess.

The application of this rule has worked very satisfactorily and will eliminate a majority of the difficulties which have heretofore existed in connection with extension of service.

b. *Priority of service applications.*

In order to eliminate so far as possible any discrimination in the order of completion of applications for telephone service, and to establish a definite method of procedure to govern such completion, a rule and regulation has been formulated to cover this situation.

This rule provides that service applications shall be completed in accordance with the chronological order of their receipt, and sets forth the conditions under which deviations from this order may be made, and definitely establishes the priority of one class of orders over another, in the event of deviation.

c. *Credit allowance.*

A fundamental principle of regulation requiring that a subscriber pay only for that service which has been rendered, and that a utility when it fails to render a service must either not charge for the service not rendered or must make refund covering that service not rendered in those cases where payments are made in advance, is set forth under this rule on "credit allowance."

This rule provides that in all cases where a telephone is out of service, except when such out of service is due to the fault of the subscriber, for a period of one day or more from the time the fact is reported by the subscriber or detected by the company, the company will allow the subscriber an amount based on the time of such out of service period.

d. *Subscriber's responsibility for use of his telephone.*

This rule and regulation provides that a subscriber to a telephone is responsible for all charges made for calls from that particular telephone. The rule further provides that subscribers' service may not be discontinued for failure to pay any charge for telephone service until after proper notice from the company is given, and further provides that in case of any question or dispute regarding the correct amount of the bill, the service may not arbitrarily be discontinued. In such a case, if the dispute can not be adjusted with mutual satisfaction, the subscriber may then deposit with the Railroad Commission the amount claimed by the company to be due, at which time, the Commission will make an investigation to determine the proper amount.

The rule further goes into the subject of nonpayment of a bill for service at a previous location, when corrected bills for past service may be rendered, unsafe apparatus, abuse or fraud, noncompliance with the company's rules, subscriber about to vacate premises, service not to be immediately used, and abusive language by subscribers.

e. *Directory listing.*

Included in these revised rules and regulations is a rule which very definitely sets forth the practices to be followed in connection with listings in the telephone directory.

In the past, the telephone utilities, in general, have had in effect a rule which stated that the telephone company was not liable for errors or omissions in the listing of its subscribers in the telephone directory. In order to correct this condition and to afford the subscribers protec-

tion in this matter, a new rule has been formulated and included in this set of rules and regulations which provides that the company is liable for errors or omissions in the listing of its subscribers in the telephone directory to an amount not in excess of the charge for that exchange service during the effective life of the directory in which the error or omission is made.

3. General Order No. 68.

General Order No. 68, effective July 1, 1923, required that each telephone and telegraph utility file a complete schedule of rates, rules and regulations governing service rendered by that utility. Although not all of the utilities have to date filed schedules in accordance with the provisions of this order, yet during the year ending June 30, 1924, this division has accepted for filing over 12,000 rate sheets. During this same period 166 special permissions have been issued authorizing the establishment or discontinuance of exchanges, toll and telegraph stations throughout the State of California.

4. Inductive interference.

In August 1918, this Commission issued its General Order No. 52, setting forth rules and regulations governing the construction and operation of power and communication circuits for the prevention and mitigation of inductive interference. This order provides that power and communication utilities, proposing to construct lines which are in any way involved in a parallel, or which will result in the creation of inductive interference, shall file reports covering the same with this Commission. To date 478 of these reports have been filed with this Commission of which 84 were received during the past fiscal year.

This work is for the most part of an informal nature; however, one formal complaint has been filed with this Commission by the Postal Telegraph-Cable Company—Case No. 1362—relative to induction experienced in its circuits owing to the close proximity of the power circuits of the Pacific Gas and Electric Company.

The order in this matter, which was issued July 14, 1923, provided that the complaint in so far as it requested the payment of damages or for the costs, disbursements and expenses of this proceeding necessarily incurred by the complainant, be dismissed. The order further provided that all utilities operating either power or communication circuits within the parallel therein considered, be called by the Commission's Engineering Department for the purpose of promulgating plans for the relocation of the circuits between Davis and Elmira, and in the vicinity of the town of Vandeen, and that the proceeding be reopened and set for hearing for the consideration of evidence relative to the plans for the relocation of the circuits within this parallel, and the division of cost resulting from such changes. The informal hearing has been held and the matter set for further hearing, which will be held on July 7, 1924.

TELEPHONE STATISTICS.

It is interesting to note the different degree to which the telephone is used throughout the United States, and also throughout other countries. There is a very definite relation between the development of a particular country and the degree to which the telephone is used in that country.

From a study of the telephone development of the world, it is found that the United States not only has the greatest number of telephones

in use, but also ranks highest in the number of telephones per capita. At the present time approximately sixty-three per cent of the total number of telephones in use in the world are located within the United States, and twenty-five per cent in Europe. The remaining twelve per cent of the world's telephones are distributed throughout countries other than the United States and Europe.

The following table shows the telephone development throughout the world, as of January 1, 1922:

TELEPHONE DEVELOPMENT OF THE WORLD.

	Number of telephones	
	Per cent of total in world	Per 1000 population
NORTH AMERICA—

Total world.....	100.00	13

NOTE.—Development as of January, 1922.

From the above table, it will be observed that as of January 1, 1922, the telephone development of the United States showed 127 telephones per 1000 population. Statistics which are available for 1924 show

that to date this figure has increased to 132 per 1000 population. Although Canada possesses only a little over four per cent of the world's telephones, yet it ranks second to the United States in the ratio of number of telephones to its population.

It is interesting to note that the use of the telephone in Europe has increased from 1 telephone per 1000 population in 1880 to 12 telephones per 1000 population in 1924; while in the United States, within the same period, the increase has been from 2 telephones to 132 per 1000 population. The telephone development on a per capita basis from 1880 to date is as shown in the following table:

TELEPHONE DEVELOPMENT IN UNITED STATES AND EUROPE, 1880 TO 1924.

Year	Telephones per 1000 population	
	Europe	United States
1880	1	2
1890	2	4
1900	3	11
1910	7	78
1920	10	121
1924	12	132

The definite relation between the development of a particular country and the degree to which the telephone is used in that country is perhaps more effectively shown in connection with the development of certain large cities.

San Francisco, a most progressive city, has a record of 250 telephones per 1000 population. In Los Angeles, which city has experienced a phenomenal growth during the past several years, the rate of telephones per 1000 population is 225. Telephone installations in Los Angeles, during the last two or three years, have not been completed in accordance with the demand for service owing to lack of available facilities. As this condition is now being relieved, Los Angeles will, no doubt, show a decided increase in number of telephone stations and number of telephones per 1000 population for the coming year.

The telephone development of the larger cities of the United States follows:

TELEPHONE DEVELOPMENT OF LARGER CITIES OF UNITED STATES.

City	Stations per 1000 population
Atlantic City	337
Omaha	280
Des Moines	260
Pasadena	259
San Francisco	252
Wichita	248
Minneapolis	242
Portland (Oregon)	241
Sacramento	240
Spokane	234
San Diego	230
Denver	230
Washington	228
Los Angeles	227
Topeka	227
Seattle	225
Davenport	225
Tulsa	224
Portland (Maine)	224
Chicago	223
Dallas	220
Duluth	218
Columbus	218
Oklahoma City	216
Boston	209
Peoria	208
Salt Lake City	204
Albany	203
Springfield	203
Houston	202
Indianapolis	200

The following table has been compiled to show the number of telephones per 1000 population of various large cities outside the United States. It will be observed that of all these cities, Toronto, Canada, with 178 telephones per 1000 population has the largest number of telephones per capita.

City	No. of telephones per 1000 population	City	No. of telephones per 1000 population
Toronto -----	178	Amsterdam -----	48
Copenhagen -----	148	Tokio -----	45
Christiania -----	118	Budapest -----	44

CHAPTER XII.

TRANSPORTATION DIVISION.

The work done by this division during the year just passed has covered a wide range of activities. Formal decisions involving Transportation Division studies during the year numbered 360. In point of numbers the bulk of these decisions involved the establishment of new grade crossings. In point of time demanded of the division, however, the relatively small number of decisions on other matters very greatly outweighed grade crossing studies. There were new depot facilities, realignments of track, protection of grade crossings, separations of grades, and abandonments of unprofitable branch lines. Engineering studies on the bulk of the abandonments were made in the service department. Routine work not reflected in decisions included 56 miscellaneous informal complaints, the inspection of 17 interlocking plants, the analysis of steam carrier valuations by the Bureau of Valuations of the Interstate Commerce Commission and the preparation of protests thereon for the attention of the Interstate Commerce Commission.

Many special problems have engaged the time of the division during the year. Some of these are in connection with pending formal proceedings, others are made necessary by the fact that important studies are being made by the carriers in anticipation of the filing of formal applications. In this class are the general studies into the growth and development of interurban transportation systems, together with the rearrangement of interurban transportation arteries. Much time has also been taken up by service surveys on street car and interurban railway systems.

FORMAL PROCEEDINGS.

There follows a summary table showing the formal proceedings involving transportation utilities on which work has been done by this division and which have been decided during the year. These are exclusive of proceedings which centered around the issuance of securities:

FORMAL PROCEEDINGS DECIDED DURING THE FISCAL YEAR ENDING JUNE 30, 1924.
(Exclusive of proceedings which centered around the issuance of securities.)

Pacific Electric	3	20	21	1				1
All other railroads	4	50	48				1	5
Totals	24	247	242	6	3	3	5	12
Grand totals	43	329	305	20	8	4	6	29

New depot facilities.

There was one important formal decision on this subject during the year. This was in Case No. 1019, which was a proceeding instituted on the Commission's own motion on November 9, 1916, in which the Southern Pacific Company was directed to construct a new passenger station at Sacramento. This matter, which had been undertaken before the war, had been deferred, first, on account of the war and later on account of the uncertainty of railroad ownership of the railroad property in Sacramento itself, on account of the so-called "unmerger proceedings" before the Supreme Court of the United States, and later before the Interstate Commerce Commission.

These obstacles having been removed, it became possible for the Commission to bring this proceeding to a culmination by directing the construction of this station.

Rearrangement of interurban transportation arteries.

In Application No. 9426 the Pacific Electric Railway Company asked approval of the construction of a tunnel from its Hill street station in Los Angeles easterly for a distance of nearly a mile to Glendale boulevard. In making this application, Pacific Electric Railway Company was complying with a requirement made in the Commission's Decision No. 9928, dated December 24, 1921, wherein certain rate adjustments were made by the Pacific Electric on the condition that certain improvements in the service be made by the company—the construction of the so-called Hill street tunnel being one of these improvements.

Protection of grade crossings.

In Case No. 1761 the city of Stockton claimed inadequate crossing protection at various crossings over the three transcontinental railroads entering Stockton. Although this case was nominally dismissed, this action was taken after a thorough investigation by the Transportation Division, in which a report was rendered setting forth the principles under which various types of protection are considered preferable. The parties at interest in this case finally agreed upon the protection to be afforded at the various crossings involved, and the case was accordingly dismissed.

Valuations.

Two unimportant valuations of physical property of carriers have been prepared during the year. One of these was in Application No. 2919, Kings Lake Shore Railroad, and the other one was in Application No. 9807, West Coast Transit Company. Inasmuch as the Department of Finance and Accounts assumes responsibility for these two proceedings, no record of them is included in the table of formal proceedings decided during the fiscal year. Other valuation matters not in connection with formal proceedings will be discussed in their proper place.

Separation of grades.

During the year twelve separations of grades have been ordered. Some of these have grown out of applications for new grade crossings while others have come to the Commission as grade separation matters.

The separation of grades has proved to require very large construction expenditures which must be prorated between the carrier or

carriers and the various political subdivisions in accordance with the importance of their interests. In each of the separations which have been ordered, a very large number of traffic intersections have been done away with, and material contribution to the public safety has thus been made.

INFORMAL COMPLAINTS.

There follows a summary classification by subject matter of informal complaints which occupied the attention of the division during the year:

Number of complaints	Subject
23	Dangerous grade crossings.
6	Additional grade crossing protection.
3	Excessive ringing of bell at grade crossings.
3	Construction of private crossings.
3	Obstruction to view at grade crossings.
1	Additional grade crossings.
1	Signals out of order at grade crossings.
1	Construction of undergrade crossing.
1	Leave crossing open.
6	Extension of service (L. A. Ry.)
1	Culverts under railroad track for drainage.
1	Cattle pass under railroad track.
1	Removal of poles from property.
1	Noise of cars.
4	Crowded condition of street cars (L. A. Ry.)
56	Total.

CURRENT WORK.

Reference has already been made to routine work done during the year and not reflected in decisions nor done in connection with informal complaints. Under this classification will fall the inspection of interlocking plants and the analysis of I. C. C. valuation reports on steam railroads. Many grade separations involve special problems, nevertheless they will be reported on here, under current work.

Interlocking plants.

In connection with the provisions of General Order No. 33, as to the inspection of interlocking plants, the following work has been done:

Interested parties	Disposition
La Habra Tower, P. E. & A. T. & S. Fe-----	Approved.
San Rafael Tower, N. W. P.-----	Approved.
San Bernardino Tower, A. T. & S. Fe-----	Approved temporarily.
Redwood Jct. Tower, S. P.-----	Approved.
Glendale Tower, P. E.-----	Approved.
Key Route Tower, No. 1-----	Approved.
Hanford Tower, A. T. & S. Fe-----	Rehabilitation requested.
Tulare Tower, A. T. & S. Fe-----	Rehabilitation requested.
Fresno Tower No. 2, A. T. & S. Fe-----	Rehabilitation requested.
Fresno Tower No. 1, A. T. & S. Fe-----	Guard rail required.
Daggett Tower-----	Approved.
Commonwealth Tower, L. A. & S. L.-----	Approved.
19th & R St. Tower, Sacramento S. P.-----	Approved.
Colton Tower, A. T. & S. Fe-----	Revise plans.
Elvis Tower, Sacramento S. P.-----	Investigation proceeding.
Kern Jct. Tower, S. P. & A. T. & S. Fe-----	Investigation proceeding.
Fullerton Tower, A. T. & S. Fe-----	Investigation proceeding.

Grade separations.

A number of important grade separation proceedings are now pending before the Commission, some of which may result in a formal decision during the next year. A list of these follows:

Proceeding number	Parties to proceeding	Location
A- 5180	Contra Costa County and A. T. & S. Fe-----	Christie.
A-10226	State Highway Commission-----	North Sacramento.
A-10227	Sacramento Northern & W. P.-----	
A- 9671	City of Los Angeles-----	Viaducts over Los Angeles River at Macy, Aliso, First, Fourth, Seventh and Ninth streets.
	County of Los Angeles-----	
	L. A. & S. L. Ry. Co.-----	
	A. T. & S. Fe Ry. Co.-----	
	Los Angeles Railway-----	
	Pacific Electric Railway-----	

Of these, the most important is Application No. 9671, wherein the city of Los Angeles, the county of Los Angeles, Los Angeles and Salt Lake Railroad Company, Atchison, Topeka and Santa Fe Railway Company, Los Angeles Railway Corporation and the Pacific Electric Railway Company have requested the Commission to approve the construction of six viaducts across the tracks of Los Angeles and Salt Lake Railroad Company and Atchison, Topeka and Santa Fe Railway Company and across the Los Angeles River at Macy, Aliso, First, Fourth, Seventh and Ninth streets, respectively, in the city of Los Angeles.

The applicants further request that the Commission apportion the cost of these viaducts among the various interested parties. This proceeding is of unusual importance, not only because of the general traffic importance of the highway viaducts proposed and the steam railroad grade crossings to be eliminated, but also because of the relatively large expenditures involved, the total project being estimated to cost from eight to ten million dollars, and of the unusual complications which enter into the equitable apportionment of the cost. The parties interested in the construction of the Ninth street viaduct above have already agreed to the apportionment of cost of that structure, and the Commission has made its Decision No. 13443, approving such division of cost and directing that the work be done. This viaduct is now under construction and the designs for the Macy street viaduct are completed.

Interstate Commerce Commission valuations.

As noted in previous reports, the Commission discontinued the valuation of interstate steam roads when the Interstate Commerce Commission commenced its valuation work.

Under the Valuation Act, the states are made parties to the valuation proceedings for each carrier located wholly or partly within the state, and the reports prepared by the Bureau of Valuation of the Interstate Commerce Commission are submitted to the Governor of each state. These reports, comprising a valuation of road and equipment, are referred to this Commission.

Following this discussion of these valuations will appear a list of Interstate Commerce Commission valuations received by this Commission to June 30, 1924, and a table showing effective valuation figures which have been found by the Bureau of Valuation of the Interstate Commerce Commission for each carrier enumerated for all items of property, including the cost of land.

During the year, tentative reports on land values have been received for the following carriers:

- Central Pacific Railway Company.
- Coast Line Railway.
- Fresno Traction Company.
- Hanford and Summit Lake Railway Company.
- Inter-California Railroad Company.
- Peninsular Railway.
- Porterville Northeastern Railway Company.
- Southern Pacific Company.
- Southern Pacific Railroad Company.
- South Pacific Coast Railway Company.

The Engineering Department of this Commission has previously made complete valuations on a large number of the interstate and intrastate railroads, and as fast as the Bureau of Valuation's reports are received, a detail check is made. A protest is then prepared and submitted to the Interstate Commerce Commission.

During the year, protests have been made on the tentative reports for the following carriers:

- Atchison, Topeka and Santa Fe Railway Company.
- California, Arizona and Santa Fe Railway Company.
- Central Pacific Railway Company.
- Coast Line Railway Company.
- Fresno Traction Company.
- Hanford and Summit Lake Railway Company.
- Inter-California Railway Company.
- Northwestern Pacific Railroad Company.
- Peninsular Railway Company.
- Porterville Northeastern Railway Company.
- Southern Pacific Company.
- Southern Pacific Railroad Company.
- South Pacific Coast Railway Company.

The direct result of these protests has been a general revision of the Bureau of Valuation's tentative engineering report. Practically all of the claims made by the Engineering Department have been allowed, and the revised tentative engineering report on The Atchison, Topeka and Santa Fe System, for example, shows a total reduction for used and owned property in California, for cost of reproduction new of \$7,631,555, or 11.4 per cent, and a reduction of \$7,635,649, or 12.8 per cent, for reproduction cost less depreciation.

TABLE NO. C.

List of Interstate Commerce Commission Valuations of Railroads Received to June 30, 1924.

(NOTE.—Interstate Commerce Commission has appraised no Electric Railways in California.)

¹ Equipment (Accounts 51 to 58 inclusive) has not been allocated to the various states and has not been included in these amounts.

² Land reports have not been received.

NOTE.—All these figures are for lines in California, and are preliminary and subject to revision by the Interstate Commerce Commission.

SPECIAL PROBLEMS.

Los Angeles street railway investigation.

The comprehensive survey of the properties of the two local street car systems in Los Angeles, described in last year's report, has been in progress during the past year. This survey is being jointly undertaken by the Engineering Department of the Commission, the engineering department of the Board of Public Utilities of the city of Los Angeles, and representatives of the street railway systems, for the purpose of reaching, if possible, conclusions respecting possible consolidation of the local street railway properties of the city of Los Angeles. This work is still under way, but is nearing completion. No report has as yet been rendered.

Investigation of transportation development at Los Angeles harbor.

The further study of transportation development at the Los Angeles harbor, requested by the city of Los Angeles by the joint committee consisting of engineering representatives of the Railroad Commission, the Los Angeles Harbor Department, and the Los Angeles Board of Public Utilities, has been completed. The report was rendered after the committee has been augmented by an engineering representative of the Greater Harbor Committee of 200 of the Los Angeles Chamber of Commerce.

The scope of this investigation was stated in the Commission's annual report of a year ago.

After thorough investigation, this Engineering Committee made the following recommendations to the city council of Los Angeles:

- (1) Railroad facilities at the harbor should be unified.
- (2) Land should be acquired, at a suitable location, for a classification yard.
- (3) The entire territory between the harbor and the city proper should be carefully zoned and so laid out that railroads, highways, industrial projects and residential areas may be developed and expanded most efficiently with the minimum interference with each other.
- (4) A comprehensive plan for the elimination of grade crossings should be formulated and placed in effect.

Shattuck avenue, Berkeley.

The city of Berkeley has officially requested the Commission to assist in arriving at a solution for the improvement of traffic conditions along Shattuck avenue and Adeline street in the city of Berkeley. This, in the first instance, was initiated by a formal complaint filed by the city, but after negotiations between interested parties, it was agreed that before proceeding in a formal manner, a thorough engineering investigation by a committee representing the various interests should be made, to the end that, if possible, the city and the two railroads concerned might agree upon a satisfactory method of relief. This committee, consisting of engineers of the city of Berkeley, the Southern Pacific Company, the Key System Transit Company and the Railroad Commission, have been making an exhaustive study of this situation, and the work is now nearing completion. No report has, however, as yet been rendered.

General grade crossing survey.

General grade crossing survey work which was undertaken in 1916, particular mention of which is made on page 125 in report for the year ending June 30, 1923, was suspended at the end of the last fiscal year, and the only field work done during this last year has been to resurvey the grade crossings of Mill Valley and Berkeley at the request of the political authorities of these two cities.

Los Angeles County Grade Crossing Committee.

There was organized in August, 1923, a Grade Crossing Committee in Los Angeles County consisting of representatives of the city of Los Angeles, the county of Los Angeles, the State Highway Commission, and each of the larger railroad companies serving that territory. The Railroad Commission is represented in an ex officio manner on this committee by its transportation engineer. This committee interests itself in all matters pertaining to the elimination of existing grade crossings, or the prevention of additional grade crossings in Los Angeles County.

The work of this committee has an important relation to the grade crossing work of the Commission, for the reason that to some extent matters which would otherwise be presented to the Commission for adjustment of controversial issues, are eliminated by the cooperative methods used by the several interests represented by the committee. The work of this committee also serves to arouse general public sentiment as to the need of aggressively combating the grade crossing menace. There have been twenty meetings of this committee.

Northern California Grade Crossing Committee.

On May 1, 1924, the California State Automobile Association called a meeting of representatives of various interests in San Francisco, and it was at that time agreed that a grade crossing committee should be organized in northern California.

The work of this northern committee has scarcely gotten under way, there having been only two meetings, but it is expected that it will be useful in an important way in assisting any grade crossing work in the northern part of the state.

Los Angeles terminal and grade crossing proceedings. Case No. 970; I. C. C. Docket 14778.

The decision of the State Supreme Court that jurisdiction in the matter of establishing a union passenger terminal in the city of Los Angeles is vested in the Interstate Commerce Commission under the Transportation Act of 1920, has been sustained by the United States Supreme Court in a decision rendered in April, 1924.

Accordingly the hearings on the application of the city of Los Angeles to the Interstate Commerce Commission for an order requiring the construction of a union station, referred to in last year's report, were resumed on June 19, 1924, at which time this Commission appeared as an intervener to urge the granting of the city's application. The Commission's engineers prepared a definite plan, showing the practicability of constructing a suitable union terminal in the general area chosen by the city. They also prepared detail estimates of cost of construction under such plan.

This plan and also summaries of the cost estimates and other engineering data were introduced in evidence and the matter has now been taken under submission.

CHAPTER XIII.

LEGAL DEPARTMENT.

The amount of litigation involving the Railroad Commission has been increasing rapidly during the last three or four years, along with the general increase in the Commission's work, and the fiscal year 1923-24 witnessed a very important growth both in litigation and in the general work of the Commission's legal staff. At the end of the fiscal year 1922-23 there were pending in the United States Supreme Court the three consolidated cases involving the proposed Los Angeles union passenger terminal, and another involving water rates and contracts upon the system of the Cuyamaca Water Company in San Diego County. The latter is still pending, the Los Angeles cases having been decided adversely to the Commission's jurisdiction. At the same time there were pending in the State Supreme Court seven cases, of which six have been decided. There were also pending seven proceedings before the Interstate Commerce Commission, six of which are still undecided, and one case before the superior court of Los Angeles County, also still pending.

At the close of the fiscal year the following litigation was pending: Three cases in the United States Supreme Court, six in the California Supreme Court, one in the District Court of Appeal, and three in superior courts. There were also pending six cases before the Interstate Commerce Commission.

In addition to conducting all litigation and other legal proceedings for the Commission, this department advises the Commission and its staff upon all matters involving questions of law in relation to proceedings brought, or pending, before the Commission, and also assists and advises in connection with legal problems entering into opinions and decisions of the Commission. This work has also increased rapidly during the last few years, and while it is generally recognized as advisable for a member of the legal staff to be present at all important Commission hearings, this has proved impossible with but two attorneys in this department. Important hearings have, however, been attended whenever possible.

During the year a number of inquiries have been made to this department as to a digest of the Commission's decisions. Such a digest would undoubtedly prove of great value not only to attorneys actively appearing before the Commission, but also to many other attorneys, the public utilities of the state, and the Commission and its staff. The task of preparing such a digest, involving more than thirteen thousand decisions since the 1911 reorganization of the Commission, is, however, a large one, and can not be undertaken at the present time in view of the pressure of other work before the department.

PROCEEDINGS PENDING AT THE CLOSE OF THE FISCAL YEAR.

On July 1, 1924, the following active litigation was pending:

UNITED STATES SUPREME COURT.

1. *Live Oak Water Users Association vs. Railroad Commission.*

This is an appeal to the United States Supreme Court by writ of error following a decision by the Supreme Court of California which upheld an order of the Railroad Commission fixing rates to be charged by the Sutter-Butte Canal Company. (See *Live Oak Water Users Association vs. Railroad Commission*, 66 Cal. Decs. 408.) The case involves the validity of the action of the Railroad Commission in fixing rates other than those contained in certain contracts between the water company and certain of its consumers.

2. *Brewer vs. Railroad Commission.*

This matter, which was pending at the time of the last annual report, is still pending in the United States Supreme Court, having been taken there by writ of error following two decisions of the California Supreme Court affirming an order of the Railroad Commission fixing rates to be charged by the Cuyamaca Water Company in San Diego County. (See *Brewer vs. Railroad Commission*, 64 Cal. Decs. 457 and *Brewer vs. Railroad Commission*, 64 Cal. Decs. 472.)

3. *County of Tuolumne vs. Railroad Commission.*

This case involves the validity of an order of the Railroad Commission apportioning as between the electric and water services of a public utility, respectively, certain capital charges and operating expenses. The utility involved is the Sierra and San Francisco Power Company, now operated under lease by the Pacific Gas and Electric Company. Writ of review in this matter was denied by the California Supreme Court, and the case has been taken to the United States Supreme Court by writ of error.

CALIFORNIA SUPREME COURT.

1. *Southern Pacific Company vs. Railroad Commission.*

This is a proceeding to review an order of the Railroad Commission requiring the Southern Pacific Company to erect a new passenger depot at Fourteenth and Franklin streets in the city of Oakland. It has been pending for some time in the Supreme Court and has been continued from time to time by stipulation between the parties and the city of Oakland in anticipation that the railroad company and the city may come to an agreement as to a satisfactory disposition of the entire matter.

2. *Southern California Edison Company vs. Railroad Commission.*

This case involves the question as to whether or not the Railroad Commission possesses jurisdiction to fix rates for the "Mound Water Company" in Ventura County. This water company, now owned by the Southern California Edison Company, was held by the Railroad Commission not to be a public utility, and the Commission therefore refused to fix rates to be charged by it.

3. *Truck Owners and Shippers, Inc. vs. Cary.*

This matter involves the question as to the respective jurisdiction of the Railroad Commission and of the superior court to make a finding that a carrier by automobile is operating under the provisions of the

“Auto Stage and Truck Transportation Act” (Statutes 1917, chapter 213 as amended). The superior court of San Diego County found in an action for an injunction against the present plaintiffs that they were operating as a “transportation company” under the provisions of said act, and enjoined them from further operations of such character. The present action is in the nature of a writ of prohibition to test the validity of such finding on the part of the superior court. The Railroad Commission has appeared as *amicus curiae*.

4. *East Bay Municipal Utilities District vs. Railroad Commission.*

This is a mandamus proceeding asking for an order to compel the Railroad Commission to value the properties of the East Bay Water Company for purposes of condemnation and sale under the provisions of section 47 (b) of the Public Utilities Act. It is in the nature of a test case to determine the question of jurisdiction of the Railroad Commission over such a case upon petition by a municipal utility district.

5. *Southern Pacific Company vs. Railroad Commission.*

The Southern Pacific Company in this case asks that the court review and annul an order of the Railroad Commission awarding reparation to certain shippers upon the shipment of empty lug boxes in intrastate commerce during the so-called “Federal Guarantee Period.” It is contended that the Commission had no jurisdiction to make such an award during that period. In view of a provision of the Transportation Act of 1920 that no rates should be reduced during such period without express authority from the Interstate Commerce Commission, the Railroad Commission has taken the position that an award of reparation is not a reduction in a rate inasmuch as the reparation power has been determined to be judicial in character and to operate solely between individual parties litigant, whereas the rate-fixing power is solely legislative, and operates only *in futuro* against all parties falling within the prescribed clause.

6. *Samuel Edwards Associates vs. Railroad Commission.*

This is a review proceeding dealing with the jurisdiction of the Railroad Commission to fix rates to be charged by the Piru Water Company. Certain of the consumers of this company contend that it is not a public utility, and therefore not subject to the Commission’s jurisdiction.

DISTRICT COURT OF APPEAL.

1. *People vs. Yahne.*

This is a criminal action under the provisions of the Auto Stage and Truck Transportation Act (Stats. 1917, chapter 213, as amended), in which one Yahne was arrested and charged with violation of said statute because he did not possess a certificate of public convenience and necessity from the Railroad Commission authorizing the transportation which he was carrying on. His defense is that he operated solely in interstate commerce, his stage transporting passengers between San Francisco, California, and Portland, Oregon, only, with no intrastate commerce in either state. Inasmuch as no federal authority has taken jurisdiction over such operations, the Commission has appeared and assisted in the prosecution of this case and has

taken the position that unless and until the federal government shall have acted the state retains power over such operations.

SUPERIOR COURTS.

1. *Los Angeles Gas and Electric Corporation vs. Railroad Commission.*

This is an injunction proceeding brought in the superior court of Los Angeles County to halt action by the Railroad Commission looking toward a valuation of the electric properties of the plaintiff under the provisions of section 47 (b) of the Public Utilities Act after petition for such valuation by the city of Los Angeles.

2. *Los Angeles Gas and Electric Corporation vs. Railroad Commission.*

This is a second suit involving matters similar to those mentioned in the case above.

3. *Gardner vs. Railroad Commission.*

This case involves a petition for an injunction in the superior court of Marin County, asking that the Railroad Commission be ordered not to interfere with a grade crossing over the tracks of the Northwestern Pacific Railroad Company in that county.

INTERSTATE COMMERCE COMMISSION.

On July 1, 1924, there were pending before the Interstate Commerce Commission the following matters in which this Commission has taken an active part:

1. *In the Matter of the Consolidation of Railroads of Continental United States* (Docket No. 12964).

This proceeding, initiated pursuant to certain provisions of the Transportation Act of 1920, relates to possible plans for the consolidation of the railroads of Continental United States "into a limited number of systems." The Railroad Commission appeared at hearings held at San Francisco and in Los Angeles, and presented evidence dealing with certain railroad problems in the State of California which, in its opinion, had relation to the matter under consideration by the Interstate Commission.

2. *California Fruit Growers and Shippers Protective League vs. Southern Pacific Company* (Docket No. 15137).

This case involves a request by the producers of deciduous fruits in the State of California for a reduction in the freight rates upon such fruits from California producing points to eastern consuming points. The Railroad Commission has not made it a practice to appear in cases before the Interstate Commerce Commission involving rate matters except where the interests of the whole state appeared to be involved and where the issue was deemed by the Railroad Commission to be clear. Such was the case in this present proceeding, and the Commission appeared and filed a brief on behalf of the plaintiffs.

3. *Pullman Surcharge Proceeding* (Docket No. 14785).

This matter, entitled "*In the Matter of Surcharges Assessed Passengers Traveling in Sleeping and Parlor Cars*," covers not only the general rates, but the surcharge payment to the railroads now assessed to such passengers. The Railroad Commission appeared in hearings held at San Francisco and presented evidence tending to show that such surcharge should be eliminated.

4. *Public Service Commission of Oregon vs. Central Pacific Railway Company et al.* (Docket No. 14392).

This matter involves the application by the State of Oregon for an order of the Interstate Commerce Commission requiring certain railroads to construct lines of railroads in eastern and southern Oregon not now possessing rail facilities. Inasmuch as the construction of such lines of railroad would, in the opinion of the Railroad Commission, be of importance to the shippers of freight between Oregon and Idaho points and large portions of the State of California, the Railroad Commission appeared in this proceeding and made certain representations in the interests of complainant.

5. *In the Matter of California Express Rates* (Docket No. 12093).

This is a proceeding to secure from the Interstate Commerce Commission an order increasing express rates within the State of California $13\frac{1}{2}$ per cent above the present rate. The Railroad Commission denied an application for such increase, and the express company claims such action unlawful on the ground that the disparity between state rates and interstate rates is prejudicial to interstate commerce. The matter was held in abeyance pending the decision of the Interstate Commerce Commission in the National Express Rate case (Docket No. 13930), which matter has now been decided favorably to the contentions of the Railroad Commission.

6. *City of Los Angeles vs. Los Angeles and Salt Lake Railroad Company et al.* (Docket No. 14778).

This is an application by the city of Los Angeles asking the Interstate Commerce Commission to make an order similar in tenor to that of the Railroad Commission in the "Los Angeles Union Passenger Terminal Cases." The decision of the United States Supreme Court, holding that the California Railroad Commission did not possess jurisdiction to make such an order, led the Commission to intervene in this proceeding on behalf of the complainant. Hearings have been held before Commissioner Aitchison and Examiner Eshelman, and further hearings are expected before a determination of the case may be reached.

7. *Application of Southern Pacific Company et al. to Construct and Extend Lines of Railroad in the City of Los Angeles* (Docket No. 3569).

8. *Application of Southern Pacific Company et al. to Abandon Operation of Lines in City of Los Angeles* (Docket No. 3556).

These matters involve questions in connection with the Los Angeles union terminal proceedings above mentioned. They are formal requests by the railroads to put into effect a plan proposed by them for the partial unification of passenger facilities in Los Angeles by the joint use of the present Southern Pacific depot by both the Southern Pacific and Salt Lake railroads, leaving the Santa Fe in its present location.

CASES DECIDED DURING THE FISCAL YEAR 1923-24.

SUPREME COURT OF THE UNITED STATES.

1. *Railroad Commission vs. Southern Pacific Company.*

2. *Railroad Commission vs. The Atchison, Topeka and Santa Fe Railway Company.*

3. *Railroad Commission vs. Los Angeles and Salt Lake Railroad Company.*

These three cases, which were consolidated for hearing and decision by the United States Supreme Court, involve petitions for *certiorari* filed by the Railroad Commission asking for an annulment of the decision of the State Supreme Court in the so-called Los Angeles union passenger terminal cases (see *A., T. & S. F. Ry. Co. vs. Railroad Commission*, 64 Cal. Dees. 557). The State Supreme Court had annulled an order of the Railroad Commission directing the railroads to file plans looking toward the erection of a union passenger terminal within a specified area in the city of Los Angeles. The ground upon which the State Supreme Court based its action was that, by the Transportation Act of 1920, jurisdiction to make such an order had been vested by congress in the Interstate Commerce Commission, thus divesting the state body of whatever jurisdiction it may formerly have possessed. The United States Supreme Court affirmed this decision and, as mentioned above, the matter is now pending before the Interstate Commerce Commission upon the complaint of the city of Los Angeles joined in by the Railroad Commission.

CALIFORNIA SUPREME COURT.

1. *Richardson vs. Railroad Commission* (66 Cal. Dees. 245).

This matter involved the question as to whether or not a small water system in Orange County was being operated as a public utility system, and the Commission's order fixing rates to be charged by this system was annulled.

2. *Pasadena vs. Railroad Commission* (66 Cal. Dees. 332).

This case involved the validity of certain rates for interurban electric car service between the city of Los Angeles and the cities of Pasadena, South Pasadena, Alhambra and Glendale, which the latter cities claimed to be in violation of section 21, article XII of the state constitution. The order of the Commission was affirmed by the Supreme Court.

3. *Railroad Commission vs. Riley* (66 Cal. Dees. 327).

This case involved the construction of the so-called "Budget Bill" and "Budget Amendment" of the constitution in view of the provisions of sections 57 and 85 of the Public Utilities Act. The writ prayed by the Railroad Commission was granted.

4. *Live Oak Water Users Association vs. Railroad Commission* (66 Cal. Dees. 408).

This case involved the validity of an order of the Railroad Commission fixing rates to be charged upon the system of the Sutter-Butte Canal Company. A decision of the court affirming the order of the Commission was made after rehearing had been had, and reversed the former decision of the Supreme Court (65 Cal. Dees. 69), in which the Railroad Commission's order had been annulled. This matter, as mentioned above, is now pending in the United States Supreme Court on writ of error.

5. *Hollywood Chamber of Commerce vs. Railroad Commission* (66 Cal. Decs. 521).

This was a proceeding in mandamus brought by the Hollywood Chamber of Commerce to compel the Railroad Commission to make an order directing the Los Angeles Railway Corporation to make certain extensions within the city of Los Angeles. It was determined by the court that the Commission did not possess jurisdiction to make such an order, and the writ of mandamus was therefore denied.

6. *Klatt vs. Railroad Commission* (67 Cal. Decs. 19).

This matter involved questions similar to those raised in the case of *Richardson vs. Railroad Commission* above mentioned, and the order of the Commission was annulled upon the ground that it possessed no jurisdiction over the small water system involved.

7. *Williamson vs. Railroad Commission* (67 Cal. Decs. 83).

This case involved the status of the Natomas Water Company and its predecessors at the time certain contracts for water service were made. The Railroad Commission determined that at the time the contracts had been made the water system was operated as a public utility, and the Commission therefore fixed certain rates to be charged by the water company which differed from those provided in the contracts in question. The Supreme Court affirmed the order of the Railroad Commission.

8. *Hadley vs. Railroad Commission* (66 Cal. Decs. 154).

This involved an application for a writ of review in connection with an order of the Railroad Commission directing the cessation of certain auto stage operations. The writ of review was denied.

9. *Sierra Transit Company vs. Railroad Commission*.

This matter involved a petition for a writ of review in connection with an order of the Railroad Commission involving an auto stage company. The writ of review was denied.

10. *Cowan vs. Railroad Commission*.

This matter was similar to that involved in the next above mentioned case between other parties. The writ of review was denied.

11. *Hadley vs. Railroad Commission*.

This matter involved an attempt by certain parties to have an order of the Railroad Commission refusing to reopen old proceedings annulled. The writ of review was denied.

12. *Redgrave vs. Railroad Commission*.

This matter involved certain orders of the Railroad Commission affecting certificates of public convenience and necessity in connection with certain auto-stage operations. It was dismissed by stipulation of the parties in order that further proceedings might be had before the Railroad Commission.

DISTRICT COURT OF APPEAL.

1. *People vs. Hadley* (143 Cal. App. Decs. 380).

This case involved a criminal action under the Auto Stage and Truck Transportation Act (Stats. 1917, Chap. 213, as amended) for operating without a certificate of public convenience and necessity after an order

of the Railroad Commission directing the cessation of such operations. The position of the Commission that such operation is in fact in violation of the said statute was upheld by the decision.

2. *People vs. Hadley* (43 Cal. App. Dees. 736).

This case involved a rehearing of the case next above mentioned, and the court reversed its former holding upon the technical question of service of the order of the Railroad Commission. Aside from this, the former opinion was reaffirmed in full.

INTERSTATE COMMERCE COMMISSION.

In the Matter of Express Rates 1922 (Docket No. 13930).

By its decision in this matter the Interstate Commerce Commission considerably reduced the level of transcontinental express rates very largely in the manner contended for by the Railroad Commission. Examiner J. C. Harraman of the California Railroad Commission, as representative of the National Association of Railway and Utilities Commissioners, took an active part in this case and sat with the examiners of the Interstate Commerce Commission throughout the hearings in the various sections of the United States. He has since remained temporarily with the Interstate Commerce Commission engaged in the working out of certain details in connection with the rates fixed in this proceeding. The order made by the Interstate Commerce Commission in this matter brings to a successful conclusion the effort of several years on the part of this Commission to obtain a nationwide revision of express rates, and particularly to obtain reduction in transcontinental express rates.

STATISTICAL SUMMARY.

Since the reorganization of the Commission in 1911, it has made 13,748 formal orders and decisions. During that same period it has been a party to 136 court proceedings, of which 13 are still pending. Of these cases 21 have been decided against the Commission, but included in these are 5 which have been reversed by later action of the State Supreme Court, 4 of which were test cases, and, although nominally decided against the Commission, in reality sustained the Commission in principle, and one which actually sustained the Commission, but went off on a minor, technical point. This leaves a net of 11 cases actually lost during these 13 years, out of the 136 cases which have been handled. In other words, the formal action of this Commission, in the regulation of public utilities in California, as expressed in nearly 14,000 decisions, has been reversed in but eleven instances, considerably less than one-tenth of one per cent and this record is rendered even more important by the fact that of the cases lost a large number went off upon the technical questions of dedication to public use or status of persons or corporations as public utilities.

CHAPTER XIV.

(Section 1.)

AUTO STAGE AND TRUCK DEPARTMENT.

Transportation of persons and property by auto stage and truck over the highways of California is rapidly reaching a point in its development which entitles that form of transportation to rank among the major utilities of the state.

From an insignificant beginning automobile transportation has, within a comparatively few years, taken an important place among the factors aiding in the development of the state. The public automobile, stage and truck, following closely the completion of every highway, and in many instances preceding the construction of modern roads to points served, have overcome natural barriers and aided in the development of sections hitherto far removed from the lines of regular transportation service.

Records of the Commission indicate that auto transportation is well up among the large utilities of the state. From June 30, 1923, to July 1, 1924, the number of formal applications filed with the Commission totaled 1061. Of these 372 had to do with the establishment of auto stage or truck lines and their regulation. Of these applications 214 were requests for new certificates, 107 were for authority to transfer operating rights and 25 for permission to issue securities. Fifteen were requests for rate increases. The others covered various matters connected with auto services, rules and charges. Of the decisions handed down by the Commission 444 of the total of 1450 referred to auto transportation matters. Of the 88 formal complaints filed 19 were based on the operations of auto carriers.

This report covers the activities of the Auto Stage Department of the Commission from June 30, 1923, to July 1, 1924. The figures quoted from the financial reports of auto stage and truck lines operating under the jurisdiction of the Commission and filed with the Commission's Department of Finance and Accounts cover operations for the calendar year 1923.

AUTHORIZED CARRIERS.

At the close of the fiscal year 1923-24 the records of the Commission showed that there were operating in this state under the jurisdiction of the Commission 670 authorized carriers, that is carriers who, operating prior to May 1, 1917, had complied with the general order of the Commission requiring filing of tariffs and schedules issued following the passage of the statutory enactment known as chapter 213, and carriers, who, subsequent to that date, secured from the Commission certificates of convenience and necessity permitting the establishment of auto stage or truck lines. Of these carriers 165 devote themselves exclusively to the transportation of general freight, and 121 carry only passengers. Both freight and passengers are transported by 120, and passengers and express by 136. Passengers, freight and express are carried by 35, and 20 carry freight and express. One carrier transports express alone and two hold certificates limiting their field of operation to the transportation of school children.

SPECIAL CARRIERS.

Special certificates, which specify the commodities the carrier is authorized to haul are held by 70 carriers. These special certificates cover transportation of household goods, fruits, vegetables, berries, milk, cheese and poultry products, dairy feeds, cement, lumber, auto parts and accessories, moving picture films, oil well machinery and supplies requiring special equipment or a particular kind of service.

The certificated carriers listed as engaged in the business of transporting farm produce obtained their operating permits prior to the passage of the Crittenden bill by the legislature of 1923, which exempts such carriers from the necessity of securing a certificate. Following the passage of this act four carriers who entered into the business of hauling farm products filed their tariffs with the Commission, the constitution giving the Commission jurisdiction over their rates.

SEASONAL OPERATIONS.

The operations of many of the carriers are seasonal. Truck men hauling farm products, for instance, operate only during the production period. Many passenger stage lines serve resorts, and operate in accordance with the opening and closing dates of such places. In still other cases weather conditions are a determining factor, start of operations depending on winter's vagaries. Cessation of service is dependent upon the time and extent of the first storm. This usually results in highway blocking in mountainous territory. Closing of lumber mills and shutting down of logging operations generally mean discontinuance of auto stage service from population centers to mills and camps until operations are resumed.

Most of the freight carriers show in their tariffs that their service is given "daily, except Sundays and holidays." Service to school children is required only on school days, no service at all being required of the carriers on Saturdays and Sundays and during the vacation period. Carriers who also transport United States mail operate generally in accordance with time schedules fixed by the Post Office Department, although there are many carriers transporting mail giving additional service to care for the traffic they are obliged to transport under the certificates granted by the Commission.

CAPITAL IS ATTRACTED.

There were 830 auto stage and truck tariffs on file with the Railroad Commission July 1, 1921. The reduction of this number to 670 on July 1, 1924, does not mean that there has been any curtailment of service, or lessening of mileage covered. On the contrary a greater number of places is now being served. The decrease is the result of mergers principally, there having been since 1921 a general trend towards consolidation of lines. There is no question that this is due largely to the fact that the auto stage field is proving attractive to capital, which has realized the potentialities of the motor vehicle in public use, enlarged as they have been by California's great progress in highway construction, and the remarkable strides in equipment development. This is particularly true of the auto stage. Another factor in this change has been the entry into the auto service of transportation men as skilled in the business of transporting the public over the highways as the traffic experts of the rail or other carriers are with

their traffic problems. Auto transportation today has a distinct place in the great transportation field. Intensive study by men of ability has solved many of its problems, eliminated many obstacles and placed it on the high road leading to successful and profitable operation.

OPERATING PRIOR TO MAY 1, 1917.

Most of the major lines in California were established prior to May 1, 1917. Since that date they have been authorized to serve new territories contiguous to their original lines by certificates granted by the Commission. By purchases, approved by the Commission, they have acquired the operating rights of many smaller lines, this latter form of enlargement of field of service, becoming more marked, as has been stated, in the last three years.

It may be mentioned in support of this explanation as to the decrease in the number of stage lines that in the year covered by this report the Motor Transit Company of Los Angeles, the largest company of its kind in the state, acquired by purchase the Cooley Taft-Maricopa line, the operating rights of the Dillingham Transportation Company, the Cregar stage lines and the Patterson San Diego-Encanto line, all of which were operating in territory contiguous to that served by Motor Transit, at some points paralleling Motor Transit service.

TEN LINES IN MERGER.

Ten lines operating in territory of which the city of Eureka, in Humboldt County, is the logical radiating point, or main terminal, were merged by order of the Commission on application of the West Coast Transit Company, a corporation organized by the owners of the lines, who surrendered their operating rights and equipment in exchange for stock in the new company. The effect of this merger of ten transportation lines, each operated under separate management, into one transportation unit, under the control of one director of operations, will, in the view of the Commission, give the public a more efficient service, make possible better equipment and generally make for better traveling conditions for those favoring automobile transportation.

Pickwick Stages, Northern Division, Incorporated, also enlarged its field of operations during the year, and eliminated a certain degree of competition by acquiring lines operating purely local services in territory served by Pickwick Stages on its through service between Los Angeles and San Francisco and Portland, Oregon. Among the lines whose ownership was transferred to Pickwick were the Red Star Stage Line, operating between Paso Robles and San Luis Obispo, L. & J. Stage Line, operating between San Luis Obispo, Pismo and Santa Maria; Hare's Valley-Coast Line, serving between Bakersfield and the town of Pismo. Pickwick also acquired certain operating rights from the Crown Stage Lines, covering operations in the Los Angeles-Santa Ana field.

BUYS OUT COMPETITORS.

* Crown Stage Lines enlarged its field of operations and eliminated a certain measure of competition by acquiring the J. C. Best operating rights covering service between Riverside and Santa Ana and other points in the vicinity of Santa Ana.

United Stages, operating into the Imperial Valley, acquired the operating rights of the Bland Stages, and in the vicinity of Fresno, Valley

Transit Company, Inc., and Jos. Miller exchanged certain operating rights, the exchange, approved by the Commission, resulting from a study by the carriers of their field of operations and the consequent determination that the public would best be served by a rearrangement of their routings. In the Miller-Valley Transit transfer no money consideration was involved. Miller also enlarged his territory by acquiring the line operated by D. Moyer between Los Banos and Tracy and Los Banos and Merced.

In addition to the elimination of auto carriers by the merging process, careful checking of routes and lines reduced the number of listed stage and truck lines. This check, which was started with the establishment of a separate auto stage department by the Commission, brought out the fact that many operators with legally established operative rights, were no longer in business. They had simply stopped running and left for parts unknown. With such facts proved by affidavit or by letters from persons competent to advise in the matter the Commission then cleared its records by checking out the tariffs of nonoperating lines, or, in the case of certificated lines, issuing a supplemental order revoking and annulling the certificate. It is now generally understood among the carriers that they must obtain from the Commission authority to discontinue service as well as authority to begin service.

TRAVELING PUBLIC IS GAINER.

As a natural outcome of the passing of the control of so many stage and truck lines from the individual operator, satisfied with giving a purely local service, to well organized, efficiently managed organizations whose only business is to study and cater to the needs of that part of the traveling public whose transportation requirements are satisfied by the public automobile, California is well served. Auto stage service extends from the California-Oregon state line to the Mexican border, both along the coast and through the heart of the great valleys lying between the Coast Range of mountains and the Sierras. From all centers of population, in all directions, radiate stage and truck lines. Rough and rugged as is the territory through which runs the California-Nevada state line, forbidding and threatening as are the vast desert spaces of the southwest, they are not beyond the pale of service. Few, indeed, in all the vastness of this great state, are the points not served.

PRECEDENTIAL DECISIONS.

During the year 1923-24 several proceedings involving transportation of freight by auto over the highways of the state resulted in declarations by the Commission which were of a precedential nature and therefore of more than ordinary importance to shippers, haulers and receivers of freight. In one proceeding the matter of the Commission's jurisdiction over interstate freight transported by auto in California was determined, the Commission holding that it had the power to regulate the activities of transportation companies engaged in moving such freight by auto within the borders of California. Three proceedings concerned the right of so-called "contract carriers" to transport freight by auto over the highways of the state without obtaining a certificate of convenience and necessity from the Commission and in one of these actions exemption under the Crittenden bill was claimed.

Such a certificate must be obtained, declared the Commission in its decisions involving the "contract carrier" operation.

JURISDICTION IS CLAIMED.

The proceeding in which was questioned the Commission's jurisdiction over interstate freight was brought by the Hodge Transportation System and other certificated carriers against a number of auto truck operators transporting freight between the city of Los Angeles proper and the Los Angeles harbor district at Wilmington and San Pedro, also part of Los Angeles but to reach which the defendant truck operators traveled outside the city limits of Los Angeles. The operation, in the minds of the complaining carriers, was not "exclusively within the limits of an incorporated city or town or of a city and county" and therefore, they argued, the defendants were operating illegally, a contention sustained by the Commission. Certain of the defendants claimed that inasmuch as a large part of the tonnage hauled between the harbor district of Los Angeles and Los Angeles city proper, moved partially by water and partially by truck to or from a point of origin outside the state to the ultimate point of destination, they were interstate shipments and not subject to regulation by the State of California. The claim of the defendants as to their exemption from regulation by the Commission because of the so-called interstate character of the commodities they transported, was rejected by the Commission, which, in its decision assuming jurisdiction over the defendant carriers, said:

"The evidence in this matter shows that in most instances the shipments carried by these defendants are separate and distinct intrastate shipments, and that the interstate movement ends or commences at the docks. Over such operation this Commission has undoubted jurisdiction. But even over the operation of these defendants in carrying shipments clearly interstate in character, this Commission has jurisdiction. In the recent case of *Interstate Motor Transit Co. vs. Kuykendall*, 284 Fed. 882 (1922) Neterer, District Judge, said:

It has been repeatedly held by the Supreme Court of the state, and also held by this court, that the state has full power to regulate or prohibit the use of public highways as a place of business by common carriers for hire. *Hadfield vs. Lundin*, 98 Wash. 657; 168 Pac. 516, L. R. A. 1918 B. 909, Am. Cas. 1918, C. 642; *State vs. Spokane*, 109 Wash. 360, 186 Pac. 864; *Schoenfeld vs. Seattle* (D. C.), 265 Fed. 726, and such is the holding of the Supreme Court in *Fifth Ave. Coach Co. vs. N. Y.*, 221 U. S. 467, 31 Sup. Ct. 709, 55 L. Ed. 815. * * * Our inquiry, therefore, is limited to the question whether it interferes with or imposes an unreasonable burden on interstate commerce.

"On the ground that the primary purpose of the act there in question was not to regulate interstate commerce, that congress has not acted to take control of the highways within its boundaries from the state, and that the merely incidental affecting of interstate commerce would not invalidate the statute, the court dismissed the bill. The court's reasoning applies with peculiar force to the case now before us. The act here in question has for its primary purpose the regulation of carriage for compensation over the publicly built and owned highways of this state. If it affects interstate commerce at all it does so only incidentally, and does not in any way operate as a discrimination against or as a hindrance to such commerce. Certainly, until congress has spoken regarding this operation, it lies within the power of the state to impose

reasonable restrictions and regulations upon the carriage of property for compensation over its highways by persons operating between fixed termini or over regular routes.

“It might be further pointed out that the dual contention of a number of defendants that the transportation conducted by these trucking companies is transportation solely within the limits of an incorporated municipality and is also interstate transportation would appear to be a contradictory contention in that the same movement could not be solely intracity and at the same time interstate.”

CONTRACT HAULING ILLEGAL.

One of the proceedings involving the matter of “contract hauling” was entitled *C. Bolton and T. J. Bennetts vs. Olson & Rouch and Walter Williams*, and was based on a complaint that the defendants were transporting freight for compensation between Friant and North Fork over and along the route covered by the certificate of convenience and necessity held by Bolton & Bennetts, without having secured authority to do so from the Railroad Commission.

Olson and Rouch, in their answer alleged that the operation being conducted by them was under contracts with two companies, that no hauling was done except in the performance of said contracts; that they were not operating as common carriers for hire and that the Commission had no jurisdiction or control over them. Williams in his answer denied that he was engaged in the transportation of freight as a common carrier for hire, declaring that he was engaged in operating trucks from Fresno and from Friant to Brown Creek Warehouse, located in the vicinity of Crane Valley Dam; that such hauling was exclusively for the San Joaquin Light and Power Corporation under a contract with such corporation and that he had not at any time offered to transport property for the general public as a common carrier between the points named. He also claimed lack of jurisdiction by the Commission.

Both matters were combined for hearing and in its Decision No. 12700 the Commission found that the operations as conducted by the defendants over public roads (the Commission has no jurisdiction over privately owned roads) were in violation of the law, and they were ordered to discontinue until they had received from the Commission a certificate authorizing them to transport goods for compensation over the highways of the state between fixed points or over a regular route.

DEFINES TRANSPORTATION COMPANY.

In its decision the Commission points out that the statutory law (chapter 213, Laws of 1917, and amendments thereto) establishing the status of truck operation which is subject to the regulatory jurisdiction of the Commission defines a transportation Company as:

every corporation or person, their lessees, trustees, receivers or trustees appointed by any court whatsoever, owning, controlling, operating or managing, any automobile, jitney bus, auto truck, stage or auto stage used in the business of transportation of persons or property, or as a common carrier, for compensation, over any public highway in this state between fixed termini or over a regular route; * * *

Section 5 of the statutory law above referred to requires that a transportation company before commencing operation, unless exempted

by reason of having been actually operating in good faith at the time of the effective date of the enactment, secure a certificate from the Commission that public convenience and necessity require such operation.

"From the evidence herein," the opinion reads, "the Commission is of the opinion and hereby finds as a fact that the transportation of property by auto truck by defendants Olsen and Rouch and Walter Williams between Fresno and Friant, and between Friant and the points on the highway where divergence is made to private roads is operation for compensation over a regular route, and for which no certificate of public convenience and necessity has been applied for or granted by this Commission. The Commission has no jurisdiction, under the statutory law, over any operation conducted over private roads, but is empowered and directed by the legislative enactment to exercise jurisdiction over this class of transportation over any public highway in the state, and paragraph (e) of section 1 of the Auto Stage and Truck Transportation Act (chapter 213, Laws of 1917, and amendments thereto) requires the Commission to determine whether stages or trucks operated 'between fixed termini or over a regular route' by a transportation company is within the meaning of the statutory enactment."

MUST OBTAIN CERTIFICATE.

"The evidence in this proceeding," declares the Commission, "shows that the transportation of property by defendants, in so far as such transportation is regularly conducted over the public highways en route to terminals which are reached by the use of private roads is 'over regular routes' and therefore subject to regulation of the Commission, and requires the authority conferred by a certificate of public convenience and necessity in accordance with the provisions of the above mentioned statutory law. No application for such certificate has been applied for or granted by the Commission to either of the defendants herein and the operation over the routes between Fresno and Friant and between Friant and the points on the public highway where divergence is made to private roads is hereby found to be in violation of the provisions of the statutory law."

The other proceeding involving "contract hauling" was based on operation by Lingo Brothers, a copartnership, of an auto truck service under contracts with shippers, verbal and otherwise, between Colton, San Bernardino and Arrowhead Lake, and other San Bernardino mountain points. As was the case with the operators in the Fresno territory, the Commission ordered them to discontinue their operations until such time as they were authorized to operate by the Commission.

Complaint against Lingo Brothers' operation was filed by Motor Transit Company, a common carrier giving service to San Bernardino mountain points under authority of the Commission.

DEFINES FARM HAULING.

The *White Lines vs. John D. O. Freed* is the title of the proceeding in which was brought up the question of what constituted "farm hauling." In this proceeding it was claimed by the defendant Freed that as he was engaged in transporting farm products (eggs) he did not require a certificate, basing his contention on the terms of the

Crittenden amendment to the Auto Stage and Truck Transportation Act which reads:

Each application for a certificate of public convenience and necessity or for an order authorizing the sale, leasing, assignment or transfer of an existing operative right, privilege, franchise or permit made under the provisions of this section must be accompanied by a fee of fifty dollars; *provided, however*, the movement of products or implements of husbandry and other farm necessities from farm to farm or from and to farm to and from loading point, warehouse or other initial point shall not be subject to the regulations of this act.

WAREHOUSE INITIAL POINT.

The White Lines, a carrier operating under authority of the Commission between Stockton and Turlock, charged, and the facts were agreed upon by stipulation, that Freed was hauling eggs at least twice weekly from the warehouse of the A. B. Shoemaker Company in Modesto to the warehouse of the Poultry Producers of Central California in Oakland, by virtue of the terms of a written contract with the Poultry Producers Association, the members of which are farmers in the vicinity of Modesto. These members hauled their eggs from their farms to the Shoemaker warehouse at Modesto, where they were picked up by the defendant and carried directly to the warehouse of the association in Oakland. The eggs of the producers, in the haul from their farms to the warehouse at Modesto, were in their possession and control. At Modesto the producer obtained a receipt for the eggs delivered and the eggs then passed into the possession and control of the Poultry Producers Association.

The association, in accordance with its sale agreement with all its members, thus came into actual possession and control of the eggs of its members when they were delivered to the warehouse at Modesto and as the agent of the various members paid the defendant all the transportation charges involved in the haul from Modesto to Oakland.

Such operation, the Commission held, "is an auto truck operation for compensation over a regular route and between fixed termini, for which no certificate of public convenience and necessity has been applied for or granted by this Commission; and that the operation of said defendant over the highway between Modesto and Oakland is in violation of the provisions of the statutory law."

"We are also satisfied," said the Commission, "that the operations of said defendant as disclosed by the record in this proceeding do not fall within the exemption allowed for the movement of farm products."

INTERSTATE PASSENGER SERVICE.

Previously the question of the Commission's jurisdiction over passenger carriers doing a strictly interstate business was made an issue in an application filed with the Commission by the Interstate Motor Transit Company which asked the Commission for a certificate to operate an auto stage line between San Francisco and the southern boundary line of the state of Oregon, the company setting up that it did not propose to give any service between points in California, but to confine its operations to transporting passengers between San Francisco and Portland, and points between the Oregon line and Portland. The Commission held that it had jurisdiction over that part of the operation conducted in California. Following is an extract from

Decision No. 12739, handed down on Application No. 9289, in which the jurisdictional point was raised:

The principal question of jurisdiction involved in this proceeding concerns the interpretation and application of section 9 of the act for the regulation of auto stages (Stats. 1917, chapter 213, as amended), which reads as follows:

Neither this act nor any provision thereof shall apply or be construed to apply to commerce with foreign nations or commerce among the several states of this union, except in so far as the same may be permitted under the provisions of the constitution of the United States and the acts of congress.

It has been contended that under the provisions of this section the Railroad Commission, in the exercise of its regulatory powers over auto stage transportation companies, has no jurisdiction over such companies whose operations are entirely of interstate character. While it is true that the Commission has not heretofore assumed jurisdiction in such cases, this is the first instance where the matter has been considered in any formal proceeding. In other states, however, where similar statutory provisions were in force, this question has been presented and court decisions rendered thereon, which we feel are entitled to great weight in our consideration of the question.

The Supreme Court of the State of Washington, in the recent case of *Northern Pacific Railroad Co. vs. Schoenfeldt*, 216 Pac. 26, said:

We have repeatedly held that the legislature may regulate the use of the highways for carrying on business for private gain, and that such regulation is a valid exercise of the police power.

In the same decision the Washington court, after referring to the fact that no federal statute had been enacted for the regulation of this particular kind of common carrier, and to the well established principle that until congress acts to regulate a particular phase of interstate commerce, state regulation incidentally affecting such interstate commerce is not superseded, concludes:

That no feature of the act is a prohibition of, or a direct burden upon, interstate commerce.

The same interpretation of the Washington statute to regulate auto stages even though operating in interstate commerce was recognized and upheld by the federal court in the case of *Interstate Motor Transit Co. vs. Kuykendall*, 284 Fed. 882.

We agree with the conclusions reached in the foregoing cases, and, in accordance with the principles announced therein, conclude that in the absence of any federal regulation of auto stage transportation companies, this Commission, as the regulatory body of the State of California, should assume jurisdiction over all transportation companies operating, or seeking to operate, as such under the terms of the regulatory statute (chapter 213, Statutes 1917), and that this jurisdiction extends to transportation companies such as the applicant, who propose to operate an interstate service.

The certificate was denied by the Commission, which held that a proper showing had not been made by the applicants.

MANY INTERSTATE CARRIERS.

While the border line of California on the north, east and south marks the point at which the jurisdiction of the Railroad Commission ends, so far as regulation of motor carriers is concerned, there are operating in the state several auto lines having terminals beyond the border. In granting these lines certificates the Commission issues a permit from a terminal point in California to a point in California at or near the California-Oregon line, the California-Nevada line or the Mexican border whichever happens to be the case set up in the application for authority to operate. For instance there is a stage line operating between Susanville, California, and Reno, Nevada. The certificate issued to this line reads between Susanville and a point on the Nevada-California boundary, near Doyle, California. Among other operations terminating in territory beyond the border may be mentioned the San Francisco-Portland run of the Pickwick Stages, Northern Division, Inc.,

the Crescent City-Grants Pass (Ore.) Stage Line, Coast Auto Lines operating between Crescent City and Brookings, Oregon, and Woollet Stages between San Diego and Ensenada, Mexico.

OPERATION OF LEASED CARS.

Another order issued by the Commission during the year covered by this report was of a precedential nature in that it definitely fixed the manner in which operation of auto cars and trucks not owned by the franchised carrier must be conducted. Known as "General Order No. 67" this pronouncement by the Commission definitely prohibits the leasing of equipment and employment of drivers on a percentage basis, by carriers operating under the jurisdiction of the Commission.

For the further guidance of the operators of auto stage and truck lines a form of lease was provided. The order follows:

It is hereby ordered, that all transportation companies as defined in chapter 213, Laws of 1917, and amendments thereto, shall either own their equipment (proprietary control being deemed ownership) or lease such equipment for a specified amount on a trip or term basis, the leasing of equipment not to include the services of a driver or operator. All employment of drivers or operators of leased cars shall be made on the basis of a contract by which the driver or operator shall bear the relation of an employee to the transportation company by whom such operator or driver is engaged.

The practice of leasing equipment or employing drivers or operators on the basis of compensation on a percentage basis and dependent on the gross receipts per trip or for any period of time is hereby prohibited from the effective date hereof.

It is hereby further ordered, that each and every transportation company as defined by section 1 in paragraph (c) of chapter 213, Laws of 1917, and amendments thereto, be and it is hereby directed to execute a written lease covering each unit of equipment not owned by it as above stated, which lease shall fully set forth the conditions under which the unit of equipment is acquired, and shall include the term for which such equipment is leased, the compensation to be paid, the conditions regarding cancellation, etc. A true copy of said lease shall be immediately filed with the Railroad Commission in every instance where the equipment is leased for a period of ten (10) days or more.

It is hereby further ordered, that each agreement entered into by stage or truck companies, as hereinabove defined, with garages, rent car operators, individuals or companies owning machines, which agreement provides for the leasing of equipment upon short notice for a trip or term of less than ten (10) days, shall be executed in writing and a true copy thereof immediately filed with the Railroad Commission.

This General Order is in confirmation of and supplementary to the Railroad Commission's Decision No. 5318, dated April 17, 1918, and shall not be construed as revoking any of the findings or orders therein contained.

SUGGESTED FORM OF LEASE.

The suggested form of lease, covering the data necessary for compliance with the General Order follows:

This lease made and entered into at _____, California, this _____ day of _____, 192__, between _____ hereinafter called Lessor, and _____ hereinafter called Lessee,

WITNESSETH:

That in consideration of the sum of one dollar (\$1.00) each to other in hand paid, receipt whereof is hereby acknowledged and in consideration of each and every other and further payments and mutual covenants, conditions and agreements herein contained, the said Lessor does hereby lease to the said Lessee, and the said Lessee does hereby lease, hire and take from the said Lessor the following described personal property upon the terms, covenants and conditions hereinafter continued:

I.

The property hereby leased is as follows: _____ automobile (s) (or trucks), of _____ make; motor number _____, State license number _____ Lessor hereby represents that he is the sole owner thereof.

II.

The term of this lease is _____ months (years) (days), unless sooner cancelled by either party, it being the intention and understanding of the parties that this lease may be cancelled by either party upon giving to the other party written notice of _____ days of intention so to do.

III.

It is agreed that said automobile (or truck) shall be used by Lessee for the carriage of passengers (or freight) in the maintenance by him of his automobile passenger (or freight) stage line between _____ and _____, California, and that during the term of this lease, Lessee shall have the sole possession, custody and control of said automobile (or truck) at all times.

IV.

Lessor agrees to maintain and keep said automobile (or truck) in good repair and running order and pay all operating expenses (including such other or additional conditions as are agreed upon between parties), except the wages of the driver, licenses and insurance against public liability and property damage, which latter expense shall be borne by Lessee.

V.

Lessee shall provide a competent licensed driver for the operation of said vehicle and shall pay to Lessor as rental for said vehicle the sum of----- dollars for each one way trip (or such other payments on a trip or term basis as may be agreed upon between parties), said payments to be made (daily, weekly or monthly) and Lessee guarantees to pay in any event to Lessor a minimum rental for said vehicle of----- dollars per (week or month).

VI.

When not in use in said stage line service, said vehicle shall be stored in such garage as may be selected by Lessee.

VII.

If at any time during the lease term, Lessor shall fail properly to maintain said automobile or to keep same in condition for the safe transportation of passengers (or freight), or so that said vehicle does not comply with the regulations and requirements of the Railroad Commission, Lessee shall have the right to make such repairs upon said vehicle as in his judgment may be necessary and to charge the reasonable expense of same to the Lessor.

VIII.

It is agreed that said automobile (or truck) is to be used by Lessee in the performance of his duties as a common carrier of passengers (or freight) and in the maintenance of regular schedules between points hereinabove named and that in the event Lessor fails to perform the terms of this agreement on his part to be performed, Lessee will suffer great and irreparable damage, the exact nature and extent of which are unascertainable at this time, but in the event of failure or refusal of Lessor to so furnish and maintain the said automobile (or truck), Lessor shall pay to Lessee as liquidated damages for such failure a sum equal to----- for each and every day during which such failure shall continue and Lessee shall have a lien upon the said automobile (or truck) and upon the possession thereof until such damages shall have been paid for. (Provisions above mentioned, optional with parties.)

IX.

In the event that the Lessor be hereafter employed by the Lessee as driver of an automobile stage (or truck) it is hereby agreed that such employment shall have no connection with this lease, and shall in every instance be, and be deemed to be separate and distinct therefrom.

IN WITNESS whereof the said Lessor and the said Lessee have hereunto set their hands the day and year first above mentioned.

Lessor

Lessee

JOINT RATES ESTABLISHED.

While the establishment of joint and through rates by one or more stage and truck lines was not a proceeding finding its inception in the period covered by this report, the fact that such proceedings became noticeable because of their number in 1923-24 is significant. They indicate that travel by auto stages and shipment by truck are assuming such proportions that the convenience of the public is rapidly becoming the prime factor in the efforts of the operators in California to meet the traveling public's demands. They indicate further that there is on the part of the operators a recognition of the fact that no matter how small the service, or how large, big and little operators are more or less dependant one upon the other; that there must be cooperative effort if the traveling and shipping public is to be educated to the point where, almost instinctively, that share of the traffic which naturally and logically belongs to the stage and truck will turn to the paved highway for transportation.

Through and joint rates do not mean through service, in the commonly accepted view of the term. It does not mean, for instance, that the California Transit Company, which operates as one of its divisions,

between San Francisco and Merced and has joined rates with the Valley Transit, Merced to Bakersfield, and Motor Transit, Bakersfield to Los Angeles, may send a car direct through to Los Angeles over the route covered by its own franchise and the franchises of the other two carriers. It simply means that California Transit may sell in San Francisco or at any point on its lines, tickets to any point on the routes served by the other parties to the joint tariff, and that the other participating carriers may do likewise.

MUST CHANGE CARS.

Pickwick Stages, Northern Division, Inc., holds the only certificate for through service between San Francisco and Los Angeles, using the so-called Coast route. The joint arrangement of the other three carriers gives the traveling public a choice between the coast and the valley routes, the only difference being that travel by the joint arrangement requires a change of cars at Merced and at Bakersfield. No through service (the same car from terminal to terminal) could legally be given by any carriers participating in the joint arrangement without first securing from the Commission a certificate declaring that convenience and necessity require such a service, a proceeding demanding, in most cases, a public hearing.

There were several other joint ticket and rate arrangements authorized by the Commission in 1923-24 on application by the carriers, and there are several applications pending. There is a joint rate arrangement between California Transit and Yosemite Transit, covering territory between the San Francisco Bay and Santa Clara Valley on the one hand and between Stockton and Yosemite Valley boundary on the other. California Transit and Valley Transit also publish joint rates with the W. R. Miles Stage Line which operates to Huntington Lake, making it possible for the bay and valley lines to quote rates to points in the mountain territory, a most desirable arrangement in the summer or vacation period.

CONVENIENCE FOR PUBLIC.

While this joint arrangement, as has been shown, does not give through service in that the necessity for changing cars at terminal points is not obviated, there is a decided advantage to the public in the arrangement. A through rate may be quoted and one ticket for the whole journey, a portion of which is acceptable on each participating line, sold to the traveler. As a rule there is no monetary gain to the traveler in the joint arrangement, the rates quoted generally being a combination of the full local fares.

Joint rate arrangements between freight lines have also been approved by the Commission, as many as a dozen lines participating, particularly in southern California. Such an arrangement is a decided convenience to the shipper as it enables the carrier who receives the goods in the first instance to quote a rate to the final terminal (provided it is embraced in the joint arrangement) and insures delivery en route to a carrier qualified and authorized to transport to terminal point. It is equally advantageous to the receiver of goods.

USE OF AUTOS BY RAIL LINES.

Joint rate arrangements between rail lines and auto stage lines have been in effect for many years, the arrangement generally being between rail carriers and auto stage lines serving territory in which are located summer resorts or points noted as happy hunting grounds for devotees of the rod and the gun. For instance, rail carriers quote rates into Lake County, the latter part of the journey being made by auto. Rail rates to points in the Feather River country cover a trip made partly by rail and partly by auto. While this is not a general condition it is noticeable that the rail carriers have no hesitancy in utilizing the service of auto stage lines in furthering the desires of the public wishing to reach points beyond the service area of the rail lines.

Substitution of auto stage service for rail service, particularly in large cities and between cities closely allied, is becoming more marked, as the auto stage develops. In Los Angeles the Pacific Electric Railway has been authorized to discontinue several rail routes in favor of bus service, and the company is the holder of several certificates authorizing auto operation in territory not offering sufficient traffic to justify costly rail line extension. This company in 1923-24 bought and is operating the Huntington Park-Long Beach auto route of the Compton Transportation Company, which practically paralleled its rail lines.

During the year covered by this report the Commission issued to the San Francisco-Sacramento Railroad Company authority to operate an automotive service for the transportation of passengers and express between Walnut Creek and Diablo in Contra Costa County, the grant of a certificate following issuance by the Commission of an order permitting the company to abandon its rail service between the points named, because of nonprofitable operation.

Nevada-California-Oregon Railway is also conducting an auto passenger service as an adjunct to its rail service, operating between Alturas and Fort Bidwell via Cedarville.

Other rail lines holding certificates of convenience and necessity authorizing automotive transportation units are the San Diego Electric Railway Company, the San Diego and Arizona Railway Company, and the Key Transit System of Oakland, the latter a street railway system serving Oakland, Alameda and Berkeley and other cities and towns on the east shore of San Francisco Bay.

While it was not a case of substitution in the sense that the railroad became operators of the bus line, Coastside Transportation Company, an auto line, is now giving freight, express and passenger service where once the Ocean Shore Railroad operated between San Francisco and San Mateo County points along the shores of the Pacific. The rail line, after years of nonprofitable operation, was permitted to tear up its tracks. The last annual report of the Coastside Company shows that its operating expenses for the year 1923 were \$59,842.13; operating income, \$62,309.76.

An auto stage service has been established between Grass Valley and Nevada City, replacing the rail service that had been given for a number of years by the Nevada County Traction Company. The Traction Company has pending before the Commission an application to abandon service.

AUTO LINES NOT WANTED.

While the development of the auto stage as a common carrier has been general throughout the state, the advent of the public auto usually receiving the acclaim of all sections, there have been sections where strong opposition to the auto stage has been expressed. This stand, however, was not based on any opposition to the automobile as a method of transportation, but to a desire to protect a local rail service which in the minds of the citizens was of greater value to the community than they figured an auto carrier would prove to be. Objection to use of roads by bus lines on the score of needless wear and tear on the highway is occasionally advanced, but in the main, the principal objection is based on a choice of rail service, because of local conditions, as against auto stage service.

As a case in point may be mentioned the application of the Pacific Auto Stages for a certificate to operate an auto passenger line between San Francisco and Calistoga, via Golden Gate Ferry and Sausalito. Previous applications by others in this territory had been denied by the Commission on the ground that the applicants had not proved that public convenience and necessity required the service. There had been no particular community opposition, but with the filing of the application by the Pacific Auto Stages, there developed strong opposition and declarations by organization after organization that they were opposed to any competition which would tend to impair the efficiency or threaten the existence of the San Francisco, Napa and Calistoga Railway, an electric line operating between Calistoga and Vallejo, where connection was made with the Monticello Steamship Company for San Francisco. This was apart from the opposition voiced by other carriers.

OPPOSITION VOICED BY CLUBS.

Public hearings, largely attended, were held at Napa and at San Francisco. The applicant filed petition in support of the stage line signed by more than 2000 persons and 17 persons called as witnesses gave evidence in support of the auto service. The electric line called 15 witnesses in opposition, and 18 other witnesses were called by other protestants. Official communications from various organizations in the Napa Valley, including Napa County Board of Supervisors, Napa City Council, Napa Chamber of Commerce, Napa County Real Estate Board, Napa County Farm Bureau, Napa Kiwanis Club, Napa Grange No. 307, St. Helena Town Board, St. Helena Chamber of Commerce, St. Helena Women's Improvement Club, St. Helena Sanitarium, Calistoga Town Board, Calistoga District Chamber of Commerce, Lodi Farm Center, Tucker's Farm Center, Oak Knoll Farm Center, Salvador Farm Center, Rutherford Grange No. 371, protesting against the proposed operations by applicant, were filed with the Commission, as well as copies of editorials of the four Napa Valley newspapers, *Weekly Calistogian*, *St. Helena Star*, *Napa Daily Register*, and *Napa Journal*, all expressing opposition to the proposed operation.

The general testimony in support of the application was directed chiefly to the expectation of witnesses that the proposed operation would provide a considerable saving of time between Napa Valley points and San Francisco and that some convenience would be provided in the continuous character of the operations without change.

Several of applicant's witnesses, however, testified that they would not be in favor of the proposed operations if such operations would endanger the operations of the Electric Railway, regarded by all the witnesses as the main transportation facility and asset of the Napa Valley.

CERTIFICATE IS DENIED.

In its opinion accompanying the order denying the application the Commission used the following language:

The evidence submitted by the electric railway, indicates a declining trend in the total business done and in the number of passengers carried by this company. While this fact alone might not in some instances constitute a ground upon which the requirements of public convenience and necessity for other forms of transportation should be foregone in behalf of an existing carrier, considerable weight in this instance must be attached to the fact that this electric railway, with its large amount of invested capital, is serving a limited territory and that it provides the principal facilities for the handling of both the passenger traffic and the freight traffic to and from Napa Valley communities. With the strong protests from the substantial interests, business and agricultural, of the Napa communities against the proposed operations by applicant and against any proposed new transportation which would tend to divert traffic from the electric railway in its present struggling financial condition and with the evidence in this proceeding tending to show that applicant's primary claim to be able to provide a substantial saving in operating time is not well founded and further that applicant's time schedules would not provide for the traveling public from Napa Valley points the convenience that is now provided by the time schedules of the electric railway, it does not appear that the applicant has sustained its claim that public convenience and necessity require its operation as proposed in this application.

REPORTS SHOW PROFITS.

The annual reports filed by the auto stage and truck companies or operators, show that on the whole, they are, from the financial standpoint, in a healthy condition. While a few of the operators show losses the great majority submit reports revealing profitable operation. These reports are made up from records maintained according to a form prescribed by the Commission. The stage and truck lines are divided into two classes, "A" and "B" or, to be more specific, large and small. The large companies are those whose gross annual income totals \$20,000 a year and more; the small companies those whose income does not reach \$20,000. Reports required from the large companies cover in detail their financial operations, the Commission's "Uniform System of Accounting" providing full instructions as to how the record of receipts and expenditures and other financial transactions shall be maintained. From the smaller companies less detail is required, but they are required, nevertheless, to show in dollars and cents the result of their year's operations.

These reports play an important part in rate proceedings before the Commission. They are studied and analyzed in connection with all applications by auto carriers for rate increases, the information contained in the reports frequently offsetting claims by carriers that their operations are conducted at a loss. In other instances, they sustain contentions as to noncompensatory operations, in either case enabling the Commission to arrive at a just decision as to the reasonableness of the carrier's charges.

The following figures, taken from the reports filed for the calendar year 1923, show the operating receipts and expenditures of a number of the "Class A" passenger carriers, freight carriers and carriers of passengers and freight, with the number of cars in use, and the total number of passengers and tons of freight carried:

¹ Operated under one management.

² Household goods only.

³ Figure to right of dash refers to "other equipment" such as trailers.

The above lines operate in various parts of the state, the selections covering all kinds of territory and operating conditions.

NEARLY THIRTY MILLION PASSENGERS.

The financial statements or reports filed by the Class A auto stage and truck operators, (lines whose gross income is over \$20,000) show that this type of carrier transported 27,052,631 passengers from Janu-

ary 1, 1923, to December 31, 1923, and 590,855 tons of freight. In the same period the smaller companies, which greatly outnumber the large companies, transported 2,149,442 passengers and 242,390 tons of freight. The number of passengers carried by all the auto lines operating under the jurisdiction of the Commission totaled 29,202,073. The freight tonnage transported totaled 833,245.

MILLIONS IN EQUIPMENT.

The reports show that the Class B companies have a plant and equipment investment of \$1,925,144.68. The investment of the Class A companies in plant and equipment is given as \$11,632,831.14, a grand total of \$13,557,975.82. Included in the equipment are 1665 passenger cars, 1276 freight cars and 355 pieces of other equipment such as trailers, etc. This does not include cars and trucks leased from time to time to enable the carriers to meet traffic demands.

OPERATING REVENUE.

The operating revenues of the Class A companies reporting show a total of \$14,727,722.40. It was received from the following sources:

Passengers -----	\$9,113,041 32
Freight -----	3,911,917 21
Mail -----	215,079 32
Baggage -----	44,288 91
Express -----	1,090,501 72
Other sources -----	352,893 92

The operating revenues of the smaller companies reporting reached a total of \$2,827,258.46, divided as follows:

Passengers -----	\$882,490 85
Freight -----	1,165,752 04
Mail -----	336,728 29
Baggage and express -----	204,347 28
Other sources -----	237,940 00

The total operating revenue of all the auto stage and truck lines operating under the jurisdiction of the Commission during the calendar year 1923 amounted to \$17,554,980.86. The operating expenses of all the lines reporting totaled \$16,237,160.31.

The reports show that of the Class A companies reporting 46 show net loss from operations. Of the smaller companies reporting 82 show net loss from operations.

Full details of the financial operations of the auto stage and truck lines may be found in the second part of this annual report, which is devoted exclusively to statistical information concerning all the utilities operating under the jurisdiction of the Commission.

INFORMAL ADJUSTMENTS.

There were 266 informal complaints handled by the Auto Stage and Truck Department from June 30, 1923, to July 1, 1924. While the Commission has no jurisdiction over loss and damage claims, it makes every endeavor in an informal way, to bring about satisfactory adjustment of claims for reimbursement growing out of lost baggage and freight shortage disputes. There were 34 such complaints filed during the year covered by this report, a remarkably small number considering the extent of the field of operations. Among the other informal complaints filed were 50 based on rates, 22 requests for refunds, 64 charging inefficiencies in service and 83 dealing with illegal operations.

"WILD-CAT" CARRIERS.

In nearly every instance the charges of illegal operation were made by certificated carriers against truck and auto drivers operating as common carriers without having secured authority from the Commission. In but few instances did the complainants find it necessary to proceed to formal action, the informal efforts of the Commission usually resulting in cessation of the operation complained of.

While the problem presented by unauthorized operators using the highways as common carriers has not been solved to the extent that "wild-cat" carriers (the common name for auto stage and truck operators who give service between fixed points or over a regular route without complying with the law requiring that a certificate authorizing such operation be obtained from the Railroad Commission) have been entirely eliminated, the situation, particularly in the passenger carrying field, is much improved. The press has cooperated with the Commission in its efforts to drive irresponsible and illegal operators off the highways to the extent that publishers refuse to accept "ads" for trips unless the person offering such "ads" can show that the proposed service has been established under authority of the Commission. The police departments of Los Angeles and San Francisco have also aided the Commission.

CHAPTER XIV.

(Section 2.)

MOTOR TRANSPORTATION HISTORY AND
LEGISLATION.

ACT PASSED IN 1917.

The Auto Stage and Truck Transportation Act regulating auto stage and truck lines, their rates and their services became effective on May 1, 1917. All auto stage and truck lines operating in California on and prior to that date were required by a general order issued by the Railroad Commission, to which the act gave power to regulate stage lines and freight carriers using the highways, to file their tariffs of rates and time schedules. Since that date inauguration of new stage or truck lines or extension of existing lines has rested on a showing that public convenience and necessity (made generally at a public hearing) required establishment of any new service.

Desire of an individual or company, partnership or corporation to enter into the field as a common carrier of persons or property over the highways, between fixed points or over a regular route, weighs but little in the consideration of the Railroad Commission. Public convenience and necessity is and has been since May 1, 1917, the sole measure determining whether any proposed new service is required. Many certificates of convenience and necessity have been denied by the Commission mainly because applicants could not show by competent testimony that the service they proposed to give was required. They offered no proof that the carriers already in the field, either rail or auto, were not giving all the service the territory required, that the existing service was inadequate to meet the demands of the traveling or shipping public.

In not a few instances, however, the Commission recognized that certain features of proposed new services, such as the pickup and delivery of freight, more and greater freedom from time schedule restrictions of rail carriers making for more timely periods of arrival and departure, were such as to make the proposed service a desirable one. In other words, while the necessity for additional service was not outstanding, the convenience promised to the traveling and shipping public was of sufficient weight to justify issuance of a certificate permitting the establishment of the new service.

The matter of the jurisdiction of the Railroad Commission over auto stages and trucks using the highways as common carriers was first determined by the State Supreme Court in December, 1916, in a decision handed down following appeal to the high court by Western Association of Short Line Railroads, a corporation, organized to promote the interests of the short, independent railroads—steam and electric—operating in California and other western states, and United Railroads of San Francisco. These organizations had asked the Railroad Commission to regulate within the law, the transportation business of the so-called Wichita Transportation Company, which company admitted that it was engaged as a common carrier in the business of transporting

freight in motor trucks on the public highways of California between the cities of San Diego and El Centro, and the Peninsula Rapid Transit Company, operating a passenger transportation service between San Francisco and points south as far as the city of San Mateo. The Railroad Commission had refused to entertain the applications on the ground that, under the law, it had no jurisdiction. The court agreed with the Commission in the construction it placed upon the legislative enactments, but held that the power to regulate auto stages and trucks using the highways as common carriers was vested in the Commission by section 22, article XII of the constitution, as it was amended in 1911. The section creates the Railroad Commission and defines its powers. In doing so it declares:

Said Commission shall have the power to establish rates of charges for the transportation of passengers and freight by railroad and *other transportation companies* and no railroad or other transportation company shall charge or demand or collect or receive a greater or less or different compensation for such transportation of passengers or freight or for any service in connection therewith, between the points named in any tariff of rates, established by said Commission, than the rates, fares and charges which are specified in such tariff.

The Commission was thereupon directed to exercise the powers granted it by the constitution. Accordingly, the Commission directed the auto stage and truck lines to file their tariffs of rates. Shortly after the legislature of 1917 convened and among the acts passed was one definitely giving to the Railroad Commission regulatory powers over auto truck and stage lines operating over the public highways between fixed points or over regular routes. The only carriers exempted were those operating entirely within a municipality, taxicabs, hotel busses and sightseeing busses.

The first definite steps taken by the Railroad Commission to carry out the regulatory provisions contemplated by the legislature and made evident by the passage of chapter 213, Statutes of 1917, better known as the Auto Stage and Truck Transportation Act, began with a general investigation of the operation of auto stages and trucks operating as common carriers over the highways of the state. Known as Case No. 1110, the proceedings were in the nature of a general investigation of the fares, rates, classifications, rules and regulations governing auto service in every section of the state. Public hearings were held at Los Angeles on July 25, 1917, and at San Francisco on August 8, 1917.

RULES AND REGULATIONS.

At these hearings practically all the representative stage companies appeared, with the result that the Commission was enabled in the resultant Decision, No. 4814, to establish procedure covering the filing of rates and time schedules and formulate and put into effect a set of rules and regulations designed to give a maximum of safety to the public traveling by auto. These rules follow:

Maintenance.

1. Every motor vehicle shall be maintained in a safe and sanitary condition at all times and shall be at all times subject to the inspection of the commission and its duly authorized representatives.

Speedometers.

2. Every motor vehicle shall be equipped with a standard speedometer which shall be maintained in good working order.

Inside lights.

3. Every motor vehicle used in the transportation of passengers and having a covered top or top up, shall maintain a light or lights of not less than two candle power each within the vehicle and so arranged as to light up the whole of the interior of the vehicle, and such light or lights shall be kept constantly lighted between the hours of sunset and sunrise at all times when vehicle is occupied by passengers.

Extra tires.

4. Every motor vehicle used in the transportation of passengers shall when leaving either terminus be equipped with at least one (1) extra serviceable tire.

Brakes.

5. Every motor vehicle shall be equipped with satisfactory brakes and such brakes shall at all times be maintained in good condition and with a braking power sufficient to lock the rear wheels of said vehicle when brakes are fully applied and vehicle is operated at a speed of ten miles per hour.

Skid chains.

6. Every motor vehicle used in the transportation of passengers shall at all times carry a set of skid chains which shall be applied to the rear wheels whenever necessary to prevent skidding.

Warning device and fire protection.

7. Every motor vehicle shall be equipped with a suitable horn or other similar warning device.

Every motor vehicle used for the transportation of passengers shall be equipped with a liquid fire extinguisher of a design or type approved by the commission and such extinguisher shall be kept in satisfactory operative condition at all times.

Age and competency of drivers of motors.

8. Drivers of vehicles shall be at least twenty-one (21) years of age, of good moral character, shall be fully competent to operate the vehicles under their charge and shall hold license from the State Motor Vehicle Department as required by section 24, paragraph (a) of the Motor Vehicle Act.

Use of intoxicating liquor.

9. No driver or operator of any motor vehicle carrying passengers shall drink any intoxicating liquor during the time he is on duty or at any time use intoxicating liquor to excess.

Use of tobacco.

10. No driver or operator of any motor vehicle carrying passengers shall smoke any cigar, cigarette, tobacco or other substance in such vehicle during the time he is driving the vehicle.

11. No transportation company owning, controlling, operating or managing any motor vehicle used in the transportation of persons or property as a common carrier for compensation shall cause or allow any driver or operator of such motor vehicle to work as driver or operator for more than a maximum of ten (10) hours in any twenty-four (24) hour period.

Obligation to carry passengers.

12. No driver or operator of any motor vehicle for passenger transportation shall refuse to carry any person offering himself or herself at any regular stopping place for carriage and who tenders the regular fare to any regular stopping place on the route of said motor vehicle or between the termini thereof, unless at the time of such offer the seats of said motor vehicle are fully occupied; provided, however, that the driver or operator of such motor vehicle may refuse transportation to any person who is in an intoxicated condition or conducting himself in a boisterous or disorderly manner or is using profane language.

Overcrowding of vehicles.

13. No motor vehicle used in the transportation of passengers shall be allowed to carry more passengers than the rated carrying capacity as filed with the commission. Drivers and operators will not be permitted to allow passengers to ride on the running boards, fenders or any other part of the vehicle than the seats thereof.

No driver or operator of a motor vehicle used for passenger traffic shall permit or allow on the front seat of such motor vehicle more passengers than the seat is designed to carry, exclusive of the driver; or permit or allow any passenger to occupy any other portion of said vehicle forward of the back of the driver's seat.

No passenger shall be allowed to sit on the front seat to the left of the driver if a left-hand drive motor vehicle, or to the right of the driver if a right-hand drive motor vehicle.

No more than one passenger shall occupy the front seat of any motor vehicle with a touring car body, operated by center control.

Trailers.

14. Except when specially authorized by the Railroad Commission, no motor vehicle used in the transportation of passengers shall be operated or driven with any trailer or other vehicle attached thereto; except in case a vehicle becomes disabled while on a trip and is unable to run from its own power, such disabled car may be towed to the nearest point where repair facilities are available.

Loads on running board.

15. No motor vehicle used for the carriage of passengers shall be operated carrying or transporting any luggage, baggage, package, trunk, crate, or other load which shall extend more than eight inches beyond the running board of said motor vehicle.

Jurisdiction over regulations.

16. These rules and regulations shall prevail over and supersede every county or municipal rule or regulation in conflict therewith, but shall not be construed to prevail over or supersede any other rule or regulation lawfully in effect.

WAR BECOMES FACTOR.

While the world war, of itself, played no part in the formulation of the legislation affecting auto stages and trucks as passed by the California legislature of 1917, effects of the great struggle, into which this country entered on April 6, 1917, were shown at the hearings held by the Commission. War conditions forced a drastic reduction in the number and frequency of passenger trains. Similarly were freight train schedules reduced with the result that there was a diversion of short haul freight to automotive truck lines. Extension of territory devoted to agricultural purposes was an almost immediate result of this country's participation in the war, a result forecast by the demand for greater production of foodstuffs to supply the soldiery of not only our own land but those of the nations allied with the U. S. in the titanic task of curbing the militaristic designs of the nation against which most of the nations of the world were soon to be arrayed. In a measure, then, regulation of auto transportation, as undertaken by California legislation, though born of peace conditions, became regulation based on war's necessities. Such rules and regulations, however, as were promulgated by the Commission following the state wide investigation instituted under title of Case No. 1110, had in view, as a base, a return to the ways of a world of peace, a faith justified by the fact that fundamentally the Commission has not found it necessary to make any great change in its rules and regulations since the end of the war.

AUTO ACT IS AMENDED.

Changes have been made in chapter 213, however, the legislatures of 1919 and 1923 amending the act to meet conditions resulting from the unprecedented growth of the auto as a common carrier. Originally the act provided that before a carrier could obtain from the Commission authority to operate, it must obtain from each political subdivision of the state through which it proposed to operate, authority so to do. A carrier proposing to operate between, say, San Francisco and Los Angeles, would, under the act as passed originally, have to secure a permit to operate from the supervisors of each county traversed by the auto line, as well as a permit from each municipality along the line of travel. This, as was readily seen, was impracticable, and the legislature of 1919 amended the act so as to eliminate this requirement, and placed the question of operative rights squarely under the control of the Railroad Commission. This amendment, which became effective on July 22, 1919, also provided that any right, privilege, franchise or permit held, owned or obtained by any transportation company may be sold, leased or assigned provided that authority to make such transfer shall be obtained from the Commission.

FARM HAULS EXEMPTED.

As the law stood up to 1923 it required that before any person or company or corporation, anyone in fact, could transport persons or property for compensation over the highways between fixed termini or over a regular route for compensation, a certificate of convenience and necessity must be obtained from the Railroad Commission. The legislature of 1923 passed what was known as the Crittenden bill, which exempts from the necessity of securing such a certificate all those engaged in the business of moving farm products from a farm to an initial point, such as a shipping station, warehouse, creamery, packing house, commission house, store or any point of first delivery from a farm. Nor is, under this amendment, a certificate required by those who haul to a farm articles of husbandry or farm necessities. In other words, no certificate is required by those whose hauling begins or ends on a farm. The object of this legislation is, obviously, to facilitate the movement of crops or farm products.

The Crittenden bill provided also that a filing fee of \$50 must accompany each application for a certificate filed with the Commission; a fee of \$50 must also accompany each application for authority to transfer or lease an operating right. This fee is retained by the state no matter what the outcome of the application. No fee is required with applications to change rates or time schedules.

\$50 FILING FEE ENDS ABUSE.

The filing fee amendment is the outcome of abuses resulting from the fact that the state gave, free of all cost, the service necessary in the hearing of applications for authority to operate either a stage or a truck line. In a sufficient number of cases to justify the fee irresponsible persons, imbued with a desire to operate a stage line or a truck line, or frequently with nothing but a wish to put into public service a truck or car of which they happened to be the owner, or planned to purchase, applied for certificates. The Commission, provided the application covered territory already served by a carrier, either rail or auto, set a date for a public hearing, notified all persons interested, and on the date fixed sent an examiner and a reporter to the place of hearing, in many cases at a point entailing considerable expense to the state and to those who would be affected by the establishment of the proposed new service. Witnesses as to the adequacy of their service were summoned by existing carriers, the matter of expense to all concerned (except to the applicant) being considerable. The proceedings would be opened as per the Commissioner's calendar, and end with the opening. The applicant would not appear, evidently having learned subsequent to the filing of his application that the matter of securing a certificate was a proceeding involving something more than a mere desire to put into use a piece of equipment. Hence the fee.

The records of the Commission show that the fee requirement does not act as a bar to legitimate enterprises or limit in any way development of the automotive transportation field. It has served the purpose of eliminating the irresponsible.

FULL TEXT OF THE ACT.

Following is the full text of the act as it now reads:

AUTO STAGE AND TRUCK TRANSPORTATION.

CHAPTER 213, STATS. 1917.

[Approved May 10, 1917; amended by Ch. 280, Stats. 1919, p. 457, in effect July 22, 1919; amended by Ch. 310, Stats. 1923, effective Aug. 17, 1923.]

An act providing for the supervision and regulation of the transportation of persons and property for compensation over any public highway by automobiles, jitney busses, auto trucks, stages and auto stages; defining transportation companies and providing for the supervision and regulation thereof by the railroad commission; providing for the enforcement of the provisions of this act and for the punishment of violations thereof; and repealing all acts inconsistent with the provisions of this act.

The people of the State of California do enact as follows:

SECTION 1. (a) The term "corporation," when used in this act, means a corporation, a company, an association or a joint stock association.

(b) The term "person," when used in this act, means an individual, a firm or copartnership.

(c) The term "transportation company," when used in this act, means every corporation or person, their lessees, trustees, receivers or trustees appointed by any court whatsoever, owning, controlling, operating or managing, any automobile, jitney bus, auto truck, stage or auto stage used in the business of transportation of persons or property, or as a common carrier, for compensation, over any public highway in this state between fixed termini or over a regular route, and not operating exclusively within the limits of an incorporated city or town or of a city and county; *provided*, that the term "transportation company," as used in this act, shall not include corporations or persons, their lessees, trustees, receivers or trustees appointed by any court whatsoever, in so far as they own, control, operate or manage taxicabs, hotel busses or sightseeing busses, or any other carrier which does not come within the term "transportation company" as herein defined.

(d) The term "public highway," when used in this act, means every public street, road or highway in this state.

(e) The words "between fixed termini or over a regular route," when used in this act, mean the termini or route between or over which any transportation company usually or ordinarily operates any automobile, jitney bus, auto truck, stage or auto stage, even though there may be departures from said termini or route, whether such departures be periodic or irregular. Whether or not any automobile, jitney bus, auto truck, stage or auto stage is operated by a transportation company "between fixed termini or over a regular route" within the meaning of this act shall be a question of fact and the finding of the railroad commission thereon shall be final and shall not be subject to review.

SEC. 2. No corporation or person, their lessees, trustees, receivers or trustees appointed by any court whatsoever, shall operate any automobile, jitney bus, auto truck, stage or auto stage for the transportation of persons or property for compensation on any public highway in this state except in accordance with the provisions of this act.

[Section 3 repealed by Ch. 280, Stats. 1919; approved May 13, 1919.]

SEC. 4. The railroad commission of the State of California is hereby vested with power and authority to supervise and regulate every transportation company in this state; to fix the rates, fares, charges, classifications, rules and regulations of each such transportation company; to regulate the accounts, service and safety of operations of each such transportation company, to require the filing of annual and other reports and of other data by such transportation companies; and to supervise and regulate transportation companies in all other matters affecting the relationship between such companies and the traveling and shipping public. The railroad commission shall have power and authority, by general order or otherwise, to prescribe rules and regulations applicable to any and all transportation companies. The railroad commission, in the exercise of the jurisdiction conferred upon it by the constitution of this state and by this act, shall have power and authority to make orders and to prescribe rules and regulations affecting transportation companies, notwithstanding the provisions of any ordinance or permit of any incorporated city or town, city and county, or county, and in case of conflict between any such order, rule or regulation and any such ordinance or permit, the order, rule or regulation of the railroad commission shall in each instance prevail.

SEC. 5. No transportation company shall hereafter begin to operate any automobile, jitney bus, auto truck, stage or auto stage for the transportation of persons or property, for compensation, on any public highway in the state without first having obtained from the railroad commission a certificate declaring that public convenience and necessity require such operation, but no such certificate shall be required of any transportation company as to the fixed termini between which or the route over which it is actually operating in good faith at the time this act becomes effective, or for operations exclusively within the limits of an incorporated city, town, or city and county. Any right, privilege, franchise or permit held, owned or obtained by any transportation company may be sold, assigned, leased, transferred or inherited as other property, only upon authorization by the railroad commission. The railroad commission shall have power, with or without hearing, to issue said certificate as prayed for, or to refuse to issue the same, or to issue it for the partial exercise only of said privilege sought, and may attach to the exercise of the rights granted by said certificate such terms and conditions as, in its judgment, the public convenience and necessity may require.

The railroad commission may at any time for a good cause suspend and upon notice to the grantee of any certificate and opportunity to be heard revoke, alter or amend any certificate issued under the provisions of this section.

Each application for a certificate of public convenience and necessity or for an order authorizing the sale, leasing, assignment or transfer of an existing operative right, privilege, franchise or permit made under the provisions of this section must be accompanied by a fee of fifty dollars; provided, however, the movement of products or implements of husbandry and other farm necessities from farm to farm or from and to farm to and from loading point, warehouse or other initial point shall not be subject to the regulations of this act. [Amended by Ch. 310, Stats. of 1923.]

SEC. 6. No transportation company may issue any stock or stock certificate, or any bond, or any note or other evidence of indebtedness payable at a period of more than twelve months after the date thereof unless such transportation company, in addition to the other requirements of law, shall first have secured from the railroad commission an order authorizing such issue and stating the amount thereof and the purpose or purposes to which the issue or the proceeds thereof are to be applied and that, in the opinion of the railroad commission, the money, property or labor to be procured or paid for by such issue is reasonably required for the purpose or purposes specified in the order and that, except as otherwise permitted in the order in the case of bonds, notes and other evidences of indebtedness, such purpose or purposes are not, in whole or in part, reasonably chargeable to operating expenses or to income. Such order may be made, in the discretion of the railroad commission, either with or without a public hearing. Except as in this section otherwise provided, the provisions of section fifty-two of the public utilities act referring to the purposes for which stocks and stock certificates, bonds, notes and other evidences of indebtedness, may be issued and the application of and the accounting for the proceeds thereof, the powers and duties of the railroad commission and the rights and duties of public utilities with reference thereto, the legal status of stocks and stock certificates and of bonds, notes and other evidences of indebtedness, issued without an order of the railroad commission then in effect, and the relationship of the State of California to such stocks and stock certificates, and such bonds, notes and other evidences of indebtedness, shall apply to and govern the issue of stocks and stock certificates, and of bonds, notes and other evidences of indebtedness, of transportation companies with the same force and effect as though section fifty-two of the public utilities act were restated in this section with the substitution of the words "transportation company" for the words "public utility" and of the words "transportation companies" for the words "public utilities." The provisions of section fifty-seven of the public utilities act referring to fees to be charged and collected by the railroad commission for certificates authorizing the issue of bonds, notes or other evidences of indebtedness of public utilities shall apply to and govern authorizations by the railroad commission of the issue by transportation companies of bonds, notes or other evidences of indebtedness.

SEC. 7. In all respects in which the railroad commission has power and authority under the constitution of this state or this act, applications and complaints may be made and filed with the railroad commission, process issued, hearings held, opinions, orders and decisions made and filed, petitions for rehearing filed and acted upon, and petitions for writs of review or mandate filed with the supreme court of this state, considered and disposed of by said court, in the manner, under the conditions and subject to the limitations and with the effect specified in the public utilities act.

SEC. 8. Every officer, agent or employee of any corporation, and every other person who violates or fails to comply with, or who procures, aids or abets in the violation of any provision of this act, or who fails to obey, observe or comply with any order, decision, rule or regulation, direction, demand or requirement, or any part or provision thereof, of the railroad commission, or who procures, aids or abets any corporation or person in his failure to obey, observe or comply with any such order, decision, rule, direction, demand or regulation, or any part or provision thereof, is guilty of a misdemeanor and is punishable by a fine not exceeding one thousand dollars or by imprisonment in the county jail not exceeding one year, or by both such fine and imprisonment.

SEC. 9. Neither this act nor any provision thereof shall apply or be construed to apply to commerce with foreign nations or commerce among the several states of this union, except in so far as the same may be permitted under the provisions of the constitution of the United States and the acts of congress.

SEC. 10. If any section, subsection, sentence, clause or phrase of this act is for any reason held to be unconstitutional, such decision shall not affect the validity of the remaining portions of this act. The legislature hereby declares that it would have passed this act, and each section, subsection, sentence, clause and phrase thereof, irrespective of the fact that any one or more other sections, subsections, sentences, clauses or phrases be declared unconstitutional.

SEC. 11. All acts and parts of acts inconsistent with the provisions of this act are hereby repealed. The provisions of an act entitled "An act providing for the sale of street railroad and other franchises in counties and municipalities and providing conditions for the granting of such franchises by legislative or other governing bodies, and repealing conflicting acts (approved March 22, 1905; Stats. 1905, p. 777)," are declared not to apply to the use of highways for the kind of transportation herein regulated.

DEPARTMENT IS ORGANIZED.

The Auto Stage Department of the Commission was organized on July 1, 1921, the rapid development of the automobile stage and truck lines as common carriers making it necessary that the Commission make the task of regulating them as required by law the work of a personnel whose only duty would be to give to the new utility the same degree of expert attention and care given by the Commission to other carriers and to the other utilities giving service to the public.

CHAPTER XV.

CARRIERS BY WATER, FOOD WAREHOUSEMEN,
WAREHOUSEMEN AND WHARFINGERS.

Operators of vessels on the inland waters of the state, warehousemen who, for compensation, regularly store commodities in connection with the transportation of such commodities by a common carrier, warehousemen who store food products, and owners or operators of wharves and docks used in the public service are also under the jurisdiction of the Railroad Commission. Their rates and services are regulated in much the same manner as the rates and services of other public utilities, the Public Utilities Act requiring that warehousemen, wharfingers and carriers by water file with the Commission the rates, rules and regulations under which they operate. The legal requirements governing operations by food warehousemen are contained in what is known as "Food Warehousemen's Act," which was passed by the legislature of 1919. The Rate Department and the Auto Stage and Truck Department of the Commission have in charge the detail work required in connection with the regulation of these utilities.

CERTIFICATE NOW REQUIRED.

Prior to August 15, 1923, carriers operating on the inland waters of California were required to file their tariffs with the Railroad Commission only, thus bringing the matter of their rates and charges under the regulatory powers of the Commission. The 1923 session of the legislature amended the Public Utilities Act by adding to section 50 thereof the following paragraph, which is to the effect that on and after the effective date of the amendment, a certificate of convenience and necessity must be obtained before operation by carriers on the inland waters of the state may be undertaken:

(d) No corporation or person, their lessees, trustees, receivers or trustees appointed by any court whatsoever, shall hereafter operate or cause to be operated, any vessel between points exclusively on the inland waters of this state, without first having obtained from the Railroad Commission a certificate declaring that present or future public convenience and necessity require or will require, such operation, but no such certificate shall be required of any corporation or person which is actually operating vessels in good faith, at the time this act becomes effective, between points exclusively on the inland waters of this state under tariffs and schedules of such corporations or persons, lawfully on file with the Railroad Commission.

Every applicant for a certificate shall file in the office of the Commission, application and evidence in such form as shall be required by the Commission, and the Commission shall have power, after hearing, to issue said certificate, as prayed for, or to refuse to issue the same, or to issue it for operation between certain points only.

When a complaint has been filed with the Commission alleging that any vessel is being operated without a certificate of public necessity and convenience, as required by the provisions of this subsection, the Commission shall have the power, with or without notice, to make its order requiring the corporation, or person, their lessees, trustees, receivers or trustees appointed by any court whatsoever, operating or managing such vessel, to cease and desist from such operation, until the Commission makes and files its decision on said complaint, or until further order of the Commission.

SAN FRANCISCO BAY AND TRIBUTARIES.

Five certificates were granted during the year covered by this report, four covering service on San Francisco Bay and tributaries and the fifth covering service between points on Humboldt Bay. Including the tariffs of these carriers the Commission has on file tariffs of 111 carriers

by water. About 95 per cent of these carriers are operating on the bay of San Francisco and the waters tributary thereto, such as the Sacramento and San Joaquin rivers, Suisun Bay, San Pablo Bay, Carquinez Straits, Napa River, and many large navigable sloughs off the rivers.

Paragraph (y) of section 2 of the Public Utilities Act describes what is meant by vessel in the following language:

(y) The term "vessel" when used in this act, includes every species of water craft, by whatsoever power operated, which is owned, controlled, operated or managed for public use in the transportation of persons or property, except row-boats, sailing boats, and barges under twenty tons dead weight carrying capacity, and vessels propelled by steam, gas, fluid naphtha, electricity, or other motive power under the burden of five tons net register.

WAREHOUSEMEN WARNED.

In the latter part of the fiscal year covered by this report, the Commission, acting on information received from various sources, took up with California public warehousemen the matter of deviations from published tariffs. In a letter addressed "To all Warehousemen" the Commission said:

Reports unconfirmed by specific charges have come to our attention that legal published rates as carried in tariffs of the different public warehousemen are not being literally applied in all instances.

This was followed by quotations from the Public Utilities Act showing that the act provides for a fine of \$1,000 and imprisonment for one year, or both, for utility officials, agents or employees failing to obey the law, with particular reference to the matter of charging other than the rates shown in published tariffs and the practice of giving rebates or refunds. This letter also brought out the fact that the law also provides a substantial penalty for other than utility officials, agents, or employees who violate the law.

"The Commission" the letter of warning concluded, "expects interested parties, not only the public utilities, but the storer of commodities, to familiarize themselves with the law in order that formal prosecutions may be unnecessary."

The Public Utilities Act in section 2 (aa) uses the following language in describing what constitutes a warehouseman:

The term "warehouseman" when used in this act, includes every corporation or person, their lessees, trustees, receivers or trustees appointed by any court whatsoever, owning, controlling, operating or managing any building or structure in which property is regularly stored for compensation within this state, in connection with or to facilitate the transportation of property by a common carrier or vessel, or the loading or unloading of the same, other than a dock, wharf or structure owned, operated, controlled or managed by a wharfinger.

Records of the Commission show that there are 319 warehouses answering the foregoing description operating in the state.

FOOD WAREHOUSEMEN.

The "Food Warehousemen's Act" was passed by the legislature of 1919, the purpose of the act, as declared in section 12 of the act itself, being

* * * to safeguard the public against the creation and perpetuation of monopolies, and to foster and encourage competition, by prohibiting unfair and discriminating practices by which fair and honest competition is destroyed. The legislature hereby further declares that food warehousemen, as defined in section two of this act, are engaged in a business, tending to monopoly, and that by reason of such monopolistic tendency and by reason of its vital connection with the distribution of public necessities, such business is clothed with a public interest and subject to public regulation and control for the public welfare as a public utility, as in this act provided. This act shall be liberally construed that its beneficial purpose may be subserved. The remedies herein prescribed are cumulative. If any conflict shall arise between this act and the public utilities act, the latter shall prevail.

Section 1 of the act says that the "term 'food commodities' as used in the act shall be construed to mean all products, stuffs, preparations, substances, or articles which are customary or proper for food for human beings, and shall include meat and meat products, fruit, vegetables, fresh fish, shellfish, game, poultry, eggs, butter, cheese and milk."

The term "food warehouseman" according to section 2 of the act shall be construed to mean:

Every person, or corporation, their lessees, trustees, receivers or trustees appointed by any court whatsoever owning, controlling, operating, or managing any building, structure, warehouse, elevator or plant in which food commodities, regularly received from the public generally, are stored for compensation, including cold storage plants and refrigerating plants, but not including private homes, hotels, restaurants or exclusively retail establishments or others not storing articles of food for other persons for compensation.

The Commission has on file the tariffs of 41 food warehousemen.

WHARF OPERATORS.

There are 33 wharfingers operating in the state whose activities are such as to bring them within the purview of the Public Utilities Act:

The term "wharfinger," when used in the act,

includes every corporation or person, their lessees, trustees, receivers or trustees, appointed by any court whatsoever, owning, controlling, operating or managing any dock, wharf or structure used by vessels in connection with or to facilitate the receipt or discharge of freight or passengers for compensation within this state.

In the fiscal year 1923-24, while there were no major proceedings of general interest in connection with the regulation of the warehouses (both groups), wharfingers and water carriers, there were a number of matters involving these utilities which were of particular interest to the utilities themselves. Four Chico warehouses were granted authority to increase their season rates on grain after a showing that the rates they had been charging for years had been made noncompensatory by increased operating costs. Eleven warehouses canceled their tariffs and were permitted to discontinue service.

UNREASONABLY LOW RATE.

A carrier by water having put into effect, without authority of the Commission, an extremely low rate for transporting potatoes and onions, was ordered to restore his original rate. This order was issued following an investigation which showed that the new rate was unreasonable in that it was too low to be profitable and if maintained, would work a distinct hardship on other carriers, tend towards a destruction of service standards, and thus eventually injure the producers and shippers.

Many informal complaints based on disputes over rates and service between shippers and carriers and warehousemen, were adjusted by the Commission.

PART TWO

STATISTICAL REPORT

AUTO STAGES AND AUTO TRUCKS

Names and Business Addresses of Automotive Transportation Companies

Tables 1 to 4, Inclusive

AUTO STAGES AND AUTO TRUCKS.

List of Officers of Auto Stage and Truck Companies as Reported in Annual Reports Filed With the Railroad Commission for the Year Ending December 31, 1923.

Atlas Mail and Stage.

C. H. Biggs, 2287 Second street, Napa, California.

Angels Camp and Murphys Auto Stage Line.

Nativo Celayo, Angels Camp, California.

Aruturian, Giegoroff and Sahakian Truck Line.

M. Aruturian, Manager, 673 Echandia street, Los Angeles, California.

Alpaugh-Angiola Stage.

E. T. Ryker, Alpaugh, California.

A. B. C. Transportation Company.

Los, Angeles, California.

Auto Transit Company.

George H. Higgins, President, 5 Seventh street, San Francisco, California.

Arroyo Seco Stage Line.

N. A. Webb, 55 S. Fair Oaks, Pasadena, California.

M. Anderson Truck Service.

686 E. Ninth street, Pomona, California.

Alturas and Cedarville Stage Company.

Delmas and Frailey, Cedarville, California.

The Alpha Company Auto Truck Service.

F. F. Cassidy, President, Nevada City, California;
George A. Legg, Agent.

A. M. Atkins and Sons.

Lower Lake, California.

Aetna and Pope Stage.

W. B. Twitchell, St. Helena, California.

Associated Transit Company.

764 Stanford avenue, Los Angeles, California.

Anderson's Auto Passenger Line.

W. H. Anderson, Randsburg, California.

E. L. Askin Truck Line.

Lemon Cove, California.

Alturas-Bieber Stage Line.

Kemble and Estes, Alturas, California.

Anderson and Allen.

Knights Landing, California.

Auburn-Forest Hill Stage.

M. C. Langstaff, Forest Hill, California.

The Ambler Truck Line.

Gleason Ambler, Mesa Grande, California.

American Transfer and Auto Delivery Company.

Hudson, Hudson and Githin, Owners, 229 E. First street, Long Beach, California;
Lynn C. Hudson, Manager.

Allison Auto Express.

O. C. Allison, 4238 S. Harvard boulevard, Los Angeles, California.

Alder Point-Bridgeville Auto Line.

E. Wilkinson, Bridgeville, California.

Alder Point-Hoaglin Auto Stage.

Wilkinson Brothers, Alder Point, California.

Alhambra-Los Angeles Express.

100-102 S. Garfield avenue, Alhambra, California.

Arroyo Grande-Oceano Truck Line.

John Bardieu, Arroyo Grande, California.

Bab Arutoff.

255 N. Anderson street, Los Angeles, California.

Anaheim Transit Company.

Scott and Dwy, 927 N. Zeyn street, Anaheim, California.

Auburn-Georgetown Stage.

C. W. Ganow, Georgetown, California.

Auto Package Delivery.

Berdie M. Macey, 327 N. San Pedro street, Los Angeles, California.

Ashton Truck Company.

A. P. Ashton, 508 Third street, Los Angeles, California.

Azevedo's Auto Stage Line.

Wm. Azevedo, Half Moon Bay, California.

Annapolis-Stewart's Point Stage.

Edward Mitchell, Annapolis, California.

Alder Point-Harris Stage.

George N. Mathison, Alder Point, California.

American Stage Line.

George M. Brice, Ferndale, California.

Arcata-Samoa Auto Line.

Donald McPherson, Arcata, California.

Allen and Reese Stages.

Union Stage Depot, Fresno, California.

J. F. Baker Auto Line.

Copperopolis, California.

Benedict and Moorman.

124 E. Randolph street, Huntington Park, California.

Bellflower Truck and Transfer.

731 Stanford avenue, Los Angeles, California.

Burbank Transfer.

F. A. Mullens, 269 N. Orange Grove, Burbank, California.

Bay City Hauling Company.

Chew Chick, P. O. Box 130, Menlo Park, California.

Bishop and Laws Freight Line.

Pioneer Livery and Lumber Company, Bishop, California.

Lee Belden Milk Truck.

601 E. Fifth street, Los Angeles, California.

Boyd and Mattly Stage Company.

1800 Chester avenue, Bakersfield, California.

Besones' Motor Express.

Joe Besones, 1600 T street, Bakersfield, California.

Boulevard Express, Incorporated.

C. D. Boynton, 335 W. G street, San Diego, California.

Bacon Service Corporation.

M. W. Bacon, Sanger, California.

Beverly Hills and Sherman Transfer.

A. A. Hardie, Owner, 572 S. Alameda street, Los Angeles, California.

Bakersfield-Buttonwillow Auto Stage Line.

Wm. Giminiani, 1200 Nineteenth street, Bakersfield, California.

Bisher's Truck Line.

A. C. Bisher, Ramona, California.

Bakersfield-Glenville Stage.

E. A. Murdock, Terrace way, Bakersfield, California.

Benicia-Vallejo Stage Line.

M. Passalacqua, Owner, Benicia, California.

Bakersfield and Los Angeles Fast Freight, Incorporated.

George M. Duntley, President, 525 Crocker street, Los Angeles, California.

Big Pine and Zurich Auto Stage Line.

R. H. Logan, Big Pine, Inyo County, California.

Bandetti and Villanti Truck Line.

520 Front street, San Francisco, California.

Beswick-Ager Auto Line.

H. H. Hessig, Beswick, California.

Bridgeport, Bodie and Mono Lake Stage Route.

J. T. McAlee, Bridgeport, California.

Bay Cities Transit Company.

Fred Walker, Treasurer, 1726 Fourth street, Sawtelle, California.

Becher Mail Stage.

J. Becher, Pleasant Valley, California.

Biggs and Sacramento Northern Stage Line.

W. M. Grein, Biggs, California.

Belvedere Bus.

Wm. Barr, Belvedere, California.

Blairsdon Stage Company.

Estate of C. A. Lemm, Blairsdon, California.

Bridgeville-Ruth Stage Line.

Hutchens and Burgard, Bridgeville, California.

Belyea Truck Company.

H. W. Belyea, 2151 E. Ninth street, Los Angeles, California.

Boulder Creek Stage Line.

Amy G. Harvey, 294 Mission street, Santa Cruz, California.

Bradley-Bryson Stage.

Clyde S. Dayton, Proprietor, Pleyto, California.

Bolton and Bennett Freight Line.

I. J. Bennett, Route A, Box 502, Fresno, California.

Blocksburg-Fort Seward Auto Line.

O. A. Cooper, Blocksburg, California.

Burke Sanitarium Auto Bus.

John W. Wilson, Burke, California.

Bakersfield-Wasco-Lost Hills Stage Line.

P. Dal Porto, 1800 Chester avenue, Bakersfield, California.

Bakersfield-Shafter Auto Truck.

Mrs. F. C. Williams, Shafter, California.

N. Boronda Mail Stage.

743 Abrego street, Monterey, California.

B. and H, Transportation Company.

C. D. Trumbull, Secretary, 104 East Ocean avenue, Long Beach, California.

Bishop-Mono Lake Auto Stage Line.

Wilkins and Larsen, address from October 1 to June 1: 406 Salem street, Glendale, California; from June 1 to October 1: Bishop, California.

Big Bar-Burnt Ranch-Sayler-Willow Creek-Hoopa Stage Line.

Z. Hailstone, Burnt Ranch, California.

Bay Shore Drayage Company.

W. J. Harris, 300 Franklin street, Oakland, California.

Blairsden-Lake Center Stage.

Green and Green, Blairsden, California.

Blue Nose-Happy Camp Auto Line.

David Drake, Somes Bar, California.

Borderland Express.

W. J. Gibson, Owner, 660 Broadway, El Centro, California.

G. W. Boutell Mail Stage.

San Benito, California.

Belvedere Gardens Bus Lines.

A. B. Dunphy, 531 S. Rowan avenue, Los Angeles, California.

Bay Rapid Transit Company.

A. J. Mason Monterey, California.

Barrere Auto Freight Line.

Jos. Barrere, 1073 Forty-seventh street, Oakland, California.

Bekins Fireproof Storage.

1335 S. Figueroa street, Los Angeles, California.

Best Stage Lines.

J. C. Best, Santa Ana, California.

Coast Truck Line.

George W. Hanchett, President;

Lee G. Warren, Secretary, 334 San Fernando Bldg., Los Angeles, California.

Crescent Mills-Seneca Stage Line.

I. N. Short, Greenville, California.

C. C. Transportation and Garage Company.

Los Angeles, California.

Citizens Auto Stage Company.

Frank Davies, Owner, Nevada City, California.

Chico-De Sabla Stage.

W. A. Bailey, 4641 Eighth street, Chico, California.

Covelo Stage Line.

W. G. Goforth, Covelo, California.

Cutler-Badger Stage.

R. Venard, Cutler, California.

Crown Stage Line.

A. B. Watson, Proprietor, 515 N. Main street, Santa Ana, California.

California Truck Company.

H. B. Safford, Secretary, Los Angeles, California.

Chilcoot-Downieville Stage Line.

C. Dubourdieu, Jr., Sierraville, California.

Campo Seco-Valley Springs Stage Line.

Edward Maher, Campo Seco, California.

Citrus Belt Bus Line.

V. W. Neher, La Verne, California.

Chico-Willows Stage.

E. R. Blue, Chico, California.

Coronado-Imperial Beach Stage.

Plen Mathews, Imperial Beach, California.

Consolidated Motor Freight Lines, Incorporated.

E. N. Walter, President;

A. A. McFarland, Vice President, Clay street dock, Oakland California;

J. B. McFarland, Secretary, 625 First National Bank Building, San Francisco, California.

Chico-Butte City-Princeton Stage.

Burke and Hughes, Chico, California.

Clark's Sacramento-Plymouth Auto Stage Line.

S. C. Clark, 207 K street, Sacramento, California.

Citizens Truck Company.

E. A. Cochran, Secretary, Los Angeles, California.

Compton Transportation Company, Incorporated.

W. W. Compton, General Manager, 143 E. Ocean avenue, Long Beach, California.

Carson-Tahoe Transportation Company.

A. L. Richardson, Placerville, California.

Coachella Valley Transportation Company.

Raymond Davis and H. E. Smith, 353 E. Second street, Pomona, California.

Cloverdale Geyser Stage.

Natalie Bacci, Cloverdale, California.

Chino Express and Transfer.

Galbreath and Galbreath, Chino, California.

Carmel-Monterey Stage.

C. O. Goold, Carmel California.

Coast Transit Company.

C. L. Simonds, 131 Pacific avenue, Santa Cruz, California.

Camp Elwell Stage.

W. F. Drew, Blairsden, California.

Concord-Avon Stage Line.

W. V. Hogan, Concord, California.

City Transfer and Storage Company.

140 Pacific avenue, Long Beach, California.

Coastside Transportation Company.

Serretto, Mattei and Michel, Union Stage Depot, Fifth and Mission streets, San Francisco, California.

Coulterville-Kinsley Auto Line.

Philip Noce, Coulterville, California.

Chico-Paradise-Sterling City Stage Company.

A. A. Johnson, Manager, Hotel Butte, Chico, California.

Compton Transfer Company.

E. P. Tallon and F. J. Stanley, 230 E. Main street, Compton, California.

Cienega Auto Stage Line.

A. Elliott, Owner, Cienega, California.

The Cloverdale-Elk-Navarro Stage.

Ledford and Hulbert, Cloverdale, California.

Coast Line Stages, Incorporated.

Allen and Olinsky, Fort Bragg, California.

Cottonwood and Shingleton Stage Company.

H. A. and J. M. Cleland, Cottonwood, California.

Coalinga Paso Robles Auto Stage.

Benj. J. Byles, P. O. Box 175, 612 Van Ness avenue, Coalinga, California.

Crescent City and Grants Pass Stage Line.

McVay and Hiller, Crescent City, California.

Calistoga-Middletown Truck.

Benj. Hunt, Middletown, California.

California Transit Company.

W. E. Travis, President, 1919 Market street, Oakland, California.

Coast Auto Lines.

G. W. Bryant, Manager, Coquille, Oregon.

Columbia Stage Line.

Geo. M. Trask, Columbia, California.

California Highways Express.

Harry Gorman, Secretary;

D. C. Bole, Treasurer, 948 Market street, San Francisco, California.

Chico-Westwood-Susanville Stage.

Houck and Smith, Owners, 4421 Third street, Chico, California.

H. A. Condra Mail Stage.

H. A. Condra, Owner, Los Alamitos, California.

H. Campodonico Draying Company.

116 Washington street, San Francisco, California.

Colfax-Forest Hill Stage Line.

M. C. Langstaff, Forest Hill, California.

Cascada-Huntington Lake Stage Company.

D. A. Munger, General Manager;

C. P. Staal, Auditor.

Business address, Edison Building, Los Angeles, California.

Copperopolis and Milton Auto Stage.

Jos. Descamp, Copperopolis, California.

Camp Wishon Stage Line.

C. A. Kirkpatrick, Manager, Box 504, Porterville, California.

Calistoga-Clear Lake Stage Line.

Wm. Spiers, Calistoga, California.

Colusa-Grimes Auto Stage.

W. A. Gilett, Colusa, California.

John Cheap Stage Line.

John Cheap, 323 C street, Oxnard, California.

Chico-Red Bluff Auto Stage.

M. Bernardo, Park Hotel, Chico, California.

Camp Nelson Auto Stage Line.

C. B. Smith, Springville, California.

Cuyama Valley Scenic Stage Line.

O. P. Hazard, Arroyo Grande, California.

Clovis-Fresno Stage Company.

Crabb, Morgan and Crabb, Union Stage Depot, Fresno, California.

Dear Stage Lines.

Robt. C. Dear, Owner, Box 1312, Taft, California.

Dos Palos Passenger and Freight Line.

Carl S. Painter, Dos Palos, California.

Downieville Stage Company.

M. P. Fisher, Downieville, California.

Diamond Transport and Storage Company.

F. F. Balzer, Owner, 839 San Julian street, Los Angeles, California.

Ducor-California Hot Springs Stage Line.

F. A. Minaker, Hot Springs, California.

Dunham Auto Stage.

A. Dunham, 826 Second street, Santa Rosa, California.

Drayage Service Corporation.

W. P. Scott, Manager, Fourth and Castro streets, Oakland, California.

Donner Lake-Truckee Auto Stage Line.

W. B. Gelatt, Owner, 915 Balboa Building, San Francisco, California.

Donlay's Milk Truck.

Elmer Donlay, Hynes, California.

Dorris Stage and Freight Line.

R. D. Dorris, Forest, California.

Donovan Transportation Company.

A. E. Donovan, President, 103 Emerald street, Redondo Beach, California.

Deep Springs Auto Stage.

Abe Ransome, Administrator, R.F.D. No. 1, Bishop, California.

Dardanelle Stage Line.

C. F. Whipple, Sonora, California.

Dunsmuir-Sisson-Weed Stage Line.

G. L. Morrison, Dunsmuir, California.

Edelblute's Truck Line Service.

J. L. Edelblute, Santa Ynez, California.

Escondido Truck Line.

Elmer Webb, Escondido, California.

El Dorado Motor Transportation Company, Incorporated.

F. A. Fawcett, Secretary and General Manager, 521 S street, Sacramento, California.

El Monte Transfer Company.

W. H. Cullen, Box 127, El Monte, California.

Eureka-Garberville Truck Line.

Bridges and Bridges, 2415 J street, Eureka, California.

J. O. Ernst.

209½ E. Thirty-second street, Los Angeles, California.

Eagleville-Cedarville Auto Line.

L. S. Tripp, Eagleville, California.

Etna-Fort Jones-Yreka Stage Line.

C. A. Reichman, Fort Jones, California.

Escondido-Palomar Auto Line.

Hoxie, Hubbard and Stewart, Escondido, California.

Elk Creek-Alder Springs Auto Line.

J. F. Bickford, Elk Creek, California.

El Segundo Transit Company.

O. C. Dwy, 927 N. Zeyn street, Anaheim, California.

Eureka-Bridgeville Auto Line.

W. B. Shively, 2624 F street, Eureka, California.

Freshwater Auto Stage Line.

Wm. Lolax, Freshwater, California.

Fresno-Coalinga Stage Company.

Frank Roberson, 3153 Huntington boulevard, Fresno, California.

Fort Bragg-Westport Stage.

E. T. Stoddard, Fort Bragg, California.

C. R. Fudge Auto Line.

Collins Hotel, 1032 H street, Fresno, California.

A. G. Fruits Stage Line.

A. G. Fruits, Tres Pinos, California.

Fresno-Orange Cove Auto Line.

H. H. Hardwick, Anchor Stage Depot, Fresno, California.

French Gulch-Carrville Stage Line.

Basham and Brown, Carrville, California.

Fresno-Cutler Auto Truck.

Schmidt and Emick, 2255 Rose avenue Fresno, California.

Fresno-Kerman-Calwa Anchor Line Stage.

E. J. Thompson, Mono and J streets, Fresno, California.

Fallbrook and Oceanside Stage Line.

Jay G. Tucker, Fallbrook, California.

Folsom-Sacramento Auto Truck.

F. W. Wales, Folsom, California.

Forbestown Stage Line.

E. A. Boehme, Oroville, California.

C. F. Fredericksen and Sons.

Lower Lake, California.

Fresno-Reedley Auto Truck.

C. L. Fortier and Sons, Reedley, California.

Fresno-Visalia Truck Line.

G. C. Scribner, 2037 S. Van Ness avenue, Fresno, California.

Ralph Follows Stage Line.

Ralph M. Follows, Azusa, California.

Fort Jones-Scott Bar Auto Line.

M. O. Payne, Scott Bar, California.

Fresno-Riverdale Stage Company.

E. B. Harris, Riverdale, California.

Jos. Fauci.

759 N. Point street, San Francisco, California.

Foss and Foss.

1621 Josephine street, Berkeley, California.

John Faria.

Box 42, Newark, California.

H. Frasher Truck Line.

1235 G street, Fresno, California.

Fresno-Auberry Motor Freight Line.

Vern Heliot, Prather, California.

A. B. Forest.

242 West street, Healdsburg, California.

Fresno-Caruthers Truck Line.

J. O. Bray, Caruthers, California.

Glendale Interurban Express.

R. V. Hardie, 501 Fischer street, Glendale, California.

Geyserville-Navarro Truck.

George W. and J. M. Johnson, Philo, California.

Gilroy Express.

Bell and Griffin, Gilroy, California.

Gardena and Los Angeles Express.

W. F. Boehlert, 578 S. Alameda street, Los Angeles, California.

Glendale and Los Angeles Transportation Company.

Jas. H. Little and C. H. King, 304 S. Brand boulevard, Glendale, California.

Golden Eagle Barker Stage.

Aronson and Boswell, Roseville, California.

Guadalupe-Betteravia Stage Company.

A. G. Chapman, Guadalupe, California.

Gardnerville Transportation Company.

H. G. Anderson, General Manager, Gardnerville, Nevada.

Georgetown-Placerville Stage.

Lester Heindel, Georgetown, California.

Gibson's Express.

C. S. McLenegan, 875 Folsom street, San Francisco, California.

Gilroy Hot Springs Stage.

E. D. Soward, Gilroy, California.

J. E. Garcia.

605 Sybil avenue, San Leandro, California.

Richard Gribble.

Junction City, California.

Gridley Auto Bus Company.

R. Hancock, General Manager, Gridley, California.

Goleta Bus and Messenger Service.

H. A. Spreitz, 622 Anacapa street, Santa Barbara, California.

Wm. Giacomazi.

598 S. Fifteenth street, San Jose, California.

Greene and Greene.

Colma, California.

Garberville-Briceland Auto Line.

Garberville Mercantile Company, Garberville, California.

J. B. Grissell and Company.

Nevada City, California.

Granger's Truck Service.

F. W. Granger, Pomona, California.

Garrison's Auto Freight Line Service.

A. Garrison, Redding, California.

Hicks and Vassalo.

27 S. Hunter street, Stockton, California.

Erben J. Henry.

300 N. Los Angeles street, Los Angeles, California.

Hodges' San Juan-San Jose Auto Freight Line.

Baldwin Park, California.

Tijuana Express.

B. H. Steel and F. V. Sanelements, San Diego, California.

Triangle and Orange County Express.

S. B. Cowan, Manager, 432 S. Alameda street, Los Angeles, California.

Tustin-Santa Ana Stage Line.

S. Scott Prather, Millard Foster, Tustin, California.

Thomas and Son Transfer Company.

P. O. Box 23, Terminal, California.

Torrance Transfer Company.

H. M. Tolson, Torrance, California.

Triangle Transfer Company.

Fletcher and Cobb, Box 53, Sanger, California.

Tucker Truck and Transportation Company.

J. P. Tucker, 327 N. San Pedro street, Los Angeles, California.

Travelers Stage.

R. O. Douglas, Folsom, California.

Truckee-Sierraville Freight and Passenger Line.

Chas. E. Smith, Truckee, California.

David W. Taylor.

5250 Claremont avenue, Oakland, California.

A. E. Thym Stage Line.

Mokelumne Hill, California.

Thompson's Truck.

L. E. Thompson, Escalon, California.

Tally and Tally.

Seymour Tally, Manager, 833 S. Broadway, Los Angeles, California.

Tassajara Hot Springs Stage.

Vanderhurst and Duda, 17 Natividad street, Salinas, California.

Terminal Island Transportation Company.

Vinton and Vinton, Terminal Island, Los Angeles, California.

Turney Auto Parts Delivery.

315 W. Philadelphia street, Whittier, California.

United Parcel Service.

J. E. Casey, President, 418 W. Eleventh street, Los Angeles, California.

United Parcel Service.

J. E. Casey, President, 690 Fifteenth street, Oakland, California.

United Transfer Company.

N. M. Monsch, President, 538 Seventeenth street, Oakland, California;
Frank Buffum, Secretary.

Union Transfer and Storage Company.

Jos. Zerboni, Ocean Park, California.

Ukiah and Upper Lake Stage Line.

W. H. Miller, Ukiah, California.

United Stages, Incorporated.

T. Morgan, President, 411 Stanford avenue, Los Angeles, California.

University Auto Line.

James Borden, 741 W. Eighth street, Riverside, California.

United Parcel Service of Los Angeles, Incorporated.

J. E. Casey, President, 418 W. Eleventh street, Los Angeles, California.

Veramont and Genesee Auto Line.

J. H. Taresh, Taylorsville, California.

Verdugo Hills Transportation Company.

W. C. Dunlap, President, San Fernando, California;
E. W. Morgan, Secretary.

Vallejo Bus Company.

H. N. Richards, V. O. Gorst, H. W. Lowell, 1114 Sonoma street, Vallejo,
California.

Valley Transit Company.

Geo. H. Vogeler, Secretary, 717 J street, Fresno, California.

Vance Truck Line.

T. K. Vance, 395 E. Center street, Pomona, California.

Valley and Coast Transit Company.

E. L. McConnell, Owner, San Luis Obispo, California.

Victorville Transfer Company.

C. M. Bullock, 1420 Waterman avenue, San Bernardino, California.

Valley Truck Line.

R. W. Laverty, 1246 West street, Hollister, California.

Valley Springs Sheep Ranch-San Andreas Stage.

Fred Winkeler, San Andreas, California.

Victorville Stage Line.

Hodge and Santen, Victorville, California.

Ventura-Oxnard-Santa Paula and Ojai Stage.

D. M. Hunt, Ojai, California.

Washington Stage and Express Company.

H. T. Moomey, Nevada City, California.

The White Lines.

W. J. Quinn, President, 448 S. Center street, Stockton, California.

Winters Truck Company.

Claude Sears, Winters, California.

W. and S. Truck Company.

P. E. Tibbets, 618 Mill street, Los Angeles, California.

W. H. Wimer.

Gazelle, California.

Williams Truck Line.

Thos. H. Williams, 1195 Huntington boulevard, Pomona, California.

Willows-Glenn-Butte City Auto Service.

Paul Bernard, Butte City, California.

Wendell Hackstaff Auto Stage.

Geo. Mari, Amatee, California.

White Point Bus Line.

F. L. Landier, 4349 Pacific avenue, San Pedro, California.

Whitcomb Stages.

W. F. Whitcomb, 548 S. Louis street, Los Angeles, California.

Whitlock Stage.

C. L. Whitlock, Orland, California.

H. H. Webb Transfer and Storage Company.

H. H. Webb and Company, 212 Santa Monica boulevard, Santa Monica, California.

Westmoreland Truck and Transfer.

Paul Carinal, Westmoreland, California.

Walker Van and Storage Company.

304 San Gabriel boulevard, San Gabriel, California.

Wheeler's Hot Springs Stage Line.

W. W. Wilcox, Owner, Wheeler's Hot Springs, California;
M. D. Bayles, Agent.

Wilbur Springs Stage Company.

E. Strauss, Manager, Wilbur Springs, California;
M. A. Cuthbert, Secretary.

West Coast Transit Company.

B. McConnaha, President, Union Stage Depot, Eureka, California.

Al. G. Witt.

492 Seventeenth avenue, San Francisco, California.

West and Clark.

741 W. Eighth street, Riverside, California.

Williams-Bartlett Springs Stage Line.

Wm. Quigley, Williams, California.

Willow Ranch-Surprise Valley Stage.

W. N. Harris, Willow Ranch, California.

Willits-Hearst Stage Line.

E. E. Rugg, Hearst, California.

Winters-Davis-Sacramento Auto Stage.

Judy and Elliott, Winters, California.

Weaverville-Junction City-Helena-Big Bar Stage Line.

C. W. Bremer, Weaverville, California.

Way's Ferndale-Loleta-Eureka Freight Line.

A. W. Way, Eureka, California.

Wheatland-Spenceville Stage Line.

G. R. Atkins, Wheatland, California.

Westside Transit Company.

Fred Rife, Secretary, 1236 Daisy avenue, Long Beach, California.

West Coast Rapid Transit Company.

D. B. Maurice, Hermosa Beach, California.

Western Auto Truck.

U. L. and Fay Haynes, 551 Sofford street, Fresno, California.

Welch Brothers Stage Line.

Niland, California.

Winters Truck Line.

J. H. Jacobs, Winters, California.

Wagner's Inglewood Express.

Merl L. Wagner, Inglewood, California.

Ward's Auto Stage.

E. H. Ward, Pittsburg, California.

White Truck and Transfer Company.

Los Angeles, California.

Walker Stages.

Walker G. Balies, Owner, El Centro, California.

Woodland-Knights Landing Auto Stage.

A. H. Weston and W. H. Curson, 624 Second street, Woodland, California.

Woodland-Rumsey Auto Stage.

A. H. Weston, Woodland, California.

Weaverville-Peanut Auto Line.

John B. Enos, Douglas City, California.

Winters-Monticello Auto Line.

V. V. Anderson, Monticello, California.

Williams and Colusa Stage.

J. A. Manor, Colusa, California.

Western Refrigerating Company.

Petaluma, California.

Wishon-Wawona Auto Truck Service.

Cronin and Watt, Madera, California.

Woollett Stages.

922 Third street, San Diego, California.

Yosemite National Park Company.

F. C. Ravinius, Yosemite National Park, California.

Kiso Yasunda Produce Transfer Company.

691 N. Sixth street, San Jose, California.

Yosemite Transit.

R. R. Young, 525 E. Channel street, Stockton, California.

Zenia-Fort Seward Auto Line.

Ernest E. Kniss, Fort Seward, California.

Business address, Camino, California.

Cement, Tolenas and Tidewater Railroad Company.

Robert B. Henderson, President and General Manager;

James A. Keller, Traffic Manager;

H. T. Battello, Secretary and Auditor;

W. C. Stevenson, Chief Engineer, Cement, California.

Business address, 827 Pacific Building, San Francisco, California.

Central Pacific Railway Company.

Leased to Southern Pacific Company.

A. D. McDonald, Vice President and Comptroller;

C. H. Redington, Vice President;

T. O. Edwards, Auditor;

G. L. King, Secretary.

Business address, 65 Market street, San Francisco, California.

Chowchilla Pacific Railway Company.

Estate of F. G. Drum, Owner.

Business address, American National Bank Bldg., San Francisco, California.

Death Valley Railroad Company.

R. C. Baker, President;

C. B. Zabriskie, Vice President, Treasurer and General Manager;

U. S. Miller, Secretary;

H. Escherich, Auditor;

W. W. Cahill, Superintendent, Stagg, California.

Business address, 1010 Central Building, Los Angeles, California.

Diamond and Caldor Railway.

Walter Y. Kellogg, President;
Chas. W. Doe, Vice President and Treasurer;
Frank A. Merguir, Secretary;
Wilbur I. Wilson, General Manager;
Antone Hossler, Superintendent, Diamond Springs, California.

Business address, Fifteenth and Wood streets, Oakland, California.

Hetch Hetchy Railroad.

Municipally owned and operated by city of San Francisco.

James Rolph, Jr., President;
M. M. O'Shaughnessy, Vice President and General Manager;
L. T. McAfee, General Superintendent, Groveland, California.

Business address, City Hall, San Francisco, California.

Holton Interurban Railway Company.

A. B. West, President and General Manager;
F. O. Dolsen, Vice President;
H. Dewes, Secretary;
A. S. Cooper, Treasurer;
P. R. Ferguson, Auditor.

Business address, Riverside, California.

Howard Terminal Railway.

R. C. Reid, President;
B. D. Adamson, Vice President;
F. G. Ramsan, Secretary;
C. D. Howard, Treasurer and General Manager.

Business address, First and Market streets, Oakland, California.

Humboldt Northern Railway Company.

J. M. Carson, President;
C. S. Carson, Vice President;
E. S. Murray, Secretary;
H. H. Bell, Treasurer.

Business address, Eureka, California.

Indian Valley Railroad Company.

F. Klamp, President;
J. F. Humburg, Vice President;
Elmer E. Paxton, Secretary, Treasurer and General Manager;
W. J. McDonagh, Auditor;
C. L. Eaton, Superintendent, Paxton, California.

Business address, 341 Mills Building, San Francisco, California.

Inter-California Railway Company.

Leased to Southern Pacific Company.

Wm. Hood, Vice President;
G. L. King, Vice President and Secretary;
W. F. Ingram, Treasurer;
T. O. Edwards, Auditor.

Business address, 65 Market street, San Francisco, California.

The Iron Mountain Railway Company.

Wm. F. Kett, President;
W. S. Howard, Secretary and Treasurer;
M. J. Murphy, General Superintendent, Matheson, California.

Business address, 332 Pine street, San Francisco, California.

Kings Lake Shore Railroad Company.

Chas. King, President and General Manager;
J. L. C. Irwin, Secretary;
F. R. Haight, Treasurer.

Business address, Hanford, California.

Lake Tahoe Railway and Transportation Company.

Hope Bliss, President;
C. T. Bliss, Vice President and General Manager;
C. W. Nelson, Assistant General Manager;
Duane L. Bliss, Jr., Secretary;
F. S. Oliver, Treasurer;
E. C. Rogers, Auditor.

Business address, Tahoe, California.

Winter address, Room 201, Southern Pacific Bldg., San Francisco, California

Laton and Western Railroad Company.

Leased to The Atchison, Topeka and Santa Fe Railway Company.

W. B. Storey, President;

W. H. Comstock, General Manager.

Business address, 573 Pacific Electric Building, Los Angeles, California.

McCloud River Railroad Company.

D. M. Swobe, President and Traffic Manager;
F. D. Madison, Vice President and General Counsel;
E. F. Murray, Secretary;
W. W. Martin, Auditor, McCloud, California.

Business address, 216 Southern Pacific Building, San Francisco, California.

Modesto and Empire Traction Company.

T. K. Beard, President and General Manager;
L. L. Dennett, Secretary;
Wm. H. Murray, Auditor.

Business address, Modesto, California.

Mount Tamalpais and Muir Woods Railway.

R. H. Ingram, President and General Manager;
J. D. Jamison, Vice President;
W. A. Cannons, Secretary and Auditor.

Business address, 645 Pacific Building, San Francisco, California.

Mojave Northern Railroad.

R. H. Lacy, President;
F. H. Powell, Secretary;
Edward Waldo, Auditor;
L. V. Robinson, Superintendent, Victorville, California.

Business address, 607 H. W. Hellman Building, Los Angeles, California.

Minarets and Western Railway Company.

E. H. Cox, President;
C. S. Fleming, Secretary;
H. A. Collofen, Auditor.

Business address, Fresno, California.

Minkler Southern Railway Company.

Leased to The Atchison, Topeka and Santa Fe Railway Company.

W. B. Storey, President;
E. J. Engel, Vice President;
I. L. Hibbard, Vice President;
C. W. Jones, Secretary and Treasurer;
D. L. Gallup, Comptroller;
W. E. Bailey, Auditor.

Business address, 80 E. Jackson boulevard, Chicago, Illinois.

Nevada-California-Oregon Railway.

Chas. Moran, President;
S. H. McCartney, Vice President and General Manager;
W. F. Goldsberry, General Superintendent;
E. M. Harter, Auditor and Secretary.

Business address, Alturas, California.

Nevada County Narrow Gauge Railroad Company.

H. A. Mitchell, President and General Manager;
J. I. Walter, Vice President;
W. Arnstein, Vice President;
H. J. Sutherland, Secretary and Treasurer;
H. C. Phillips, Superintendent, Grass Valley, California.

Business address, 306 Hobart Building, San Francisco, California.

Northwestern Pacific Railroad Company.

W. S. Palmer, President and General Manager;
Paul Shoup, Vice President;
A. H. Payson, Vice President;
G. L. King, Secretary;
H. W. Ellicott, Treasurer;
W. B. Burris, Comptroller.

Business address, 64 Pine street, San Francisco, California.

Pacific Coast Railway Company.

E. C. Ward, President;
W. M. Barnum, Vice President;
N. D. Moore, Vice President;
E. W. Clarke, Vice President;
E. T. Cooper, Secretary;
H. M. Watkins, Auditor;
W. T. Masengill, Superintendent, San Luis Obispo, California.

Business address, 618 L. C. Smith Building, Seattle, Washington.

Pajaro Valley Consolidated Railroad Company.

J. D. Spreckels, President;
A. B. Spreckels, Vice President and Treasurer;
W. H. Hannam, Secretary;
F. E. Sullivan, General Manager;
E. E. Miles, Auditor.

Business address, 2 Pine street, San Francisco, California.

Porterville Northeastern Railway Company.

Leased to Southern Pacific Company.

Paul Shoup, President;
G. L. King, Secretary;
W. F. Ingram, Treasurer;
T. O. Edwards, Auditor.

Business address, 65 Market street, San Francisco, California.

Quincy Railroad Company.

F. S. Murphy, President;
W. Y. Stoddard, Vice President and General Manager;
James Ingebretson, Secretary and Treasurer;
L. H. Thayer, Superintendent and Auditor.

Business address, Quincy, California.

Richmond Belt Railway.

Leased to Southern Pacific Company and The Atchison, Topeka and Santa Fe Railway Company.

E. S. Pillsbury, President;
H. D. Pillsbury, Vice President;

Sacramento Valley and Eastern Railway.

H. A. Mitchell, President and General Manager;
Jesse H. Steinhart, Vice President;
H. J. Sutherland, Secretary and Treasurer;
Thos. Kearns, Auditor;
Geo. W. Hark, General Superintendent, Winthrop, California.

Business address, 1800 Hobart Building, San Francisco, California.

San Diego and Arizona Railway Company.

John D. Spreckels, President;
R. C. Gillis, Vice President;
L. J. Masson, Secretary and Auditor;
A. T. Mercier, General Manager;
J. R. Lowe, General Superintendent.

Business address, 627 Spreckels Building, San Diego, California.

San Joaquin and Eastern Railroad Company.

H. E. Huntington, Chairman;
John B. Miller, President;
W. A. Brackenridge, Vice President;
G. C. Ward, Vice President;
O. V. Showers, Secretary;
W. L. Percy, Treasurer;
D. M. Trott, Comptroller;
C. P. Staal, Auditor.

Business address, Edison Bldg., Third and Broadway, Los Angeles, California.

Santa Maria Valley Railroad Company.

C. C. Magenheimer, President;
P. F. Magenheimer, Vice President;
E. J. Miley, Secretary;
K. B. Holeman, General Manager;
J. M. Davis, Auditor.

Business address, Santa Maria, California.

Sierra Railway Company of California.

Robert H. Downes, President;
Wm. H. Crocker, Vice President;
J. T. Bullock, Secretary;
C. N. Hamblin, Treasurer, Auditor and General Manager.

Business address, Jamestown, California.

South San Francisco Belt Railway.

W. J. Martin, President;
A. C. Owen, Vice President;
R. H. Benedict, Secretary and Treasurer.

Business address, South San Francisco, California.

Southern Pacific Company.

J. Kruttschnitt, Chairman Executive Committee, New York City;
Wm. Sproule, President, San Francisco, California;
Henry W. de Forest, Vice President, New York City;
A. D. McDonald, Vice President and Comptroller, New York City;
E. O. McCormick, Vice President, San Francisco, California;
Wm. F. Herrin, Vice President and Chief Counsel, San Francisco, California;
J. P. Blair, General Counsel, New York City;
Hugh Neill, Clerk and Secretary, New York City;
A. K. Van Deventer, Treasurer, New York City;
G. L. King, Assistant Secretary, San Francisco, California;
T. O. Edwards, Auditor, San Francisco, California.

Rail Line, Executive offices, 65 Market street, San Francisco, California.
Executive offices, 165 Broadway, New York City.

Southern Pacific Railroad Company.

Leased to Southern Pacific Company.

W. F. Ingram, Vice President;
A. D. McDonald, Vice President and Comptroller;
G. L. King, Secretary;
T. O. Edwards, Auditor.

Business address, 65 Market street, San Francisco, California.

South Pacific Coast Railway Company.

Leased to Southern Pacific Company.

A. D. McDonald, Vice President and Comptroller;
G. L. King, Secretary;
T. O. Edwards, Auditor;
W. F. Ingram, Treasurer.

Business address, 65 Market street, San Francisco, California.

Stockton Terminal and Eastern Railroad.

F. J. Dietrick, General Manager, operating on behalf of E. F. Davis, to whom road was deeded;
W. M. Lipscomb, Auditor.

Business address, 26 S. San Joaquin street, Stockton, California.

Sunset Railway Company.

C. N. Beal, President;
W. K. Etter, Vice President and General Manager;
C. W. Jones, Secretary and Treasurer;
L. B. Jones, Auditor.

Auditor's address, Los Angeles, California.

Tonopah and Tidewater Railroad Company.

R. C. Baker, President;
C. B. Zabriskie, Vice President, Treasurer and General Manager;
DeWitt Van Buskirk, Vice President;
M. R. Musser, Secretary;
H. Escherich, Auditor;
W. W. Cahill, Superintendent, Stagg, California.

Business address, 1010 Central Building, Los Angeles, California.

Trona Railway Company.

H. G. Emlaw, President;
S. W. Austin, Vice President;
H. H. Vater, Secretary and Treasurer;
O. W. Tuckwood, Auditor;
M. C. Cockshott, Superintendent.

Business address, Trona, California.

Ventura County Railway Company.

Elisha Gee, President;
F. C. Sitkowski, Vice President and General Manager;
J. W. Rooney, Secretary;
W. N. Wilds, Auditor.

Business address, 1530 Sixteenth street, Denver, Colorado.

The Western Pacific Railroad Company.

Charles M. Levy, President;
A. R. Baldwin, Vice President;
F. W. McCutcheon, Vice President;
Charles Elsey, Vice President and Treasurer;
E. W. Mason, Vice President and General Manager;
W. G. Bruen, Secretary;
D. C. DeGraff, Auditor.

Business address, 963 Mills Building, San Francisco, California.

Yosemite Valley Railroad Company.

Fred T. Elsey, President;
H. L. Tevis, Vice President;
Thomas Turner, Secretary and Treasurer;
W. A. Robbett, Auditor, Merced, California;
W. L. White, General Manager, Merced, California;
F. L. Higgins, Superintendent, Merced, California.

Business address, Merced, California.

Yreka Railroad Company.

R. H. DeWitt, President;
J. E. Turner, Vice President;
Gordon Jacobs, Secretary;
F. A. Reiser, General Superintendent and Manager.

Business address, Yreka, California.

American Railway Express Company.

Chas. A. Lutz, Vice President.

Business address, 65 Broadway, New York City.

Pasadena Electric Express Company.

F. S. Imes, President;
M. G. Collar, Secretary.

Business address, 400 S. Fair Oaks avenue, Pasadena, California.

The Pullman Company.

E. C. Morris, General Auditor.
Business address, Chicago, Illinois.

Pacific States Express, Incorporated.

G. R. Anderson, President;
B. F. McKibben, Secretary.
Business address, 247 Fremont street, San Francisco, California.

ELECTRIC RAILWAYS

List of Electric Railways and Their Officials

Tables 1 to 5, Inclusive

ELECTRIC RAILWAYS.**List of Officers of Electric Railway Companies as Reported in Annual Reports
Filed With the Railroad Commission for Year Ending December 31, 1923.****Angels Flight Railway Company.**

L. J. Christopher, President;
John Lopozych, Vice President;
R. M. Moore, Secretary and General Manager.

Business address, 215 W. Sixth street, Los Angeles.

Bakersfield and Kern Electric Railway Company.

A. C. Balch, President;
Wm. G. Kerckhoff, Vice President;
L. M. Farnham, Secretary.
A. E. Peat, Treasurer;
A. E. Wishon, General Manager;
V. R. Mickleberry, General Superintendent, Bakersfield.

Business address, 1801 Tulare street, Fresno, California.

Bay Shore Railroad Company.

Thos. A. Rife, President;
J. F. Traggardt, Secretary.

Business address, San Diego, California.

California Street Cable Railroad Company.

James W. Harris, President, General Manager and General Superintendent;
A. H. Payson, Vice President;
S. Waldo Coleman, Vice President;
George A. Hare, Secretary;
E. B. Stone, General Auditor.

Business address, 1061 Hyde street, San Francisco, California.

Castro Point Railway and Terminal Company.

Leased to Richmond-San Rafael Ferry and Transportation Company, and
Key System Transit Company.

Anson S. Blake, President;
Edwin T. Blake, Vice President and General Superintendent;
G. Kuppe, Secretary and Treasurer.

Business address, 5000 Broadway, Oakland, California.

Central California Traction Company.

H. Fleishhacker, President;
M. Fleishhacker, Vice President;
G. W. Peltier, Vice President;
Alden Anderson, Vice President;
A. N. Baldwin, Secretary and Treasurer;
S. M. Smith, General Auditor;
F. W. Webster, General Manager, Stockton, California;
J. J. Hooper, General Superintendent, Stockton, California.

Business address, 9 Main Street, San Francisco, California.

City Railway Company of Los Angeles.

Leased to Los Angeles Railway Corporation.

W. E. Dunn, President;
H. E. Huntington, Vice President;
C. A. Henderson, Secretary, Treasurer and Comptroller;
R. O. Crowe, Auditor.

Business address, Los Angeles Railway Building, Los Angeles, California.

Fairfax Incline Railroad Company.

Capt. H. G. Day, President;
Martin Stevens, Secretary.

Business address, Fairfax, California.

Fresno City Railway Company.

Leased to Fresno Traction Company.

Wm. F. Herrin, President;
Paul Shoup, Vice President;
L. A. Lovell, Assistant Secretary and Auditor;
F. W. Webster, General Manager, Fresno, California.

Business address, Pacific Electric Building, Los Angeles, California.

Fresno Interurban Railway Company.

H. H. Sanborn, President;
A. B. Roehl, Vice President;
Geo. H. Bradner, Secretary, Treasurer and General Auditor;
H. L. Culler, General Superintendent, Fresno, California.

Business address, 216 Sutter street, San Francisco, California.

Fresno Traction Company.

Wm. F. Herrin, President;
Paul Shoup, Vice President;
L. A. Lovell, Assistant Secretary and Auditor;
F. W. Webster, General Manager, Fresno, California;
E. A. Devereaux, General Superintendent, Fresno, California.

Business address, Pacific Electric Building, Los Angeles, California.

Glendale and Montrose Railway.

Wm. G. Henshaw, President;
Loren Barton, Vice President;
V. Haresnape, Secretary and Treasurer;
W. M. Mills, General Auditor;
P. L. Hatch, General Manager.

Business address, 135 N. Glendale avenue, Glendale, California.

Key System Transit Company.

W. I. Brobeck, President;
W. R. Alberger, Vice President and General Manager;
F. W. Frost, Secretary and Treasurer;
B. W. Fernald, Auditor.

Business address, Key System Building, Oakland, California.

Los Angeles Railway Corporation.

H. E. Huntington, President;
G. J. Kuhrts, Vice President;
W. E. Dunn, Vice President;
C. A. Henderson, Secretary, Treasurer and Comptroller;
G. J. Kuhrts, General Manager;
R. O. Crowe, Auditor.

Business address, 1060 S. Broadway, Los Angeles, California.

Market Street Railway Company.

Chas. N. Black, President;
Geo. B. Willcutt, Vice President and Secretary;
A. M. Dahler, Treasurer;
Wm. M. Abbott, General Attorney;
M. McCantz, General Manager.

Business address, 58 Sutter street, San Francisco, California.

Nevada County Traction Company.

R. M. Hotaling, President;
John Martin, Vice President;
F. H. Pierson, Secretary;
L. Volmer, Assistant Secretary;
C. C. Skewes, General Superintendent, Grass Valley.

Business address, 354 Pine street, San Francisco, California.

Pacific Electric Railway Company.

Paul Shoup, President;
L. A. Lovell, Secretary and Auditor;
D. W. Pontius, Vice President;
F. L. Annable, General Superintendent.

Business address, Pacific Electric Building, Los Angeles, California.

Peninsular Railway Company.

Paul Shoup, President;
L. A. Lovell, Assistant Secretary and Auditor;
F. E. Chapin, General Manager, San Jose;
C. F. Edmunds, General Superintendent, San Jose.

Business address, Pacific Electric Building, Los Angeles, California.

Petaluma and Santa Rosa Railroad Company.

Thos. Maclay, President;
G. P. McNear, Vice President and Treasurer;
R. W. Wise, Secretary;
E. H. Maggard, General Manager;
H. W. von Emster, General Auditor.

Business address, Petaluma, California.

Pacific Gas and Electric Company—Sacramento Street Railway Department.

W. E. Creed, President;
F. A. Leach, Jr., Vice President and General Manager;
A. F. Hockenbeamer, Vice President and Comptroller;
D. H. Foote, Secretary;
E. W. Hodges, General Auditor.

Business address, 445 Sutter street, San Francisco, California.

Sacramento Northern Railroad.

G. F. Detrick, President;
Sidney M. Ehrman, Vice President;
G. H. Gardiner, Secretary and Treasurer, 469 Mills Building, San Francisco;
J. B. Rowray, General Manager;
J. R. Parke, Auditor.

Business address, Greenwald Building, Sacramento, California.

San Diego Electric Railway Company.

John D. Spreckels, President;
Claus Spreckels, Vice President and General Manager;
W. Clayton, Vice President;
F. G. Whitehead, Secretary;
H. D. Huff, Auditor.

Business address, San Diego, California.

San Francisco, Napa and Calistoga Railway.

James Irvine, President;
Guy C. Earl, Vice President;
John T. York, Vice President;
E. M. Price, Secretary and Treasurer;
F. H. Groat, General Auditor;
C. E. Brown, General Manager and Vice President.

General Manager's address, Napa, California.

Secretary's address, 820 Crocker Building, San Francisco, California.

San Jose Railroads.

Wm. F. Herrin, President;
Paul Shoup, Vice President;
L. A. Lovell, Assistant Secretary and Auditor;
F. E. Chapin, General Manager, San Jose;
C. F. Edmonds, General Superintendent, San Jose.

Business address, Pacific Electric Building, Los Angeles, California.

San Francisco-Sacramento Railroad Company.

W. Arnstein, President;
H. A. Mitchell, Vice President and General Manager;
H. J. Sutherland, Secretary and Auditor;
S. P. Westington, Treasurer;
W. T. Richards, Chief Engineer.

Business address, Fortieth street and Shafter avenue, Oakland, California.

Santa Barbara and Suburban Railway Company.

W. A. Brackenridge, President;
C. A. Edwards, Vice President;
S. M. Kennedy, Vice President;
L. J. Lee, Secretary;
W. L. Percy, Treasurer;
C. P. Staal, General Auditor;
D. M. Trott, Comptroller;
W. E. Erwin, General Superintendent, Santa Barbara, California.

Business address, Third and Broadway, Los Angeles, California.

South San Francisco Railroad and Power Company.

W. J. Martin, President;
Wm. M. Abbott, Vice President;
Geo. B. Willcutt, Secretary;
A. M. Dahler, Treasurer.

President's address, South San Francisco, California.

Secretary's address, 58 Sutter street, San Francisco.

Stockton Electric Railroad Company.

Paul Shoup, President;
L. A. Lovell, Secretary and Auditor;
M. S. Wade, Treasurer;
F. W. Webster, General Manager, Stockton;
J. J. Hooper, General Superintendent, Stockton.

Business address, Pacific Electric Building, Los Angeles, California.

Tidewater Southern Railway Company.

Charles Elsey, President;
Byron A. Bearce, Vice President;
W. G. Bruen, Secretary;
D. C. DeGraff, Auditor;
E. L. Gamble, Manager, Stockton, California.

Business address, 922 Mills Building, San Francisco, California.

Union Traction Company.

S. Waldo Coleman, President;
R. M. Hotaling, Vice President;
L. W. Pryor, Secretary and Treasurer;
R. L. Cardiff, Manager, Santa Cruz, California.

Business address, 315 Montgomery street, San Francisco, California.

Visalia Electric Railroad Company.

Paul Shoup, President;
L. A. Lovell, Assistant Secretary and Auditor;
M. S. Wade, Treasurer;
F. W. Webster, General Manager, Exeter, California;
W. P. Ballard, General Superintendent, Exeter, California.

Business address, Pacific Electric Building, Los Angeles, California.

GAS AND ELECTRIC COMPANIES

List of Gas and Electric Companies and Their Officials

Gas Companies, Tables 1 to 4, Inclusive

Electric Companies, Tables 1 to 4, Inclusive

GAS AND ELECTRIC COMPANIES.**List of Officers of Gas and Electric Companies as Reported in Annual Reports
Filed With the Railroad Commission for Year Ending December 31, 1923.****Alturas Electric Power Company.**

I. W. Gibbons, President and General Manager;

B. F. Lynip, Secretary and Treasurer.

Secretary's address, 2341 Channing way, Berkeley, California.

President's address, Alturas, California.

Amador Electric Light and Power Company.

E. C. Voorhies, President;

W. E. Downs, Vice President;

C. R. Downs, Secretary and General Manager.

Business address, Sutter Creek, California.

Bear Valley Utility Company.

B. T. Ergenbright, President and General Manager;

E. E. Richardson, Vice President;

E. S. Goble, Secretary and Treasurer.

Business address, Pine Knot, California.

Bay Point Light and Power Company.

W. S. Van Winkle, President, Treasurer and General Manager;

F. N. Beal, Vice President;

E. N. Van Winkle, Secretary.

Business address, Bay Point, California.

Bell Electric Company.

Frank R. Bell, General Manager, Auburn, California.

Ben Lomond Light Company.

F. A. Dickinson, Manager, Ben Lomond, California.

Alex Brown Electric Plant.

Alex Brown, Owner, Walnut Grove, California.

California Electric Generating Company.

H. Fleishhacker, President;

Herbert Fleishhacker, Vice President;

Guy C. Earl, Vice President;

H. P. Wilson, Vice President and Secretary;

L. A. Reynolds, Auditor;

J. B. Black, General Manager.

Business address, 530 Bush street, San Francisco, California.

The California-Oregon Power Company.

Joseph D. Grant, Chairman of the Board;

John D. McKee, President;

F. G. Phelps, Secretary;

Paul B. McKee, Vice President and General Manager;

C. A. Swigart, Comptroller.

Business address, Medford, Oregon.

California Telephone and Light Company.

W. E. Creed, President;

A. F. Hockenbeamer, Vice President and Treasurer;

F. A. Leach, Jr., Vice President;

D. H. Foote, Secretary;

E. W. Hodges, Auditor.

Business address, 445 Sutter street, San Francisco, California.

Callayoni Electric Plant.

S. H. McKinley, Lessee, Middletown, California.

Capitola Company.

Harry Bickell, Treasurer and General Superintendent, Capitola, California.

Central Counties Gas Company.

John Earle Jardine, President;
F. W. Hunter, Vice President and General Manager;
Robert G. Thomas, Secretary and Treasurer;
E. L. Brandon, General Superintendent.

Business address, Visalia, California.

Central Mendocino County Power Company.

Frank W. Taft, President;
Edward Morris, Vice President and General Manager;
H. W. Cook, Secretary.

Business address, Willits, California.

Central Natural Gas Company.

George Finkbohner, President and General Manager;
J. N. Furry, Vice President;
Nate E. Carpenter, Secretary.

Business address, 29 N. Brant street, Stockton.

Coast Counties Gas and Electric Company.

S. Waldo Coleman, President;
J. D. Grant, Vice President;
L. W. Pryor, Secretary and Treasurer;
R. L. Cardiff, Manager.

Business address, 315 Montgomery street, San Francisco, California.

Coast Valleys Gas and Electric Company.

Halford Erickson, President;
Philip S. George, Secretary;
Jas. F. Pollard, Vice President and General Manager;
T. W. Snell, General Superintendent;
A. E. Costanza, Auditor.

Business address, Salinas, California.

Stuart Darling.

Summerland, California.

The Diamond Match Company.

W. A. Fairburn, President;
H. F. Holman, Secretary and Treasurer;
W. B. Dean, General Manager;
F. A. Compton, Superintendent.

P. O. Box 1037, Chico, California.

Downieville Electric Light Company.

C. J. York, Owner, Downieville, California.

Fair Oaks Electric Company.

R. A. Rose, President and General Manager;
C. M. Rose, Vice President;
L. M. Rose, Secretary and Treasurer.

Business address, Fair Oaks, California.

Empire Mill and Electric Company.

I. L. Wakefield, Manager, Fort Bidwell, California.

Fontana Power Company.

A. B. Miller, President;
J. D. McGregor, Secretary.

Business address, Fontana, California.

Fowler Gas Company.

W. S. Ricketts, President;
Edwin Gower, Sr., Vice President.
C. A. Patton, Secretary and General Manager.

Business address, Fowler, California.

Fort Bragg Electric Company.

F. C. White, President and General Manager;
H. P. Plummer, Vice President;
M. Raschke, Secretary;
W. G. Collins, General Superintendent, Fort Bragg;
G. B. Waterman, Auditor.

Business address, Fort Bragg, California.

Great Western Power Company of California.

M. Fleishhacker, President;
Herbert Fleishhacker, Vice President;
Guy C. Earl, Vice President;
H. P. Wilson, Vice President;
W. H. Spaulding, Secretary;
F. M. Tompkins, Treasurer and Assistant Secretary;
Chaffee E. Hall, Assistant Secretary;
L. A. Reynolds, Auditor;
J. B. Black, General Manager.

Business address, 530 Bush street, San Francisco.

Grizzly Electric Company.

R. B. Young, Owner, Portola, California.

Hanford Gas and Power Company.

E. E. Bush, President and General Manager;
A. W. Reynolds, Secretary and General Superintendent.

Business address, 116 W. Seventh street, Hanford, California.

Hazel Gold Mining Company.

I. O. Jillson, President and General Manager;
J. W. Roper, Secretary.

Business address, P. O. Box 907, Chico, California.

J. M. Hotchkiss.

Care of Hobbs, Wall and Company, Fife Building, San Francisco, California.

Holton Power Company.

A. B. West, President;
F. O. Dolson, Vice President and General Superintendent;
P. R. Ferguson, Auditor;
Herbert Dewes, Secretary;
E. B. Criddle, General Agent;
A. S. Cooper, Treasurer.

Business address, Riverside, California.

Indian Valley Light and Power Company.

D. J. McIntyre, Greenville, California.

Kohler and Schwartz.

H. O. Kohler and A. Schwartz, Owners, Washington, California.

Lake County Power and Irrigation Company.

James A. Gunn, Jr., Owner, Kelseyville, California.

Kappler Electric Light Company.

Etna Mills, California.

Lassen Electric Company.

Willis J. Walker, President;

Fletcher L. Walker, Vice President;

L. R. Cady, General Manager;

C. E. Priest, Secretary, Westwood, California.

General Manager's address, Susanville, California.

Lompoc Light and Power Company.

D. F. Hill, President;

Wm. Hicks, Vice President;

R. M. Moore, Secretary and General Manager;

E. A. Vaughan, General Superintendent, Lompoc.

Business address, 215 W. Sixth street, Los Angeles, California.

Los Angeles Gas and Electric Corporation.

W. B. Cline, President;

Wm. Bauthyte, Vice President and General Manager;

C. S. Vance, Vice President;

C. A. Luckenbach, Vice President;

T. P. McCrea, Secretary;

Horace Cline, Treasurer;

A. B. Day, General Superintendent;

W. E. Houghton, Comptroller.

Business address, 645 S. Hill street, Los Angeles, California.

Madera Gas Company.

Geo. W. Kitchen, President and General Superintendent;

Helmer Decker, Secretary;

Jas. Wakefield, Treasurer and General Manager.

Business address, Madera, California.

Mendocino Electric Light and Power Company.

A. G. Stone, President;

J. S. Ross, Vice President;

A. Brown, Secretary and General Manager;

J. Grindle, Treasurer.

Business address, Mendocino, California.

Middle Yuba Hydro-Electric Power Company.

A. D. Foote, President;

C. E. Clinch, Vice President;

Frank M. Nilon, Secretary.

Business address, Grass Valley, California.

Midland Counties Public Service Corporation.

A. C. Balch, President;

Wm. G. Kerckhoff, Vice President;

L. M. Farnum, Secretary;

A. E. Peat, Treasurer and Comptroller;

A. G. Wishon, Vice President and Managing Director;

E. A. Quinn, General Superintendent;

A. E. Wishon, General Manager.

Business address, 1401 Fulton street, Fresno, California.

Midway Gas Company.

Ferdinand Reis, Jr., President;
A. C. Balch, Vice President;
L. M. Farnham, Secretary;
A. C. Johnston, Auditor;
A. E. Peat, Treasurer and Comptroller;
A. B. Macbeth, General Manager and Vice President;
Wm. Moeller, Jr., Chief Engineer and Assistant General Manager.
Business address, 950 S. Broadway, Los Angeles, California.

Modesto Gas Company.

Frank A. Cressey, Jr., President and General Manager;
J. D. Turner, Vice President;
Josephine Cressey, Secretary and Treasurer.
Business address, 818 Tenth street, Modesto, California.

Mount Shasta Power Corporation.

W. E. Creed, President;
F. A. Leach, Jr., Vice President and General Manager;
A. F. Hockenbeamer, Vice President, Treasurer and Comptroller;
D. H. Foote, Secretary;
E. W. Hodges, Auditor.
Business address, 445 Sutter street, San Francisco, California.

Napa Valley Electric Company.

D. L. Beard, President;
F. M. Wyatt, Vice President;
Henry Brown, Secretary and Treasurer;
F. W. Mielenz, General Manager.
Business address, St. Helena, California.

Needles Gas and Electric Company.

R. S. Masson, President and General Manager;
Leta Masson, Secretary;
J. W. Wadsworth, General Superintendent, Needles California.
Business address, 1200 Citizens National Bank Bldg., Los Angeles, California.

Nestle's Food Company, Incorporated.

L. H. Garrod, Secretary;
Ira H. Latour, General Manager.
Business address, 112 Market street, San Francisco, California.

Novato Utilities Company.

J. W. Cain, President;
A. D. Scott, Vice President;
A. J. Cain, Secretary and Treasurer;
C. H. Towle, Auditor.
Business address, Novato, California.

Oakdale Gas Company.

M. M. Anderson, President;
G. W. Anderson, Secretary-Treasurer and General Manager.
Business address, Oakdale, California.

Ojai Power Company.

John J. Burke, President;
M. W. Phillips, Vice President and General Manager;
E. L. Wiest, Secretary and Treasurer.
Business address, Ojai, California.

Ontario Power Company.

O. Podrasnik, President;
H. E. Swan, Vice President;
A. C. Reynolds, Secretary and Treasurer;
Glen D. Smith, General Manager.

Business address, Ontario, California.

Pacific Gas and Electric Company.

W. E. Creed, President;
Frank A. Leach, Jr., Vice President and General Manager;
A. F. Hockenbeamer, Vice President, Treasurer and Comptroller;
D. H. Foote, Secretary;
E. W. Hodges, Auditor.

Business address, 445 Sutter street, San Francisco.

J. F. Partington.

215 South First street, San Jose, California.

Peters Brothers.

E. D. Peters and F. E. Peters, Dutch Flat, California.

Pinole Light and Power Company.

E. M. Downer, President;
L. E. Hart, Secretary;
Geo. A. Dutra, General Manager.

Business address, Pinole, California.

Point Arena Electric Light and Power Company.

C. W. Henry, Owner; Point Arena, California.

Producers Gas and Fuel Company.

Wm. G. Kerckhoff, President;
A. C. Balch, Vice President;
L. M. Farnham, Secretary;
A. E. Peat, Treasurer and Comptroller;
A. B. Macbeth, Vice President and General Manager;
A. C. Johnston, Auditor.

Business address, 950 S. Broadway, Los Angeles, California.

Quincy Electric Light and Power Company.

F. G. Gansner, Owner, Quincy, California.

Riverbend Gas and Water Company.

R. K. Madsen, President;
Wm. W. Parlier, Vice President;
W. J. Lohman, Secretary and Treasurer;
George W. Wiley, Auditor, Dinuba, California.

President and Secretary's address, Parlier, California.

Sacramento Gas Company.

George W. Peltier, President;
Andrew McCormick, Vice President;
Chas. T. Hills, Secretary and Treasurer;
J. N. Jensen, General Manager.

Business address, 916 Sixth street, Sacramento, California.

Sacramento Valley Sugar Company.

A. M. Gelston, Manager, Hamilton City, California.

San Diego Consolidated Gas and Electric Company.

H. H. Jones, President;
H. M. Byllesby, Vice President;
Arthur S. Huey, Vice President;
M. B. Fowler, Secretary and Treasurer;
Byllesby Engineering and Management Corporation, General Managers;
L. M. Klauber, General Superintendent.

Business address, San Diego Electric Building, San Diego, California.

San Joaquin Light and Power Corporation.

Wm. G. Kerckhoff, President;
A. C. Balch, Vice President;
L. M. Farnham, Secretary;
A. E. Peat, Treasurer and Comptroller;
A. G. Wishon, Vice President and Managing Director;
A. E. Wishon, General Manager;
A. B. Carpenter, Auditor.

Business address, 1401 Fulton street, Fresno, California.

Santa Cruz County Utilities.

J. C. Hughes, President and General Manager;
E. H. Russell, Secretary and Treasurer.

President's address, 440 Lake Shore boulevard, Oakland, California.

Santa Maria Gas Company.

James F. Goodwin, President;
Thomas B. Adam, Vice President;
R. E. Easton, Secretary and General Manager;
Paul O. Tietzen, Treasurer;
Chas. W. Hatch, Auditor;
L. F. Chandler, General Superintendent.

Business address, Santa Maria, California.

Shasta Retreat Company.

Shasta Retreat, California.

Snow Mountain Water and Power Company.

E. S. Pillsbury, President;
H. D. Pillsbury, Vice President;
W. S. Graham, General Manager.

Business address, 216 Pine street, San Francisco, California.

Sierra and San Francisco Power Company.

Leased to Pacific Gas and Electric Company, December 31, 1919.

M. B. Starring, President;
H. F. Jackson, Vice President;
D. C. Morris, Vice President;
Alma L. Ferguson, Secretary.

Business address, 625 Market street, San Francisco, California.

A. Sorenson.

1932 Irving avenue, Oakland, California.

Southern California Edison Company.

John B. Miller, President and Chairman;
W. M. Brackenridge, Senior Vice President;
R. H. Ballard, Vice President and General Manager;
S. M. Kennedy, Vice President;
G. C. Ward, Vice President;
Clifton Peters, Secretary;
W. L. Percey, Treasurer;
C. P. Staal, Auditor;
D. M. Trott, Comptroller.

Business address, Third and Broadway, Los Angeles, California.

Southern California Gas Company.

Wm. G. Kerckhoff, President;
A. C. Balch, Vice President;
A. B. Macbeth, Vice President and General Manager;
L. M. Farnham, Vice President and Secretary;
A. E. Peat, Comptroller and Treasurer;
A. C. Johnston, Auditor;
C. D. Bell, General Superintendent.

Business address, 950 S. Broadway, Los Angeles, California.

Southern Counties Gas Company of California.

Ferdinand R. Bain, President;
Rufus C. Dawes, Vice President;
Charles H. Dickey, Vice President;
A. S. Bradford, Vice President;
Walter S. MacFarland, Secretary and Auditor;
T. H. Dudley, Treasurer;
Franklin S. Wade, General Superintendent.

Business address, 724 S. Spring street, Los Angeles, California.

Southwestern Gas Company.

J. O. Percival, Manager and Receiver.

Business address, Hemet, California.

The Southern Sierras Power Company.

A. B. West, President and General Manager;
W. C. Simmons, Secretary;
L. C. Phipps, Jr., Vice President and Treasurer;
P. R. Ferguson, Auditor;
G. M. Wills, General Superintendent.

Business address, Riverside, California.

Stewart, James D.

Auburn, California.

Surprise Valley Electric Light and Power Company.

Thomas B. Sizer, President;
R. H. Stanley, Vice President;
L. L. Turner, Secretary;
C. M. Johnstone, Treasurer.

Business address, Cedarville, California.

Towle Brothers.

Towle, California.

The Truckee Electric Light and Power Company.

P. M. Doyle, President and General Manager;
J. T. Lord, Vice President;
K. E. Doyle, Secretary and Treasurer.

Business address, Dixon, California.

Truckee River Power Company.

F. S. Pratt, President;
Wm. T. Crawford, Secretary;
Geo. A. Campbell, Manager.

Business address, 21 Front street, Reno, Nevada.

Tuolumne County Electric Power and Light Company.

Mrs. A. C. Crooks, President;
F. D. Madison, Vice President;
V. W. Vincent, Secretary;
H. J. Coffill, General Manager.

Business address, Sonora, California.

Turlock Gas Company.

A. A. Caldwell, President and General Manager;
W. E. Keith, Vice President;
Mrs. A. A. Caldwell, Secretary and Treasurer.

Business address, Turlock, California.

Twin Cities Gas Company.

J. M. Berkley, President;
Wiley Mull, Secretary and General Superintendent, Beaumont, California.

President's address, 411 Hollingsworth Building, Los Angeles, California.

Utica Mining Company.

H. G. Stevenson, Secretary.

Business address, Balfour Building, San Francisco, California.

Vacaville Water and Power Company.

T. L. Gates, President;
Mrs. S. W. English, Vice President and Treasurer;
W. Z. McBride, Secretary and General Manager.

Business address, Vacaville, California.

Vallejo Electric Light and Power Company.

George Newman, President;
J. S. Adler, Vice President;
Albert Casper, Secretary-Treasurer and General Manager.

Business address, Vallejo, California.

Valley Natural Gas Company.

A. C. Balch, President;
W. G. Kerckhoff, Vice President;
L. M. Farnham, Secretary;
A. E. Peat, Treasurer and Comptroller;
A. C. Johnston, Auditor;
A. B. Macbeth, General Manager.

Business address, 950 S. Broadway, Los Angeles, California.

Weaverville Electric Company.

J. R. Blair, President;
C. H. Edwards, Secretary;
J. R. Blair, General Superintendent.

Business address, Weaverville, California.

Westside Lumber Company.

J. R. Prince, Secretary.

Tuolumne, California.

West Side Natural Gas Company.

Jos. McDonald, President;
J. T. Ryan, Vice President;
J. I. McKean, Secretary.

Business address, Taft, California.

Western States Gas and Electric Company.

H. M. Byllesby, President;
Samuel Kahn, Vice President and General Manager;
J. J. O'Brien, Vice President;
B. F. Wellington, Jr., Secretary and Treasurer;
G. N. Rooker, Manager, Richmond Division;
H. L. Jackman, Manager, Eureka Division.

Business address, 48 N. Sutter street, Stockton, California.

Yuma Light, Gas and Water Company.

R. M. Moore, 1018 Trust and Savings Building, Los Angeles, California.

TABLE NO. 1.

TELEPHONE AND TELEGRAPH COMPANIES

List of Telephone and Telegraph Companies and Their Officials

Tables 1 to 4, Inclusive

TELEPHONE AND TELEGRAPH COMPANIES.

List of Officers of Telephone and Telegraph Companies, as Reported in Annual Reports Filed With the Railroad Commission for the Year Ending December 31, 1923.

Adelaide Rural Telephone Company.

Jas. W. Lemen, General Manager;
Mrs. Hettie Lemen, Secretary.

Adelaide, California.

Alpaugh Telephone and Telegraph Company.

John H. Callister, Secretary, Alpaugh, California.

Antelope Valley Telephone Company.

O. F. Goodrich, Owner;
Ernest Irwin, Auditor.

Lancaster, California.

Arrowhead Telephone Company.

Harry L. Martin, Lake Arrowhead, California.

Associated Telephone Company.

Geo. B. Ellis, President;
J. E. Fishburn, Vice President;
John E. Marble, Vice President;
B. O. Johnson, Secretary;
Sam R. Heffley, Auditor and General Manager.

Long Beach, California.

Aukum Telephone Company.

J. L. Harris, Aukum, California.

Bandy, G. W.

Kernville, California.

Bass Telephone Line.

Geo. W. Johnstone, Manager, Montgomery Creek, California.

The Bear Valley Utility Company.

B. P. Ergenbright, President and Manager, Pine Knot, California.

Lily Berg Telephone Line.

Lily Berg, Owner, Llanada, California.

Bigelow Telephone Company.

H. E. Bigelow, Owner, O'Neals, California.

Baird Telephone Company.

D. H. Briggs, Baird, California.

Bridgeport Telephone and Telegraph Company.

A. S. Bryant, Owner, Bridgeport, California.

Butte Meadows Telephone and Telegraph Company.

J. W. Roper, Manager, Box 907, Chico, California.

Butte Valley Telephone Company.

Jos. Hessig, President and Manager;
J. H. Hessig, Secretary.

Chiloquin, Oregon.

Wm. Butts Telephone Company.

E. J. Graham, Manager, Hollister, California.

California Telephone and Light Company.

W. E. Creed, President;
A. F. Hockenbeamer, Vice President;
F. A. Leach, Jr., Vice President;
D. H. Foote, Secretary;
E. W. Hodges, Auditor.

445 Sutter street, San Francisco, California.

Calaveras Telephone Company.

J. A. Tower, Owner, Felix, California.

Coast Telephone Company.

J. R. Fort, Owner, Cambria, California.

Camp Creek Telephone Company.

Hornbrook, California.

Campbell Telephone Company.

Ed Howes, President;
A. C. Keesling, Secretary.
Campbell, California.

Capay Valley Telephone Company.

L. N. Wood, Owner, Guinda, California.

Chileno Valley Telephone Company.

J. L. Goatley, President;
Chas. G. Martin, Vice President;
Americo J. Bloom, Secretary and Treasurer.
R.F.D. 2, Petaluma, California.

Coachella Valley Home Telephone and Telegraph Company.

J. W. Newman, President;
M. E. Alderman, Vice President;
W. D. Gibbs, Secretary and General Manager.
Thermal, California.

Colusa County Telephone Company.

J. F. Campbell, President;
F. H. Crosby, Secretary and Treasurer;
P. R. Roller, Auditor;
N. C. Steele, General Superintendent, Colusa, California.
405 Sansome street, San Francisco, California.

Colorado River Telephone Company.

Mae I. Kamrar, President;
D. J. Kamrar, Vice President;
S. D. Kamrar, Secretary, Treasurer and General Manager.
Blythe, California.

Colfax Telephone Exchange.

Mrs. S. K. Morrison, Owner;
Carl G. Bell, Manager.
Colfax, California.

Cook and McKenzie.

Monticello, California.

Corona Home Telephone and Telegraph Company.

Joy G. Jameson, President;
W. S. Clayson, Vice President;
Jas. S. Campbell, Secretary and General Manager.
Corona, California.

Coos and Curry Telephone Company.

Chas. Hall, President and General Manager;
C. E. Hickman, Secretary;
Ernest C. Smith, Vice President;
E. W. Gates, General Superintendent.
Marshfield, Oregon.

Corcoran Telephone Exchange.

W. Cromlie, Owner, Corcoran, California.

Consolidated Utilities Company.

Lon Dunn, President and General Manager;
Rex Dunn, Vice President;
Estella Wilson, Secretary and Auditor.
Compton, California.

Del Norte Peoples Telephone Company.

W. T. Breen, President;
Geo. M. Keller, Vice President.
Crescent City, California.

Delta Telephone and Telegraph Company.

P. J. Huth, President;
H. F. Isham, Vice President;
H. D. Kercheval, Secretary and General Manager.
Courtland, California.

Denair Telephone Company.

E. J. Cadwalder, Turlock, California.

Dos Palos Telephone Company.

D. A. Leonard, President;
J. E. McClelland, Vice President;
E. W. Heston, Secretary and General Manager.
Dos Palos, California.

Downey Home Telephone and Telegraph Company.

Arthur L. Darby, President;
Orrin Gallup, Vice President and Superintendent;
A. Wardman, Secretary;
E. A. Carter, Auditor.
Whittier, California.

Ducor California Hot Springs Telephone and Telegraph Company.

L. S. Wingrove, President and General Manager;
F. M. Carlisle, Vice President;
H. C. Carr, Secretary and Treasurer.
Hot Springs, California.

Eel River and Southern Telephone Company.

H. D. Smith, President;
P. Calanchini, Vice President;
E. M. Loveland, Secretary and General Manager.
Ferndale, California.

Elk Grove Mutual Telephone Association.

R. J. Baker, President;
Edw. L. Gerrish, Secretary;
Ross L. Franks, General Manager.

Elk Grove, California.

The Evans Telephone Company.

J. H. Evans, Owner, Patterson, California.

Exeter Telephone and Telegraph Company.

Wm. DeCarteret, Owner, Exeter, California.

Farmington Telephone Association.

Farmington, California.

Federal Telegraph Company.

R. P. Schwerin, President;
Leon Bocqueraz, Vice President;
Augustus Taylor, Secretary;
J. E. Godcharles, Treasurer and Auditor.

812 Hobart Building, San Francisco, California.

Forest Hill Telephone Exchange.

M. C. Langstaff, Manager, Forest Hill, California.

Follows and Dailey Toll Line.

R. M. Follows, Azusa, California.

Fowler Independent Telephone Company.

J. S. Manley, President;
C. V. Peterson, Vice President;
J. H. Weinberg, Secretary and Treasurer;
J. D. Magill, General Manager and Superintendent.

Fowler, California.

Gilroy Telephone Company.

H. R. Chesbro, President;
E. J. Chesbro, Vice President;
C. R. Willson, Secretary;
C. W. Schemel, Manager;
W. E. Hills, Auditor.

Gilroy, California.

General Grant Park Telephone Company, Incorporated.

Dinuba, California.

G. F. Green.

Ripon, California.

The Guglielmetti Telephone Company.

W. J. Guglielmetti, General Manager, Petaluma, California.

Happy Valley Telephone Company.

Geo. W. Stowell, President;
A. L. Walker, Vice President;
L. D. Walker, Secretary.

Olinda, California.

Hedger, Estate Jennie.

Live Oak, California.

Mrs. Frank Hendricks.

Snelling, California.

The Home Telephone Company.

O. H. Price, President;
John Scott, Secretary.

Etiwanda, California.

The Home Telephone Company.

W. H. Buster, President and General Manager;
Oscar Robinson, Secretary.

Sycamore, California.

Home Telephone Company of Covina.

J. O. Houser, President;
A. P. Kerckhoff, Vice President;
Mrs. L. M. LaFetra, Vice President;
F. H. Wright, Secretary and General Manager.

Covina, California.

Home Telephone and Telegraph Company of Pasadena.

G. E. McFarland, President;
H. D. Pillsbury, Vice President;
J. C. Nowell, Vice President and General Manager;
James T. Shaw, Vice President;
A. H. Griswold, Vice President;
B. C. Carroll, Vice President;
D. P. Fullerton, Vice President;
T. V. Halsey, Secretary;
Geo. J. Petty, Treasurer;
F. C. Phelps, General Auditor.

Shreve Building, San Francisco, California.

Honey Lake Valley Mutual Telephone Association.

F. B. Hoffman, President;
Lloyd Hoffman, Secretary and Manager.

Janesville, California.

Huntington Beach Telephone Company.

E. H. Cookingham, President, Treasurer and General Manager;
R. Ewart, Secretary.

602 Main street, Huntington Beach, California.

Interstate Telegraph Company.

A. B. West, President;
A. S. Cooper, Vice President;
W. E. Porter, Secretary;
P. R. Ferguson, Auditor;
A. B. West, General Manager;
Vernon Wilder, General Superintendent, Bishop, California.

Riverside, California.

Ione Valley Telephone Line.

A. V. Prouty, Manager, Ione, California.

Keeler-Darwin Telephone Line.

WATER COMPANIES

List of Water Companies and Their Officials

Tables 1 to 4, Inclusive

WATER COMPANIES.

Officers of Water Companies, as Reported in Annual Reports Filed With the
Railroad Commission for the Year Ending December 31, 1923.

Abrott and Booth.

Danville, California.

Agua Caliente Water Works.

Wm. F. White, Agua Caliente, California.

The Anderson Canal Company.

H. A. Jastro, President and General Manager;

R. F. Haines, Vice President;

F. G. Munzer, Secretary;

Kern County Canal and Water Company, Treasurer;

Business address, 1704 Nineteenth street, Bakersfield, California.

Alderman, Mattie E.

Thermal, California.

Anderson Water Company.

F. A. Cody, President and General Manager;

E. G. Cody, Secretary.

Business address, Anderson, California.

Aptos Water Works.

F. L. Somers, 2650 Santa Fe avenue, Los Angeles, California.

A. J. Arnaudon Water System.

Mendota, California.

Artesian Water Company.

M. K. Rindge, President;

A. S. Cooper, Secretary.

Business address, 1120 Trust and Savings Building, Los Angeles, California.

Arrowhead Utility Company.

Lake Arrowhead, California.

Associated Water Company.

Paul Shoup, President;

P. G. Williams, Secretary and Auditor;

W. A. Sloan, Treasurer;

L. J. King, General Superintendent.

Business address, 79 New Montgomery street, San Francisco, California.

Avila Water Works.

A. E. Ruda, Avila, California.

August Oil Company.

F. A. Homan, President and General Manager;

F. D. Prescott, Vice President;

A. W. Burdick, Secretary;

L. S. McNutt, Superintendent.

Business address, Fresno, California.

R. A. Baker.

Box 94, Lamanda Park, California.

Bakersfield Water Works.

J. R. Williams, President;
Thos. C. Williams, General Manager;
Fairfax Williams, Secretary and Treasurer.

Business address, 1012 Baker street, Bakersfield, California.

Bert Ballinger Pumping Plant.

R.F.D. 2, Box 910, San Gabriel, California.

Bay Point Utilities Company.

F. A. Warner, President and General Manager;
A. H. Paulson, Vice President and Treasurer.

Business address, 1000 Balfour Building, 351 California street, San Francisco, California.

Beachland Water System.

A. I. Smith, Agent, 637 Consolidated Building, Sixth and Hill streets, Los Angeles, California.

Baldwin Park Domestic Water Company.

S. M. Walker, President and General Manager;
T. H. Wygant, Secretary;
Jeannette Walker, Treasurer.

Business address, Baldwin Park, California.

Bean Estate, Jacob.

Eugene E. Bean, Agent, Alhambra, California.

Bear Gulch Water Company.

Guy C. Earl, President;
J. K. Moffitt, Vice President;
E. Britton, General Superintendent;
R. G. Sproul, Secretary and General Manager.

Superintendent's address, Menlo Park, California.

Secretary and General Manager's address, California Hall, Berkeley, California.

Bear Valley Utility Company.

Pine Knot, California.

Bell Water Company.

W. H. King, President;
J. H. Clewett, Vice President;
Alva H. Pearson, Secretary and Treasurer;
A. B. Shaub, General Manager.

Business address, Bell, California.

A. L. Bennett Water System.

A. Curtis Case, Manager, 212 W. Center street, Anaheim, California.

Belvedere Water Corporation.

Edwin Janss, President;
A. L. Page, Vice President and General Manager;
Harold Janss, Secretary;
Fred Dodge, General Superintendent.

Business address, 404 Metropolitan Building, Fifth and Broadway, Los Angeles, California.

Blackburn, R. A.

331 El Bonita street, Glendale, California.

Benicia Water Company.

Ansley K. Salz, President;
Alexander Hamilton, Vice President;
H. D. Allen, Secretary;
Kullman Salz and Company, Treasurer;
J. J. Howarth, General Superintendent, Benicia, California.

Business address, 603 Wells Fargo Building, San Francisco, California.

Bond and Jones Water Company.

R. W. Jones, Manager, P. O. Box 611, Orange, California.

W. G. Bentley Water Plant.

Route 1, Box 219, Lankershim, California.

Biola Water Company.

Biola, Fresno County, California.

Bishop, E.

1706 Broadway, Oakland, California.

Book Investment Company.

Wright and Kimbrough, Owners, 817 J street, Sacramento, California.

Bloomington Ranch Domestic Water System.

H. B. Learned, 724 Van Nuys Building, Los Angeles, California.

Beverly Hills Utilities Company.

Burton E. Green, President;
Geo. J. Kuhrts, Vice President;
F. B. Sutton, Secretary;
H. L. Westbrook, Treasurer and Auditor.

Business address, 617 Merritt Building, Los Angeles, California.

Blairsden Water Company.

Blairsden, California.

C. A. G. Blix.

Lankershim, California.

Blue Point Ditch.

Sidney Wood, Grass Valley, California.

Boyes Springs Park Company.

James Baines, Owner, Boyes Springs, California.

Bolinas Water Company.

Mrs. Sherman R. Smith, Bolinas, California.

The Buena Vista Canal Company.

H. A. Jastro, President and General Manager;
W. W. Frazier, Vice President;
F. G. Munzer, Secretary;
Kern County Canal and Water Company, Treasurer.

Business address, 1704 Nineteenth street, Bakersfield, California.

Bradbury Estate Company.

545 Bradbury Building, Los Angeles, California.

The California Company.

R. G. Cann, Manager, Peoples Bank Building, Santa Cruz, California.

The Campbell Water Company.

Ralph H. Hyde, President and General Manager;
George E. Hyde, Vice President;
W. B. Jones, Secretary;
Wm. F. Mason, General Superintendent.

Business address, Campbell, California.

Calwa Water Works.

W. E. Keller, Owner, 907 E. Third street, Los Angeles, California.

California-Michigan Land and Water Company.

Richard C. Goodspeed, Secretary, 304 Central Building, Los Angeles, California.

Camarillo Water Company.

Ray Wilber, Owner, Camarillo, California.

California Vineyard and Improvement Company.

Nelson M. Van Fleet, Owner, Cucamonga, California.

Camp Rose Company.

Route 4, Box 84, Sebastapol, Sonoma County, California.

The Capitola Company.

H. A. Rispin, President;
Harry Bickell, Treasurer, Auditor and General Superintendent.
Capitola, California.

Castella Water Works.

John Amarati, Owner, Castella, California.

Centerville Water Company.

R. H. Cross, President and Manager, 638 Mills Building, San Francisco, California.

Cazadero Water System.

Geo. S. Montgomery, Owner;
Norman Miller, Manager.
Cazadero, California.

The Central Canal Company.

H. A. Jastro, President;
R. F. Haimes, Vice President;
F. G. Munzer, Secretary;
Kern County Canal and Water Company, Treasurer.
Business address, 1704 Nineteenth street, Bakersfield, California.

Central Mendocino County Power Company.

Frank W. Taft, President;
Edw. Morris, Vice President and General Manager;
H. W. Cook, Secretary.
Willits, California.

Helen M. Chamberlin Pumping Plant.

R.F.D. 12, Box 524, Los Angeles, California.

Ceres Water Works.

J. M. Vincent, Proprietor, Ceres, California.

Chauvet Water Works.

H. J. Chauvet, Glen Ellen, California.

Chico Vecino Water Company.

B. H. Steffen, Box 56, Chico, California.

Chico Water Supply Company.

Ed Harkness, President;
S. L. Sproul, Vice President;
A. G. Simpson, Secretary, Manager and Superintendent;
Bank of Italy, Treasurer.

Business address, 133 Broadway, Chico, California.

A. B. Chapman Estate.

431 Security Building, Los Angeles, California.

Chichizola Estate Company.

Jackson, California.

Chowchilla Water Company.

S. W. Dodds, Chowchilla, California.

Citizens Land and Water Company of Upland.

Charles Ruedy, President;
A. P. Harwood, Vice President;
C. P. Fuller, Secretary and Treasurer.

Business address, Box 578, Upland, California.

Citizens Water Company of Niles.

F. W. Jones, President;
W. V. Eberly, Vice President;
E. A. Ellsworth, Secretary and General Manager.

Business address, Niles, California.

City Water Company of Banning.

C. O. Barker, President;
M. F. Gilman, Vice President;
Chas. S. Hill, Secretary.

Business address, Banning, California.

Claremont Domestic Water Company.

L. T. Gillett, President;
G. S. Sumner, Vice President;
J. D. Johnson, Secretary;
H. T. Belcher, Treasurer;
W. White, General Manager.

Business address, Claremont, California.

Clark and Knipe Water System.

Garden Grove, California.

Clyde Company.

D. C. Seagrave, President;
W. H. Seagrave, Secretary.

1002 Santa Fe Building, San Francisco, California.

W. P. Cline Water System.

Graniteville, California.

Condit, Donald P.

R.F.D. 1, Box 385, San Gabriel, California.

Clover Valley Lumber Company.

C. D. Terwilliger, Secretary, Loyalton, California.

Coachella Water Plant.

Wm. H. Kersteiner, Coachella, California.

Coalinga Consolidated Water Company.

W. L. Winans, President;
W. H. Bueneman, Vice President;
C. H. Dickinson, Secretary and Auditor.

Secretary's address, Merritt Building, Los Angeles, California.
President's address, P. O. Box 248, Tulare, California.

Citizens Securities Company.

Care Wesley Roberts Company, 4316 Verdugo road, Los Angeles, California.

Conservative Water Company.

W. W. Pedder, President and General Manager;
A. B. Pedder, Secretary.

Business address, 8619 Fir street, Los Angeles.

Consolidated Water Company of Pomona.

E. B. Gridley, President;
F. L. Lathrop, Vice President;
G. A. Lathrop, Secretary and General Manager.

Business address, Pomona, California.

A. Conte Water System.

Lankershim, California.

The Coram Water Company.

S. A. Holman, President;
M. G. Holman, Secretary.

Business address, 830 Mondana boulevard, Oakland, California.

Consolidated Water and Development Company.

W. T. Estep, General Manager, Hawthorne, California.

Corona City Water Company.

R. L. Willits, President;
C. M. Scoville, Secretary;
First National Bank, Treasurer;
H. R. Case, General Manager.

Business address, Corona, California.

Coronado Water Company.

J. D. Spreckels, President;
W. Clayton, Vice President;
F. G. Whitehead, Secretary;
A. Ervast, Manager;
H. D. Huff, Auditor.

Business address, San Diego, California.

Cosumnes Irrigation Company.

R. T. McKisick, Secretary.

Business address, 33 State Capitol Building, Sacramento, California.

Cottonwood Irrigation and Mining Company.

E. J. Fowler, President and General Manager;
D. C. Earhart, Secretary and Treasurer.

Business address, Hornbrook, California.

Cottonwood Water Works.

Thos. R. Laffoon, Owner, Cottonwood, California.

The Cove Water Company.

E. M. Sheridan, President;
Lenna A. Sheridan, Vice President;
Dale A. Frane, Secretary.

Business address, Orange Cove, California.

Crestmore Land and Water Company.

Wallace S. Woodworth, 200 E. Colorado street, Pasadena, California.

Crown Water Company.

G. E. Campbell, President;
C. A. Thomas, Secretary;
C. D. Sutliff, Treasurer;
Wm. Barber, Chief Engineer.

Business address, 515 Slavin Building, Pasadena, California.

Criswell Water System.

Helen P. Criswell, Owner, Los Gatos, California.

Crocker-Huffman Land and Water Company.

Wm. H. Crocker, President;
C. E. Green, Secretary;
S. F. B. Morse, Manager.

Crocker Building, San Francisco, California.

Crystal Springs Irrigation System.

Ira A. Mooman, Owner, Inglewood, California.

Cucamonga Water Company.
